**UL LISTED CERTIFIED** **Grounding Rod Clamp, Bronze**

**Type WB**

- Used for grounding copper conductor parallel to ground rods
- Made from high strength, seamless electrolytic bronze to provide long term durability
- High strength silicon bronze hardware provides long term reliable assembly
- Accommodates a wide range of rod and conductor sizes – minimizes inventory requirements
- UL Listed and CSA Certified for grounding and bonding and suitable for direct burial in earth and concrete

## COMPRESSION CONNECTOR CRIMPING TOOLS

PANDUIT offers a wide range of tools to provide solutions for installing compression lugs and splices. PANDUIT installation tools provide quality performance, ease of installation, and lowest installed cost. The long-term reliability of PANDUIT installation tools provides the highest level of service to meet and surpass customer requirements.

- Ergonomic design to minimize operator effort
- Controlled cycle mechanisms ensuring reliability and repeatability in every crimp made
- Crimping dies are color-coded to easily match the compression connector to the proper die
- UL Listed and CSA Certified terminations with PANDUIT compression connectors, as noted

PANDUIT compression connector crimping tools are available in an assortment of styles including manually operated mechanical and hydraulic, battery operated hydraulic, and AC powered hydraulic to meet a variety of installation needs. UNI-DIE™ Dieless Crimping Tools crimp a variety of sizes and eliminate the need to purchase crimping dies. Fully self-contained battery powered crimping tools provide the ease of push button crimping.

## Crimping Guidelines for PANDUIT® PAN-LUG™ Compression Lugs and Splices

### 1. Select the proper PANDUIT compression connector for the conductor type and size being used.

- PANDUIT compression connectors are identified with the proper conductor size and conductor type marked on the tongue or barrel of the connector

• The proper conductor size and type to be used with each connector can also be found in the installation instructions included with PANDUIT product packaging and in the tool charts\* in this catalog

| PANDUIT PART NUMBER          | STUD WIRE SIZE             | WIRE RANGE TAKING WITH MIN-DIE TOOLS (AWG MIN) | WIRE STRIP LENGTH (IN.) | CT-1700       |
|------------------------------|----------------------------|--|-------------------------|---------------|
| LCB4, LCC4, SCL4             | 6 AWG                      | —  | 1-1/4<br>1-1/8          | RED P21 (3)   |
| LCB4, LCC4, SCL4             | 6 AWG                      | —  | 1-1/4<br>1-1/8          | BLUE P24 (3)  |
| LCB4, LCC4, LCC4-12***, SCL4 | 2 AWG SOL.<br>2-3 AWG STR. | 4 AWG  | 1-1/8<br>1-3/8          | GRAY P29 (3)  |
| LCC2, LCC2                   | 2 AWG                      | 6-2 AWG  | 1-1/4                   | BROWN P33 (3) |
| LCB1, LCC1, SCL1             | 1 AWG                      | 6-1 AWG  | 1-3/8<br>1-3/8          | GREEN P37 (3) |
| LCC1B, LCC1B, SCL1B          | 1/0 AWG                    | 6-1/0 AWG                                      | 1-3/2<br>1-3/8          | —             |
| LCC2B, LCC2B, SCL2B          | 2/0 AWG                    | 4-2/0 AWG                                      | 1-5/8<br>1-3/2          | —             |
| LCB3B, LCC3B, SCL3B          | 3/0 AWG                    | 2-3/0 AWG                                      | 1-9/16<br>1-1/2         | —             |

### 2. Strip the conductor to the proper strip length. As specified:

- On the PANDUIT product packaging label or
- On the installation instructions included with PANDUIT product packaging or
- In the tool charts\* in this catalog

Make sure the conductor is not stripped too long, which would result in exposed wire between the barrel of the connector and the cable insulation.

Make sure the conductor is not stripped too short, which would result in a less than complete contact area with the connector when the conductor is inserted in the barrel.

Do not nick or cut strands of conductor during crimping, which would result in a less than premium conductor termination.

Make sure conductor strands are free from corrosion.

### 3. Select the proper crimping die and crimping tool to be used with the connector.

Use crimping tools and dies that provide a UL Listed and/or CSA Certified electrical termination, to assure a safe and reliable connection.

Many PANDUIT compression connectors are UL Listed and CSA Certified when crimped with PANDUIT and specified competitor crimping tools and dies. These tools and dies are listed in the tool charts\* in this catalog. PANDUIT crimping tools and dies to be used with each connector are also listed on the installation instructions included with PANDUIT product packaging.

PANDUIT compression connectors are color-coded and marked with PANDUIT and specified competitor die index numbers. Select the proper crimping die to be used by matching the color code and die index number marked on the connector to the same markings on the crimping die.

### 4. Crimp the connector.

Insert the conductor into the barrel of the connector. The conductor should stop against the end of the barrel of the lug, or wire stop in the butt splice, upon complete insertion of the conductor in the barrel. Some lugs are offered with inspection windows that provide visual inspection of the complete conductor insertion.

Review the installation instructions included with the PANDUIT product packaging or the tool charts\* for the proper number of crimps to be placed in the connector. Make the first crimp in the barrel nearest

| WIRE PWR. (L2) | (L2) | PWR. PWR. (L2) |

| JD-920-300     | STD  | CD-2001-300    |
| HTE P65 (3)    | (2)  | WHITE P65 (3)  |
| JD-920-350     | STD  | CD-2001-350    |
| ED P71 (3)     | (3)  | RED P71 (3)    |
| JD-920-400     | STD  | CD-2001-400    |

the tongue of the lug, or wire stop in a butt splice, and make successive crimps in the barrel working towards the

conductor entry at the end of the barrel. Use the color-coded or knurled band markings on the barrel of the connector to evenly space the placement of the crimps in the barrel.

When properly crimped, the die index number engraved in the crimping die will be embossed into the barrel of the connector. The crimp should be placed in the connector so the die index number can be easily read when the connector is installed.

\* See tool charts on pages D3.52 – D3.90.

## Crimping Guidelines for PANDUIT® STRUCTUREDGROUND™ Compression Connectors

### TAP Installation

1. Locate desired position of TAP along main wire run. Allow clearance for tap wires (and cover installation if applicable). See clear cover table on page D3.8.
2. Strip insulation from wires to the length shown in the TAP tables on pages D3.9 – D3.10. Use care to avoid damaging the conductors.
3. Position wires in the appropriate tap grooves.
4. For easier installation, apply one of the flame retardant cable ties (provided) around the wires and through the slots in the TAP. **The head of the cable tie must be positioned along the side of the TAP as shown in Figure A.** Tension and cut off excess length of tie. Additional cable ties may be used adjacent to the TAP to secure the wires.
5. Install the correct dies (see page D3.87) into the crimping tool. Position the locator die into the stationary die holder. **Note: The color code and die index number shown on the HTAP and crimping dies must match.**
6. Position the TAP against the locator in the stationary die holder of the crimping tool.
7. After crimping, if desired, cut off the cable tie head or remove the entire cable tie. **Note: In some cases, the cable tie head must be cut off in order for the crimped connector to fit inside the insulating cover.**

### HTAP Cover Installation

1. If labels are being utilized, cut labels to the dimensions shown below. **Note: When using a PANDUIT® PAN-THER™ LS8E printer, the length dimensions can be easily programmed to provide cut-off marks.**
2. Position the label(s) in the pockets inside the cover and snap in the label retainer(s) as shown in Figure B. Information can be marked on the matte finish label retainers in lieu of using a separate label.
3. Position one cover half around the crimped connector assembly. Align the second cover half with the first and snap together.
4. Install the two flame retardant cable ties (provided) in the grooved areas on the cover. Tension and cut off excess lengths of ties.

**Label Size Information**

| Clear Cover Part Number | Label Height (Max.) | Label Length (Wrap-Around Style) | Label Length (Flat Style) |
|-------------------------|---------------------|----------------------------------|---------------------------|
| CLRCVR1-1               | .38                 | 1.56                             | 1.00                      |
| CLRCVR2-1               | .38                 | 1.87                             | 1.25                      |
| CLRCVR3-1               | .38                 | 2.37                             | 1.75                      |
| CLRCVR5-1               | .38                 | 3.37                             | 2.06                      |
| CLRCVR6-1               | .38                 | 4.31                             | 2.94                      |

See tool charts on pages D3.52 – D3.90 for selection of crimping dies and number of crimps used with specific tool and connector combinations.

## Die Type, Manual, Crimping Tool

- High quality, durable tool construction provides long term dependability

- Develops 6 tons of crimping force, crimps copper compression lugs and splices up to 500 kcmil
- Provides UL Listed and CSA Certified connections on PANDUIT copper and aluminum lugs, splices, and insulated terminals

| Part Number | Part Description  | Std. Pkg. Qty. |
|-------------|---|----------------|
| CT-720      | Manual crimping tool for UL Listed or Recognized and CSA Certified terminations of PANDUIT® PAN-LUG™ copper compression lugs and splices for #8 AWG – 500 kcmil copper code conductor and aluminum compression lugs and splices for #6 AWG – 350 kcmil copper and aluminum code conductors. Provides UL Listed terminations of PANDUIT® PAN-TERM® #8 – #2 AWG vinyl insulated terminals.<br><br>Color-coded CD-720 crimping dies, carrying/storage case and controlled cycle mechanism must be purchased separately.<br><br>Specifications:<br>Output: 6 tons<br>Weight: 7.7 lbs.<br>Length: 26"<br>Handle span: 58" (open), 2.5" (closed)<br>Warranty: 90 days | 1              |
| CC-720      | Optional controlled cycle mechanism only. Total weight of tool with CC-720 is 8.25 lbs.   | 1              |
| C-720       | Black steel carrying case for CT-720 crimping tool.   | 1              |

For battery powered crimping tools, see compression connector tools selection guide on pages D3.30 – D3.32.

## CD-720 Crimping Dies

- Color-coded for easy matching to color-coding marked on connectors
- Embosses die index number on connector barrels to provide post crimp inspection except CD-720PV8-2

- Part number permanently marked on crimping die for easy identification
- Provides 5-sided crimp results in terminations with premium electrical and mechanical performance

| Part Number | Used to Install PANDUIT Compression Lug and Splice Sizes |  |                         |  | Std. Pkg. Qty. |
|-------------|--|--|-------------------------|--|----------------|
|             | Copper Conductor Size                                    | Copper Die Color and Die No.               | Aluminum Conductor Size | Aluminum Die Color and Die No.         |                |
| CD-720-1    | #8 – #2 AWG  | Red P21, Blue P24, Gray P29, Brown P33     | #6 AWG                  | Gray P29                               | 1              |

## Cable Stripping Tool for Large Cable Sizes

D2.  
Power  
Connectors

- Provides safe and easy stripping of cable insulation for cables 3/16" to 1 9/16" diameter
- Cutting blade provides circular, spiral, and in-line insulation cutting
- Spiral cut mode, tough/hard insulations peel off easily
- In-line cut mode for use with softer insulation like neoprene
- Unique blade profile for long life, low friction stripping of difficult insulations like rubber and silicon

- Cutting blade easily adjusts to proper height to cut insulation without nicking conductor strands
- Ergonomic shape for safe comfortable use
- Compact design
- Easy-fit replacement blade, one spare blade included with tool

## Die Type, Manual Hydraulic, 14 Ton, Crimping Tool

- Develops 14 tons of crimping force, crimps copper compression lugs and splices up to 750 kcmil
- Two-stage rapid advance hydraulic system minimizes number of pumps required to complete a crimp, saves time
- High quality, durable tool construction provides long-term dependability
- Cushioned grip prevents hands from slipping on tool, reduces fatigue
- Provides UL Listed and CSA Certified connections on *PANDUIT® PAN-LUG™* Copper and Aluminum Lugs and Splices and Copper Taps
- Open “C-Head” design allows easy loading of crimping dies and connectors, saves time
- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Rubber boot on crimp head provides abrasion protection
- Audible “pop-off” valve indicates crimp completion
- Crimp head rotates 180 degrees, provides versatility for use in restricted spaces

## Die Type, Battery Powered Hydraulic, 6 Ton, Crimping Tool with Closed Head

B1.  
Cable Ties

- Battery powered, provides fingertip operation
- Self-contained unit, completely portable
- Lightweight and ergonomically balanced for easy operation without fatigue
- Develops 6 tons of crimping force, crimps copper compression lugs and splices up to 500 kcmil
- Provides UL Listed and CSA Certified connections on *PANDUIT® PAN-LUG™* Copper Lugs, Splices, and Taps
- Audible "pop-off" valve indicates crimp completion
- Tool provided with two, NiCd rechargeable batteries and battery charger to allow for continuous operation
- High productivity, up to 80 crimps on 500 kcmil copper lugs and splices on a single battery charge
- Six to eight second crimp cycle time provides quick terminations, saves time

- Battery charger charges expended batteries completely in 25 minutes
- Battery charger includes battery reconditioner feature which prevents battery memory build-up and provides over 1,000 battery recharge cycles resulting in long life
- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Crimp head rotates 180 degrees to provide versatility for use in restricted spaces

Uses color-coded CD-2001 crimping dies. Dies must be purchased separately, see page D3.38.  
 For battery charger and battery accessories, see page D3.51.

## Die Type, Battery Powered Hydraulic, 6 Ton, Crimping Tool with Open “C-Head”

- Battery powered, provides fingertip operation
- Self-contained unit, completely portable
- Lightweight and ergonomically balanced for easy operation without fatigue
- Develops 6 tons of crimping force, crimps copper compression lugs and splices up to 500 kcmil
- Provides UL Listed and CSA Certified connections on *PANDUIT® PAN-LUG™* Copper Lugs, Splices, and Taps
- Open “C-Head” design allows easy loading of crimping dies and connectors, saves time
- Rubber boot on crimp head provides abrasion protection
- Audible “pop-off” valve indicates crimp completion
- Tool provided with two, NiCd rechargeable batteries and battery charger to allow for continuous operation
- High productivity, up to 80 crimps on 500 kcmil copper lugs and splices on a single battery charge
- Six to eight second crimp cycle time provides quick terminations, saves time
- Battery charger charges expended batteries completely in 25 minutes
- Batteries include LED battery charge indicators for visual indication of current battery charge
- Battery charger includes battery reconditioner feature which prevents battery memory build-up and provides over 1,000 battery recharge cycles resulting in long life
- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Crimp head rotates 180 degrees to provide versatility for use in restricted spaces

CDM-2001

## Die Type, Battery Powered Hydraulic, 12 Ton, Crimping Tool

- Battery powered, provides fingertip operation
- Self-contained unit, completely portable
- Develops 12 tons of crimping force, crimps copper compression lugs and splices up to 750 kcmil
- 2-stage rapid advance hydraulic system minimizes cycle time
- Provides UL Listed and CSA Certified connections on *PANDUIT® PAN-LUG™* Copper and Aluminum Lugs and Splices and Copper Taps
- Open “C-Head” design allows easy loading of crimping dies and connectors, saves time
- Rubber boot on crimp head provides abrasion protection
- Ram automatically retracts when crimp cycle is complete
- Tool provided with two, high capacity 12 VDC rechargeable nickel-metal hydride batteries to provide for continuous operation and eliminate “memory” build-up, one hour charge time
- Eight second crimp cycle time provides quick terminations, saves time
- Uses industry standard MAKITA® batteries and charger, industry proven reliability easy to obtain from local retail sources
- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Crimp head rotates 360 degrees to provide versatility for use in restricted spaces

A. System Overview

## Die Type, Battery Powered Hydraulic, 15 Ton, Crimping Tool

B1. Cable Ties

- Battery powered, provides fingertip operation
- Self-contained unit, completely portable
- Develops 15 tons of crimping force, crimps copper compression lugs and splices up to 1,000 kcmil

- Battery charger charges expended batteries completely in 25 minutes
- Batteries include LED battery charge indicators for visual indication of current battery charge

B2. Cable Accessories

- Provides UL Listed and CSA Certified connections on *PANDUIT® PAN-LUG™* Copper and Aluminum Lugs and Splices and Copper Taps

- Battery charger includes battery reconditioner feature which prevents battery memory build-up and provides over 1,000 battery recharge cycles resulting in long life

B3. Stainless Steel Ties

- Flip-top crimp head design allows easy loading of crimping dies and connectors, saves time
- Rubber boot on crimp head provides abrasion protection
- Audible “pop-off” valve indicates crimp completion

- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels to provide post crimp inspection

C1. Wiring Duct

- Tool provided with two, NiCd rechargeable batteries and battery charger to allow for continuous operation
- High productivity, up to 35 crimps on 500 kcmil copper lugs and splices on a single battery charge

- Dies installed using spring loaded die retention pins, no need for tools

C2. Surface Raceway

- Eight second crimp cycle time provides quick terminations, saves time

- Crimp head rotates 180 degrees to provide versatility for use in restricted spaces

C3. Abrasion Protection

C4. Cable Management

Uses CD-920 and CD-930 color-coded crimping dies with CD-940-DA die adapter. Uses CD-940 color-coded crimping dies. Dies and die adapter must be purchased separately, see pages D3.46, D3.47. For battery charger and battery accessories, see page D3.51.

## Die Type, Remote Hydraulic, 14 Ton, Crimp Head

- Develops 14 tons of crimping force when used with 10,000 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 750 kcmil
- Incorporates Parker type quick-connect fittings to ease installation and save time
- High quality, durable tool construction provides long-term dependability
- Provides UL Listed and CSA Certified connections on *PANDUIT® PAN-LUG™* Copper and Aluminum Lugs and Splices and Copper Taps
- Open “C-Head” design allows easy loading of crimping dies and connectors, saves time
- Uses color-coded crimping dies to provide easy matching of crimping die to connector
- Embosses die index number on connector barrels for post crimp inspection
- Dies installed using spring loaded die retention pins, no need for tools
- Cast in handle allows crimp head to be mounted in a bench vice

Uses CD-920 and CD-930 color-coded crimping dies with CD-940-DA die adapter. Uses color-coded CD-940 crimping dies. Crimping dies and die adapter must be purchased separately, see pages D3.46 and D3.47. CG-940 crimp force measurement gauge available, sold separately, see page D3.51.

\*CT-901RCH remote control handle available, offering one hand operation of crimp head with *PANDUIT* CT-901HP hydraulic pump and CT-900HPH hose, sold separately, see page D3.43.

## Hydraulic Pump and Accessories, Electric, 10,000 PSI

- Develops 10,000 psi of hydraulic pressure
- Easy to operate using manual switch or remote pendant supplied; or optional CT-901RFS foot switch or CT-901RCH remote controlled handle
- Factory set relief valve, pump stops when crimp is complete
- Convenient 120 VAC operation
- Incorporates Parker type quick-connect fittings to ease installation and save time
- Versatile, can be used with *PANDUIT* CT-930CH, CT-940CH, or CT-980CH crimp heads

System  
Overview

## Die Type, Remote Hydraulic, 10.5 Ton, Crimp Head

B1.  
Cable Ties

- Low pressure system extends life of crimp head for high volume crimping applications

- Open “C-Head” design allows easy loading of crimping dies and connectors, saves time

B2.  
Cable  
Accessories

- Develops 10.5 tons of crimping force when used with 7,500 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 250 kcmil

- Uses color-coded crimping dies to provide easy matching of crimping die to connector

B3.  
Stainless  
Steel Ties

- Incorporates Parker type quick-connect fittings to ease installation and save time

- Embosses die index number on connector barrels for post crimp inspection

- High quality, durable tool construction and low pressure hydraulic requirements provide long-term dependability and tool life

- Dies installed using spring loaded die retention pins, no need for tools

- Provides UL Listed and CSA Certified connections on **PANDUIT® PAN-LUG™** Copper Lugs and Splices

- Cast in handle allows crimp head to be mounted in a bench vice

| CT-8250HP   | <p>Hydraulic pump. Develops 7,500 psi output. Pump shuts off when cycle is complete. Will not release until down switch is activated. Compatible with CT-900LPHPH hydraulic hose, CT-930LPCH, and CT-980LPCH crimp heads sold separately.*</p> <p>Specifications:<br/>                     Pump output: 7,500 psi<br/>                     Tank capacity: 2.5L incorporates sight gauge for visual inspection of fluid level<br/>                     Fluid type: Aero Shell #4 or equal<br/>                     Motor: 120 VAC 50/50Hz<br/>                     Current: 6.5 Amps<br/>                     Horsepower: 1/2 hp<br/>                     Warranty: 5 years</p> <p>Weight: 34 lbs.<br/>                     Length: 7"<br/>                     Height: 14"<br/>                     Width: 6"</p> <p>CT-8250HP pump includes:<br/>                     • On/off pendant switch on 10' electric cord<br/>                     • Three prong A/C plug on 10' electric cord<br/>                     • Supplied with male Parker type quick-connect fitting assembled to pump</p> | 1              |
| CT-900LPHPH | Electrically non-conductive 10' hose compatible with <i>PANDUIT</i> CT-8250HP hydraulic pump and CT-930LPCH and CT-980LPCH crimp heads, supplied pre-filled with hydraulic fluid for fast start up. Supplied with two female Parker type quick-connect fittings. Warranty: 5 years   | 1              |
| CT-901RFS   | Dual electrical foot switch that allows convenient "hands free" operation of the <i>PANDUIT</i> CT-901HP or CT-8250HP electric hydraulic pumps used with <i>PANDUIT</i> remote hydraulic crimp heads. Supplied with 10' electric cord that can be directly connected to <i>PANDUIT</i> hydraulic pumps. Warranty: 5 years  | 1              |

\*For more information on crimp heads, see pages D3.44 and D3.50.  
 PG-1 in-line pressure gauge provides visual measurement of hydraulic output pressure, sold separately, see page D3.51.

## CD-940 Crimping Dies

- Color-coded for easy matching to color-coding marked on connectors
- Embosses die index number on connector barrels for post crimp inspection
- Part number permanently marked on crimping die for easy identification
- Provides circumferential crimp results in terminations with premium electrical and mechanical performance

A.  
System  
Overview

## UNI-DIE™ Dieless, Manual Hydraulic, 6.2 Ton, Crimping Tool

B1.  
Cable Ties

- Dieless crimping tool design eliminates purchase or lost crimping dies, saves cost

- Provides UL Listed and CSA Certified connections on *PANDUIT® PAN-LUG™* Copper Lugs and Splices

B2.  
Cable  
Accessories

- Develops 6.2 tons of crimping force with four point indenter system, crimps copper compression lugs and splices up to 750 kcmil

- Provides UL Listed and CSA Certified wire range-taking capability on *PANDUIT® PAN-LUG™* Copper Lugs and Splices, minimizes connector inventory and saves cost

B3.  
Stainless  
Steel Ties

- Two-stage rapid advance hydraulic system minimizes number of pumps required to complete a crimp

- Flip-top crimp head design allows easy loading of connectors, saves time

- High quality, durable tool construction provides long-term dependability

- Audible “pop-off” valve indicates crimp completion

- Cushioned grips prevent hands from slipping on tool, reduces fatigue

- Crimp head rotates 360 degrees, provides versatility for use in restricted spaces

C1.  
Wiring  
Duct

- Incorporates aluminum crimp head and fiberglass handles, results in lightweight tool and ease of operation

CG-980 pressure gauge for measuring tool output force available, sold separately, see page D3.51.

## UNI-DIE™ Dieless, Battery Powered Hydraulic, 6.2 Ton, Crimping Tool, 12 VDC

- Dieless crimping tool design eliminates purchase or lost crimping dies, saves cost
- Battery powered, provides fingertip operation
- Self-contained unit, completely portable
- Develops 6.2 tons of crimping force with four point indenter system, crimps copper compression lugs and splices up to 750 kcmil
- Two-stage rapid advance hydraulic system minimizes cycle time
- Ram automatically retracts when crimp cycle is complete
- Tool provided with two, high capacity 12 VDC rechargeable nickel-metal hydride batteries to provide for continuous operation and eliminate "memory" build-up, one hour charge time
- Uses industry standard MAKITA\* batteries and charger, industry proven reliability and easy to obtain from local retail sources
- Provides UL Listed and CSA Certified connections on PANDUIT® PAN-LUG™ Copper Lugs and Splices
- Provides UL Listed and CSA Certified wire range-taking capability on PANDUIT® PAN-LUG™ Copper Lugs and Splices, minimizes connector inventory and saves cost
- Flip-top crimp head design allows easy loading of splices, saves time
- Crimp head rotates 360 degrees, provides versatility for use in restricted spaces

## UNI-DIE™ Dieless, Remote Hydraulic, 6.2 Ton, Crimp Head

B1. Cable Ties

- Dieless crimping tool design eliminates purchase or lost crimping dies, saves cost
- Develops 6.2 tons of crimping force when used with 10,000 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 750 kcmil

- Provides UL Listed and CSA Certified connections on *PANDUIT® PAN-LUG™* Copper Lugs and Splices
- Provides UL Listed and CSA Certified wire range-taking capability on *PANDUIT® PAN-LUG™* Copper Lugs and Splices, minimizes connector inventory and saves cost

B2. Cable Accessories

- Incorporates Parker type quick-connect fittings to ease installation and save time

- Flip-top crimp head design allows easy loading of splices, saves time

## UNI-DIE™ Dieless, Remote Hydraulic, 4.7 Ton, Crimp Head

D2. Power Connectors

- Low pressure system extends life of crimp head for high volume crimping application

- Incorporates Parker type quick-connect fittings to ease installation and save time

D3. Grounding Connectors

- Dieless crimping tool design eliminates purchase or lost crimping dies, saves cost
- Develops 4.7 tons of crimping force when used with 7,500 psi hydraulic pump and hose, crimps copper compression lugs and splices up to 250 kcmil

- Provides UL Listed and CSA Certified connections on *PANDUIT® PAN-LUG™* Copper Lugs and Splices
- Flip-top crimp head design allows easy loading of splices, saves time

## Pressure Gauges

- Provide easy visual reading of output force for hydraulic crimping tools
- Factory calibrated to provide accuracy and quality assurance control of crimping tools in the field
- Easy-to-read crimp force tolerance zone for applicable tools marked on gauge
- Blank dies for fixture supplied with test gauge for easy mounting and operation of gauge with crimping tool

①The CT-1700 and CT-1701 crimp die pockets are integrated into the tool frame.  
 ②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ③Maximum size: 500 kcmil lugs and 250 kcmil splices.  
 ④Maximum size: 250 kcmil lugs and splices. No extended wire range.

For use with  
Copper  
Conductors

①The CT-1700 and CT-1701 crimp die pockets are integrated into the tool frame.  
 ③CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ⑤Maximum size: 500 kcmil lugs and 250 kcmil splices.  
 ⑥Maximum size: 250 kcmil lugs and splices. No extended wire range.

For use with  
Copper  
Conductors

## Installation Tooling and Die Selections for: Types LCB, LCBN, LCC, LCCN and SCL (continued)

①The CT-1700 crimp die pockets are integrated into the tool frame.  
 ②Half width dies.  
 ③CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ④CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

⑤Maximum size: 500 kcmil lugs and 250 kcmil splices.  
 ⑥Maximum size: 250 kcmil lugs and splices. No extended wire range.  
 ⑦Maximum size: 500 kcmil lugs and splices.

**For use with  
Copper  
Conductors**

① The CT-1700 crimp die pockets are integrated into the tool frame.  
 ③ CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ④ Maximum size: 250 kcmil.

For use with  
Copper  
Conductors

①The CT-1700 crimp die pockets are integrated into the tool frame.  
 ③CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ④CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.  
 ⑦Does not include class M flex conductor with Thomas and Betts tools.

**For use with  
Copper  
Conductors**

## Installation Tooling and Die Selections for: Types LCAX, LCAXN, LCBX, LCDX, LCDXN and LCCX (continued)

① CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.

② CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

③ Can only be crimped with CT-940CH and CT-2940 tools.

①The CT-1700 crimp die pockets are integrated into the tool frame.  
 ②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.  
 ③CD-940 dies to be used with CT-940CH and CT-2940 tools.  
 ④Maximum conductor size: 500 kcmil class I and 750 kcmil class I, B, C, Compact.  
 ⑤Maximum conductor size: 250 kcmil class I and 400 kcmil class I, B, C, Compact.

①The CT-1700 crimp die pockets are integrated into the tool frame.

③CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA die adapter. Maximum size splice is 250 kcmil with CT-920, CT-920CH, and CT-2920 tools.

④CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

For use with  
Copper or  
Aluminum  
Conductors

## Installation Tooling and Die Selections for: Types LAA, LAB, and SA (continued)

## Installation Tooling and Die Selections for: Type SAR

### How to read this chart

For SAR2-4 splice and CT-2001 crimping tool:

### PANDUIT (See Compression Connector Tools Selection Guide, Pages D3.30 – D3.32)

| PANDUIT Part Number | Aluminum Wire Size | Aluminum or Copper Wire Size | Wire Strip Length (both ends) (In.) | CT-720  | CT-2001, CT-2002              | CT-920, CT-920CH, CT-930, CT-930CH, CT-2930, CT-2931, CT-930LPCH, CT-2920, CT-940CH <sup>②</sup> , CT-2940 <sup>②</sup> |
|---------------------|--------------------|------------------------------|-------------------------------------|---|-------------------------------|---|
|                     |                    |                              |                                     | Die Part Number/Color Code and Die Index Number/ (Number of Crimps) |                               |   |
| <b>SAR2-4</b>       | #2 AWG             | #4 AWG                       | 2-1/16                              | CD-720-2<br>Tan P50<br>(3)  | CD-2001-3/0<br>Tan P50<br>(3) | CD-920-3/0<br>Tan P50<br>(2)  |
| <b>SAR1/0-2</b>     | 1/0 AWG            | #2 AWG                       | 2-1/16                              | CD-720-2<br>Tan P50<br>(3)  | CD-2001-3/0<br>Tan P50<br>(3) | CD-920-3/0<br>Tan P50<br>(2)  |
| <b>SAR3/0-1/0</b>   | 3/0 AWG            | 1/0 AWG                      | 2-5/16                              | CD-720-5<br>Red P71<br>(3)  | CD-2001-350<br>Red P71<br>(4) | CD-920-350<br>Red P71<br>(2)  |
| <b>SAR4/0-2/0</b>   | 4/0 AWG            | 2/0 AWG                      | 2-3/16                              | CD-720-5<br>Red P71<br>(3)  | CD-2001-350<br>Red P71<br>(4) | CD-920-350<br>Red P71<br>(2)  |
| <b>SAR350-4/0</b>   | 350 kcmil          | 4/0 AWG                      | 3-3/16                              | CD-720-7<br>Brown P87<br>(4)  | —                             | CD-920-500<br>Brown P87<br>(4)  |
| <b>SAR500-350</b>   | 500 kcmil          | 350 kcmil                    | 4-1/4                               | —   | —                             | CD-920-500A<br>Pink P99<br>(4)  |
| <b>SAR600-500</b>   | 600 kcmil          | 500 kcmil                    | 4                                   | —   | —                             | CD-920-750, CD-940-750 <sup>③</sup><br>Black P106<br>(4)  |
| <b>SAR750-600</b>   | 750 kcmil          | 600 kcmil                    | 4-7/16                              | —   | —                             | CD-940-750 <sup>③</sup><br>Red P125<br>(4)  |

②CD-920 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA die adapter. Maximum size splice is 250 kcmil with PANDUIT CT-920, CT-920CH and CT-2920 tools and Burndy Y35, Y35BH and BAT35 tools.

③CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

For use with  
Copper or  
Aluminum  
Conductors

①CD-920 and CD-930 dies can be used with CT-940CH and CT-2940 tools with CD-940-DA adapter.

②CD-940 dies to be used exclusively with CT-940CH and CT-2940 tools.

③Built into the CT-2001 crimping tool.

**For use with  
Copper  
Conductors**

①CD-920H and CD-930H dies can be used with CT-940CH and CT-2940 PANDUIT tools and Y46 and Y46C Burndy tools with CD-940-DA adapter. PANDUIT crimping dies must be used with all tooling (PANDUIT and competitor) to maintain UL/CSA certifications for applications up to 600 V.

## LABELING SYSTEMS

*PANDUIT* is a global leader in reliable and innovative solutions for identification and safety. Products are engineered for a wide variety of industries and applications – including electrical, electronics, industrial and network. *PANDUIT* provides enhanced productivity, reliability, and value with leading-edge software development, materials and equipment by designing and manufacturing a full line of labeling products, software and printers to assist you with your labeling requirements.

- World-class quality – ISO 9001 and ISO 14001
- High performance and reliability
- Wide variety of system solutions to meet the most demanding requirements
- Meet and exceed the requirements of UL, CSA, ISO, NEC and OSHA
- Strong service and support network – distributor partners, knowledgeable sales people, expert technical support and world-class customer service

*PANDUIT* provides a complete range of industrial products and tools – including hand-held labeling systems, desktop labeling systems, pre-printed labels and safety systems. Use *PANDUIT* for all your identification needs for wire and cable, electrical and electronic devices, agency compliance, workplace safety and more.

## PRINTERS: THERMAL TRANSFER DESKTOP AND HAND-HELD

*PANDUIT* desktop thermal transfer printers enable fast, high quality label production for all your identification requirements. Use *PANDUIT* labeling software and desktop thermal transfer printers to produce on demand identification solutions quickly and economically. *PANDUIT* hand-held printers are designed for flexibility. Programmed with advanced functionality, *PANDUIT* printers make custom labeling easy.

### Hand-Held Printers

- Create labels at remote job sites
- Provide crisp, clear, high quality thermal transfer print
- Easily identify moves, adds, or changes

### Desktop Printers

- Compatible with *PANDUIT® EASY-MARK™* Labeling Software
- Provide crisp, clear, high quality thermal transfer print
- Compatible with *WINDOWS^* based PC operating systems

*PANDUIT* printers and our wide variety of labels provide solutions for all your project labeling needs.

^WINDOWS is a registered trademark of Microsoft Corporation in the United States and/or other countries.

## PANTHER™ LS8E Hand-Held Thermal Transfer Printer and Accessories

B1.  
Cable Ties

- Cut-to-length functionality eliminates label waste and label trimming labor
- Partial cut feature available to provide tear-apart strips of labels
- P1™ Label Cassette contains an integrated memory device for automatic formatting, recall of last legend used, and number of labels remaining in the cassette
- Market specific labeling tools simplify label creation for electrical components, panel building, and construction and maintenance

- USB interface for importing data, system upgrades, and printing from a wireless laptop or desktop computer
- Prints self-laminating labels, heat shrink tubing, die-cut component labels and continuous tapes
- Fast loading label cassette includes both label material and ribbon to make changing labels easy
- Large graphic display with backlight for improved visibility

## P1™ Military Grade Continuous Heat Shrink Label Cassettes for PANTHER™ LS8E or COUGAR™ LS9 Hand-Held Thermal Transfer Printers

B1. Cable Ties

- P1™ Label Cassette contains an integrated memory device for automatic formatting, recall of last legend used, and number of labels remaining in the cassette
- Fast loading label cassette includes both label material and ribbon to make changing labels easy

- Meets print performance requirements of MIL-M-81531 and MIL-STD-202F Method 215A, Solution A, C, and D
- Meets UL Standard 224 for flammability
- Shrink ratio 3:1
- Each cassette contains a continuous roll of non-adhesive flattened polyolefin that can be cut-to-length

## TDP43MY Thermal Transfer Desktop Printer and Accessories

- Compact, lightweight design enables use in office or remote locations
- 300 dpi thermal transfer printer creates crisp, clear legends with superior legibility
- Up to 2.00 inches per second print speed for fast label production

- Use to print a wide variety of self-laminating labels, component labels, non-laminated labels, heat shrink labels, marker plates and continuous tapes up to 4.00 inches wide
- *EASY-MARK™* Labeling Software and hybrid ribbon included with printer

| Part Number | Description  | Std. Pkg. Qty. |
|-------------|--|----------------|
| TDP43MY     | 300 dpi printer; includes printer, <i>PANDUIT® EASY-MARK™</i> Labeling Software, RMH4BL hybrid black ribbon, AC power adapter with US and Europlug power cords, manual and quick start card. | 1              |
| TDP43M-RS   | External label roll stand – used to rear feed labels that are supplied on 3.00" cores, such as photoluminescent tape.  | 1              |
| TDP43M-CASE | Hardside carrying case. Accommodates printer, AC power adapter, ribbons, printer cable, labels and tools.  | 1              |
| TDP43M-AC   | Replacement AC power adapter with power cord (US cord only).   | 1              |
| PTR-CLN     | Printer cleaning kit – contains bottle of cleaning solution with MSDS, cleaning pen, swabs, alcohol wipes and cleaning instructions.   | 1              |

## Ribbons for Use with the TDP43MY Thermal Transfer Desktop Printer

- **Hybrid** – Recommended for use with self-laminating, heat shrink, component and non-laminated labels
- **Wax** – Recommended for use with self-laminating and non-laminated labels

- **Resin** – Recommended for use with component labels, marker plates, and continuous tape

## LABELING SOFTWARE

PANDUIT labeling software is custom designed to address your requirements for wire/cable labeling, component identification, network administration, as well as, safety and facility identification. From control panel wire identification, terminal block and facility pipe marking to patch panel, faceplate and wire/cable marking, PANDUIT software is the solution for your on-demand identification requirements.

- **EASY-MARK™** Labeling Software is an easy-to-use, intuitive general purpose labeling software
- **CAD-CONNECT™** Labeling Software generates labels quickly and easily directly from an electronic CAD file

PANDUIT user-friendly software packages meet the unique requirements of your applications.

A.  
System  
Overview

## EASY-MARK™ Labeling Software

B1.  
Cable Ties

- EASY-MARK™ Labeling Software simplifies label creation for the specific needs of your applications

- EASY-MARK™ Labeling Software is part of a complete line of innovative identification solutions from PANDUIT

B2.  
Cable  
Accessories

- Instructions and user interface are available in English, French, German, Italian, Spanish, Korean, Japanese, Chinese and Portuguese

- Supports most WINDOWS^ fonts drivers for standard thermal transfer, dot matrix, laser and ink jet, including PANDUIT thermal transfer printers

B3.  
Stainless  
Steel Ties

- Intuitive interview process allows automatic generation of labels and signs

### System Requirements:

- Software selects and formats the optimum label for your specific application

- WINDOWS^ 2000, NT4.x, XP, or Vista; 64 MB hard drive space and 64 MB RAM (256 MB RAM recommended)

- **WYSIWYG** (What You See Is What You Get) user interface, alpha/numeric serialization, data import, symbol import

## CAD-CONNECT™ Labeling Software

C4.  
Cable  
Management

- Generates labels quickly and easily directly from electronic CAD files

- Exports to alternative formats such as EXCEL^ (XLS) or Text (CSV) files for future use and documentation

D1.  
Terminals

- Eliminates steps and time spent manually copying CAD identifiers into labeling software

### System Requirements:

- Program combines the power of an innovative wizard interview and EASY-MARK™ Labeling Software to capture and organize identifiers from electronic CAD files to automatically create and print labels

- WINDOWS^ 2000, NT4.x, XP, or Vista; 64 MB hard drive space and 64 MB RAM (256 MB RAM recommended)

D2.  
Power  
Connectors

- Compatible with full versions of AutoCAD\* 2000i or newer, AutoCAD Mechanical 2007, and Visio^ 2002 or newer

D3.

## LABELS: LASER, INK JET, THERMAL TRANSFER AND DOT MATRIX

*PANDUIT* provides a full line of on demand printable labels designed to meet all of your identification needs.

- Laser/ink jet labels supplied on 8.50" x 11.00" sheets and can be printed in commercially available laser and ink jet printers not sold by *PANDUIT*
- Thermal transfer labels supplied on rolls offer crisp, clear legends with superior legibility and can be printed on *PANDUIT* thermal transfer desktop printers or commercially available models
- Dot matrix labels supplied on pin feed sheets are a high quality, economical solution and can be printed on commercially available dot matrix printers not sold by *PANDUIT*
- Size illustrations are provided for reference

*PANDUIT* labeling solutions meet customer needs at the lowest total installed cost.

## Laser/Ink Jet Non-Laminated Labels

- Labels can be printed in both laser/ink jet printers
- Use as a wrap around label or flag style labels for wire/cable labeling

- Available in polyolefin material and supplied on 8.50" x 11.00" sheets
- PANDUIT labeling software packages include all label formats for quick and easy label production

## Part Number System for Non-Laminated Labels

A. System Overview

## Thermal Transfer Self-Laminating Labels

B1. Cable Ties

- Self-laminating adhesive labels supplied on rolls, include a colored print-on area and clear overlamine
- Use with *PANDUIT* RMH4BL hybrid thermal transfer ribbon

B2. Cable Accessories

B3. Stainless Steel Ties

C1. Wiring Duct

### Material/Print Method Selection Guide

| Material                                     | Print Method         | Temperature Range               | Features   |
|--|----------------------|---------------------------------|--|
| Self-Laminating TEDLAR®, White Print-On (TA) | Thermal Transfer (1) | -40°F to 275°F (-40°C to 135°C) | Indoor/outdoor rated; self-extinguishing; ideal for wire and cable labeling in harsh environments.   |
| Self-Laminating Vinyl, White Print-On (VA)   | Thermal Transfer (T) | -40°F to 200°F (-40°C to 93°C)  | Indoor/outdoor rated; thin and conformable; preferred material for most general wire/cable labeling. |

Order number of labels required in multiples of Std. Pkg. Qty.

Use with *PANDUIT* thermal transfer hybrid or wax ribbons.

Labels are roll mounted on 3.00" cores; when using the TDP43MY printer and 3.00" cores, the roll stand (TDP43M-RS) is required.

\*TEDLAR is a registered trademark of E.I. du Pont de Nemours and Company.  
 Order number of labels required in multiples of Std. Pkg. Qty.  
 Use with PANDUIT thermal transfer hybrid or wax ribbons.  
 Labels are roll mounted on 3.00" cores; when using the TDP43MY printer and 3.00" cores, the roll stand (TDP43M-RS) is required.

\*TEDLAR is a registered trademark of E.I. du Pont de Nemours and Company.  
 Order number of labels required in multiples of Std. Pkg. Qty.  
 Use with *PANDUIT* thermal transfer hybrid or wax ribbons.  
 Labels are roll mounted on 3.00" cores; when using the TDP43MY printer and 3.00" cores, the roll stand (TDP43M-RS) is required.

## Thermal Transfer Marker Plates

- Non-adhesive marker plates offer crisp, clear legends with superior legibility
- Attachable in a horizontal or vertical orientation
- Available in a variety of colors and sizes
- Use with *PANDUIT* RMR4BL resin thermal transfer ribbon

### Material/Print Method Selection Guide

| Material                | Print Method         | Temperature Range              | Features  |
|-------------------------|----------------------|--------------------------------|---|
| Vinyl Cloth, White (CB) | Thermal Transfer (T) | -50°F to 170°F (-46°C to 77°C) | Indoor/outdoor rated; thin conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces; resists oil and abrasion. |

Order number of labels required in multiples of Std. Pkg. Qty.  
 Use with *PANDUIT* thermal transfer hybrid or wax ribbons found on page E1.14.  
 \*Labels are roll mounted on 3.00" cores; when using the TDP43M printer and 3.00" cores, the roll stand (TDP43M-RS) is required.

## Thermal Transfer Commercial Grade Heat Shrink Labels

- Labels offer crisp, clear legends with superior legibility
- Meets UL Standard 224 for flammability and UL Standard 2043 suitable for use in air handling spaces
- Shrink ratio 3:1
- Pre-cut flattened polyolefin is both thermal transfer and dot matrix printable and supplied roll mounted on plastic carrier
- **PANDUIT** labeling software packages include all label formats for quick and easy label production

### Part Number System for Heat Shrink Labels

### Material/Print Method Selection Guide

| Material  | Print Method         | Temperature Range                  | Features  |
|---|----------------------|------------------------------------|---|
| Heat Shrinkable Polyolefin, White (F1)<br>Yellow (F2) | Thermal Transfer (T) | -22°F to 220°F<br>(-30°C to 105°C) | Durable flattened polyolefin, high quality heat shrink wire/cable labels. |

Order number of rolls required.

## Thermal Transfer Military Grade Heat Shrink Labels

- Labels offer crisp, clear legends with superior legibility
- Meets UL Standard 224 for flammability and AMS-DTL-23053/5C (Class 1 and Class 3)
- Will meet MIL-M-81531, MIL-STD202F, and MIL-STD-883E when printed with RMH4BL or RHH4BL-S ribbons
- Shrink ratio 3:1
- Pre-cut flattened polyolefin is both thermal transfer and dot matrix printable and supplied roll mounted on plastic carrier
- PANDUIT labeling software packages include all label formats for quick and easy label production

### Part Number System for Heat Shrink Labels

### Material/Print Method Selection Guide

| Material  | Print Method         | Temperature Range                  | Features  |
|---|----------------------|------------------------------------|---|
| Heat Shrinkable Polyolefin, White (H1)<br>Yellow (H2) | Thermal Transfer (T) | -67°F to 275°F<br>(-55°C to 135°C) | Durable flattened polyolefin, high quality heat shrink wire/cable labels. |

| Part Number   | Part Description                              | Width |       | Length |       | Min. Cable |      | Max. Cable O.D. |      | Std. Pkg. Qty. |

Order number of rolls required.

### UL LISTED SP Heat Shrink Tools and Accessories

- Adjustable air intake regulator provides variable temperature adjustment within the units rated heat range
- Toggle type control switch provides hot/cold/off operation
- Replaceable brushes are easy to service and extend the operating life of the gun
- Unique suspended quick change heating element design prolongs life and eases servicing

| Part Number         | Part Description   | Std. Pkg. Qty. | Std. Ctn. Qty. |
|---------------------|--|----------------|----------------|
| <b>HSG-115V-650</b> | Heat gun with temperature range of 650°F (344°C) to 900°F (482°C).   | 1              | —              |
| <b>HSG-A1</b>       | Shrink tube reflector for tubing up to 3/4" inside diameter. Directs heat around tubing to reduce shrink time.   | 1              | 10             |
| <b>HSG-A2</b>       | Shrink tube reflector for tubing up to 1 1/2" inside diameter. Directs heat around tubing to reduce shrink time. | 1              | 10             |
| <b>HSG-A3</b>       | Shrink tube concentrator. Directs heat toward tubing and away from heat sensitive items.                         | 1              | 10             |
| <b>HSG-A4</b>       | Black polyethylene case stores heat gun, stand, and all three accessories.                                       | 1              | —              |
| <b>HSG-P1</b>       | Replacement brush/spring kit.  | 1              | 5              |
| <b>HSG-P2</b>       | Replacement switch 20 Amps.  | 1              | 5              |
| <b>HSG-P3</b>       | Replacement bearing kit.   | 1              | 5              |
| <b>HSG-P7</b>       | Replacement heat element 650°F.  | 1              | —              |

## Thermal Transfer Component Labels

- Labels offer crisp, clear legends with superior legibility
- Available in polyester, vinyl cloth, and polyimide materials and supplied on rolls

- Designed for use with thermal transfer desktop printers, including the TDP43MY and TDP42HY printers
- *PANDUIT* labeling software packages include all label formats for quick and easy label production

## Part Number System for Component Labels

### Material/Print Method Selection Guide

| Material                | Print Method         | Temperature Range                  | Features  |
|-------------------------|----------------------|------------------------------------|---|
| Polyester, White (YJ)   | Thermal Transfer (T) | -40°F to 302°F<br>(-40°C to 150°C) | Indoor/outdoor rated; provides durability, high temperature resistance and dimensional stability; does not stretch or easily tear.  |
| Paper, White (PB)       |                      | -65°F to 200°F<br>(-54°C to 93°C)  | Indoor rated; general purpose material; excellent adhesion properties when applied to a clean dry surface.  |
| Polyimide, White (KB)   |                      | -40°F to 350°F<br>(-40°C to 177°C) | Indoor rated; ideal for electronic components and internal circuitry applications; material is intended for applications requiring solvent and high temperature resistance performance, such as the wave solder process.  |
| Vinyl Cloth, White (CB) |                      | -50°F to 170°F<br>(-46°C to 77°C)  | Indoor/outdoor rated; thin conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces; resists oil and abrasion. |

Order number of rolls required.

Use with *PANDUIT* thermal transfer ribbons.

‡Labels roll mounted on 3.00" cores; when using the TDP43MY printer and 3.00" cores, the roll stand (TDP43M-RS) is required.

Overview

## Dot Matrix Self-Laminating Labels

B1.  
Cable Ties

- High quality, economical solution for wire/cable labeling
- Meets UL 2043 suitable for use in air handling spaces
- Self-laminating labels include a colored print-on area and clear overlaminates to protect the legend for clear and durable identification

- Available in vinyl and TEDLAR® material and supplied on pin fed sheets
- PANDUIT labeling software packages include all label formats for quick and easy label production

### Material/Print Method Selection Guide

| Material                                     | Print Method   | Temperature Range                 | Features   |
|--|----------------|-----------------------------------|--|
| Self-Laminating Vinyl, White Print-On (VA)   | Dot Matrix (D) | -40°F to 200°F<br>(-40°C to 93°C) | Indoor/outdoor rated; thin and conformable; preferred material for most general wire/cable labeling. |
| Self-Laminating TEDLAR®, White Print-On (TA) | Dot Matrix (D) | 0°F to 275°F<br>(-18°C to 135°C)  | Indoor/outdoor rated; self-extinguishing; ideal for wire/cable labeling in harsh environments.       |

A. System Overview

## Dot Matrix Non-Laminated Labels

B1. Cable Ties

- High quality, economical solution for wire/cable labeling
- Use as a wrap-around label or flag style marker for wire/cable labeling

- Available in vinyl cloth material and supplied on pin fed sheets
- **PANDUIT** labeling software packages include all label formats for quick and easy label production

### Material/Print Method Selection Guide

| Material                | Print Method   | Temperature Range                 | Features   |
|-------------------------|----------------|-----------------------------------|--|
| Vinyl Cloth, White (CB) | Dot Matrix (D) | -50°F to 170°F<br>(-46°C to 77°C) | Indoor/outdoor rated; thin conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surface. |

## PRE-PRINTED AND WRITE-ON MARKERS

PANDUIT offers a variety of pre-printed and write-on marker solutions in multiple formats to meet your specific requirements.

- Marker books are a convenient pocket-sized method to identify many electrical and network components
- Marker cards are available in a variety of legends and combination packs
- Dispensers are available in both pre-printed and write-on formats for quick identification of wire/cable
- Clip-on markers provide a fast, convenient, non-adhesive method to identify wire/cable

PANDUIT offers a variety of innovative books, cards, clip-ons and dispensers to provide you with the wire/cable label that best fits your needs.

### Material Chart

| Material           | Print Method | Temperature Range              | Features   |
|--------------------|--------------|--------------------------------|--|
| Vinyl Cloth, White | Pre-Printed  | -50°F to 170°F (-46°C to 77°C) | Indoor/outdoor rated; conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces; resists oil and abrasion. |

### Perforation for half marker

Legend: Black Background: White

Marker sizes:

Full size marker – .22" x 1.38" (5.60mm x 34.90mm). Maximum wire O.D., .38" (9.50mm).

Half size marker – .22" x .69" (5.60mm x 17.40mm). Maximum wire O.D., .19" (4.70mm).

Terminal block marker – .22" x .25" (5.60mm x 6.30mm).

## Pre-Printed Marker Books – Self-Laminating

- Clear section of marker overlaminates and protects printed legend
- Ten pages of markers per book

### Material Chart

| Material                              | Print Method | Temperature Range              | Features  |

| PCMCP-A-Z**    | A thru Z     | 1 each           |                  | 36             | 1              |

Marker size:

Full size marker – 1.50" (38.10mm). Maximum wire O.D., .38" (9.50mm).

\*One card each number, 25 cards per package.

\*\*One card each letter, 26 cards per package.

## Pre-Printed Marker Cards

- Choose from the many legends available in general purpose vinyl cloth, or from special materials available to meet a variety of application environments
- All markers are offered in full size – 1.50" (38.1mm) long for wire outside diameter up to 0.38" (9.5mm); half size markers for wire outside diameter up to 0.19" (4.7mm) can be ordered
- Each marker on card has a different legend

## Pre-Printed Marker Tape Dispenser

- Flexible polyester marker tape conforms tightly to wires/cables
- Dispenser allows marker tape to be cut to the exact length required for marking any size wire/cable
- Durable plastic dispenser can be attached to tool belt for industrial use

### Material Chart

| Material         | Print Method | Temperature Range                  | Features  |
|------------------|--------------|------------------------------------|---|
| Polyester, White | Pre-Printed  | -40°F to 250°F<br>(-40°C to 121°C) | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light chemical atmosphere and abrasion; excellent life and adhesion properties. |

| Part Number | Part Description  | Roll |     | Rolls Per Legend Per Pkg. | Std. Pkg. Qty. | Std. Ctn. Qty. |

## Self-Laminating Wire Marker Dispenser

- Self-laminating labels are provided in handy dispenser which protects markers when not in use
- Clear section of marker overlaminates and protects write-on legend
- Quick, easy to use for smaller installations and maintenance

### Material Chart

| Material                              | Print Method | Temperature Range              | Features   |
|---------------------------------------|--------------|--------------------------------|--|
| Self-Laminating Vinyl, White Print-On | Pre-Printed  | -40°F to 150°F (-40°C to 66°C) | Indoor/outdoor rated; thin and conformable; preferred material for most general wire/cable labeling. |

| Part Number          | Part Description   | Width |       | Length |       | Print-On Height |       | Min. Cable O.D. |      | Max. Cable O.D. |       | Std. Pkg. Qty. | Std. Ctn. Qty. |

Can be clearly identified with PANDUIT permanent marking pens shown on page E5.19.

## Pre-Printed Clip-On Wire Markers

- Non-adhesive markers grip tightly to wire/cable
- Markers supplied on application wand tool
- Chevron cut keeps multiple markers aligned
- Black legend is embossed into wire marker clip

### Material Chart

| Material            | Print Method | Temperature Range              | Features   |
|---------------------|--------------|--------------------------------|--|
| Non-Adhesive Acetal | Pre-Printed  | -22°F to 194°F (-30°C to 90°C) | Indoor/outdoor rated; durable material that has excellent resiliency to oils and solvents. |

## PERMANENT IDENTIFICATION

PANDUIT offers the widest range of permanent identification solutions in the industry to withstand the test of time and provide legibility in harsh environments. Safe, quick, and easy to install, PANDUIT permanent identification solutions include stainless steel and aluminum marker plates, tags, marking tools and ties to deliver improved productivity and workplace safety.

- Factory Custom Marking Service creates embossed or laser etched metal plates, tags, and ties to speed installation time and reduce labor costs
- Portable on-site marking tools for quick and easy identification on demand
- Large identification selection delivers maximum design flexibility to match your specific application requirements
- Optimized for easy use with PANDUIT self-locking stainless steel and aluminum ties; for details, refer to PAN-STEEL® System Section B3

PANDUIT continues to design permanent identification products for harsh environments by addressing customer problems with innovative solutions and reliable tooling to achieve lowest installed cost.

## PANDUIT Factory Custom Marking Service

B1. Cable Ties

PANDUIT Factory Custom Marking Service simplifies identification with high quality, made-to-order custom embossed marker plates and tags or laser etched cable ties, marker plates, and tags. PANDUIT offers rapid direct shipment with fast turn around on custom marking orders worldwide. Work with PANDUIT to create an effectively identified workplace.

B2. Cable Accessories

B3. Stainless Steel Ties

### EMBOSSING SERVICE

- Used on rectangular metal marker plates and tags which are a maximum of .020 inches (.5mm) thick and minimum .38 inches (10mm) width
- Excellent for applications that are exposed to dirt and paint
- Upper case "raised" character
- Alphanumeric and sequential numbering

C1. Wiring Duct

C2. Surface Raceway

C3. Abrasion Protection

C4. Cable Management

### To select and order custom embossed marker plates and tags:

- Use online order form (C2-0677) at [www.panduit.com/permanentID](http://www.panduit.com/permanentID) to select the proper marker plate or tag for your application. Email order form to your Authorized PANDUIT Distributor for order placement or contact PANDUIT Customer Service for assistance.

### LASER MARKING SERVICE

- Used on all metal marker plates, tags, and cable ties
- BOLD block letters
- Upper and lower case character capability
- Ability to create text and graphics
- Alphanumeric and sequential numbering

### To order laser etched plates and tags – Contact PANDUIT

#### Character sizes available:

- 1/8" (3.18mm)
- 3/16" (4.77mm)
- 1/4" (6.35mm)
- 5/16" (7.94mm)
- 1/2" (12.7mm) – Laser only

PANDUIT offers a full line of labeling products, software and printers to assist you with your labeling requirements.

See pages E1.0 – E2.30.

PANDUIT permanent identification products are optimized for easy use with PANDUIT self-locking stainless steel and aluminum ties. For details, refer to PAN-STEEL® System Section B3.

## Stainless Steel and Brass Marker Plates and Tags

- Provides permanent identification of pipes, conduit, valves, cables and equipment in harsh environments
- Designed for use with *PANDUIT® PAN-STEEL®* Stainless Steel Cable Ties for fast installation at lowest installed cost
- All marker plates/tags can be embossed or laser etched with *PANDUIT* Factory Custom Marking Service
- For on-site custom marking use the *PANDUIT* Metal Indenting Machine (MIM) for details, see page E4.6
- Designated plates feature easy feed design with a raised slot to simplify cable tie installation and improve productivity

## PAN-ALUM™ Aluminum Marker Plates

- Lightweight, aluminum construction for flexibility and ease of handling
- Five color options in addition to natural aluminum provide quick visual identification, ideal for applications requiring color-coding

- Easy feed marker plate design includes a raised slot to simplify cable tie installation and improve productivity

| Part Number   | Material          | Color   | Length |      | Width |      | Custom Marking Parameters*              |            | Used with PAN-ALUM™ Cable Ties                   | Std. Pkg. Qty. | Std. Ctn. Qty. |

## Metal Embossing Tool and Tape System

- Creates custom length identification
- Embosses 3/16" (4.77mm) characters onto stainless steel or aluminum tape

- Ability to create a raised cable tie slot for fast installation

| Part Number     | Part Description  | Std. Pkg. Qty. |
|-----------------|---|----------------|
| <b>Tool Kit</b> |   |                |
| <b>MEHT</b>     | Includes tool, carrying case, one roll each META (aluminum) and METS4 (stainless steel) tape.<br><br>Characters include:<br>A B C D E F G H I J K L M N O P Q R S T U V W X Y Z 2 3 4 5 6 7 8 9 . - | 1              |
| <b>Tape</b>     |   |                |
| <b>META-X</b>   | .50" x 16' (12.7mm x 4.9m) aluminum tape*.  | 10             |
| <b>METS3-X</b>  | .50" x 21' (12.7mm x 6.4m) 316 grade stainless steel tape.  | 10             |
| <b>METS4-X</b>  | .50" x 21' (12.7mm x 6.4m) 304 grade stainless steel tape.  | 10             |

\*Aluminum ties are recommended for use with aluminum tape to prevent galvanic reaction (corrosion that can occur between stainless steel and aluminum in certain environments).

## LOCKOUT/TAGOUT

The Occupational Safety and Health Administration (OSHA) mandates that all energy sources be isolated and locked out to protect employees from injuries caused by the accidental startup of equipment under repair or service. OSHA 1910.147 outlines the control of this hazardous energy with an effective lockout/tagout program. *PANDUIT* offers a complete line of lockout/tagout products to aid in compliance with OSHA 1910.147 including:

- Training manuals and videos to help train employees on the requirements of lockout/tagout
- Extensive line of universal, high quality devices to lockout a variety of energy sources
- Lockout/tagout kits and stations that offer a convenient method to store and contain lockout devices, tags, and padlocks
- High quality, durable, secure padlocks in a variety of styles, colors, and keying configurations that ensure safety and security
- Extensive line of safety identification products that include tags, signs, and warning labels

*PANDUIT* offers everything you need to establish and maintain an effective lockout/tagout program. Ensure employee safety while conducting lockout/tagout procedures by utilizing *PANDUIT* innovative products and high quality materials.

## OSHA Lockout/Tagout Compliance Manual

• Takes you step-by-step through the process of bringing your company into compliance with OSHA Standard 1910.147; topics in the manual include background, scope, and purpose of the regulation

- This complete package includes:
  - Instructions for writing a company lockout/tagout policy
  - Establishing lockout/tagout procedures for equipment
  - Implementing a lockout/tagout training program
  - Forms, sample programs, and procedures to administer your program

| Part Number    | Part Description                       | Std. Pkg. Qty. |

## Lockout/Tagout Regulations Training Video and Handbooks

• “A Life is on the Line” Lockout/Tagout Training Program (English or Spanish) is designed to protect your employees and assist in compliance with OSHA lockout/tagout general requirements quickly, easily, and at low cost

- This complete package includes:
  - Lockout/tagout video
  - Participant guides with quizzes
  - Certificate of completion cards
  - Leader’s guide complete with quiz key
  - Training log
  - Lockout/tagout samples
  - *PANDUIT* lockout/tagout bulletin

## Group Lockout/Tagout Training Video

• “Your Lock is Your Key to Life” Training Program provides thorough instruction on OSHA recommended safety practices and procedures for group lockout – multi-craft/multi-shift lockout operations

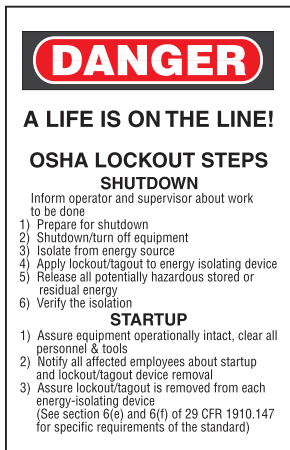

- This complete package includes:
  - Group lockout/tagout video
  - Participant guides with quizzes
  - Certificate of completion cards
  - Leader’s guide complete with quiz key
  - Training log
  - Lockout/tagout samples
  - *PANDUIT* lockout/tagout bulletin

## Circuit Breaker Lockout Devices

- Individual circuit breakers can be locked in the off position quickly and easily
- Compact, universal design fits a wide range of single, double, and triple handle circuit breakers
- Accommodates breaker handles .30 – .60 inches (7.62mm – 15.24mm) tall and .25 – .44 inches (6.35mm – 11.18mm) thick
- Easily attached with no modifications to panel or circuit breaker and does not require hole in circuit breaker handle
- Constructed of rugged nylon and stainless steel, providing strength, durability, added security and corrosion resistance

| Part Number | Part Description   | Std. Pkg. Qty. | Std. Ctn. Qty. |

## “No Tool” Circuit Breaker Lockout Devices

- Individual circuit breaker can be locked in the off position quickly and easily without any tools
- Compact, universal design fits a wide range of single, double, and triple handle circuit breakers
- Accommodates breaker handle sizes ranging from .30 – .60 inches (7.62mm – 15.24mm) tall and .16 – .35 inches (4.06mm x 8.89mm) thick
- Easily attached with no modifications to panel or circuit breaker and does not require holes in circuit breaker handle
- Constructed of rugged nylon and stainless steel providing strength, durability, added security and corrosion resistance

## Large Handle Circuit Breaker Lockout Device

B1.  
Cable Ties

- Individual circuit breakers can be locked in the off position quickly and easily without any tools
- Easily attached with no modifications to panel or circuit breaker
- Compact, universal design fits a wide range of large handle circuit breakers
- Constructed of rugged nylon and stainless steel providing strength, durability, added security and corrosion resistance

B2.  
Cable  
Accessories

- Accommodates breaker handle dimensions up to .80 inches thick x 3.00 inches wide (20.32mm x 76.20mm)

| Part Number    | Part Description                      | Std. Pkg. Qty. | Std. Ctn. Qty. |

## Receptacle Blockout Device

- Accommodates standard 120 V electrical receptacles
- Blockout receptacles to prevent equipment damage from overloading circuits or electrical interference

- Constructed of high density polyethylene providing strength, durability, and added security

| Part Number | Part Description                          | Std. Pkg. Qty. | Std. Ctn. Qty. |

| PSL-ERB     | Blockout for 120 V electrical receptacle. | 1              | 25             |

## Toggle Switch Lockout Device

- Compact secure design fits most toggle switches and some small circuit breakers
- Easily attached without removal of faceplate or screws

- Accommodates switches .45 – .78 inches (11.43mm – 19.81mm) tall x .25 – .38 inches (6.35mm – 9.65mm) wide x .25 – .40 inches (6.35mm – 10.16mm) thick
- Constructed of rugged nylon and stainless steel providing strength, durability, added security and corrosion resistance

| Part Number | Part Description       | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|------------------------|----------------|----------------|
| PSL-WS      | Toggle switch lockout. | 1              | 10             |

## Toggle/Rocker Switch Lockout Device

- Toggle/rocker switches controlling electrical supply can be locked out
- Accommodates standard wall switch faceplates
- Install using faceplate screws

- Constructed of rugged polypropylene providing strength, durability, and added security

| Part Number | Part Description              | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|-------------------------------|----------------|----------------|
| PSL-WS1A    | Toggle/rocker switch lockout. | 1              | 10             |

## Gate Valve Lockout Devices

- Gate valves regulating hydraulic, pneumatic, and chemical energy can be locked out quickly and easily
- Accommodates valve handles ranging from 1.00 inch (25.40mm) to 13.00 inches (330.20mm) in diameter

- Constructed of rugged polypropylene providing strength, durability, and added security

| Part Number | Part Description  | Std. Pkg. Qty. | Std. Ctn. Qty. |

## Pneumatic Energy Lockout Device

E3. Pre-Printed & Write-On Markers

- Pneumatic energy devices can be locked out quickly and easily without costly tool modifications or inconvenient in-line valves
- When installed on the male pneumatic fitting, prevents the ability to engage into the female fitting
- Universal compact design makes the pneumatic lockout device easy to transport and install on almost any fitting, even in tight spaces
- Rugged stainless steel construction offers superior strength, durability, added security and corrosion resistance

## Jack Module Blockout Device

- Blocks unauthorized access to jacks and potentially harmful foreign objects, saving time and money associated with data security breaches, network downtime, repair and hardware replacement
- Compatible with most RJ45 jacks to accommodate a variety of applications and does not interfere with jack contacts

- Can be installed/removed without interfering with adjacent jacks or hardware
- May only be released with the special removal tool, ensuring the safety and security of your network infrastructure

\*Available in bulk packages of 100 devices and five removal tools. To order bulk package add -C to the suffix of part number.

## RJ45 Plug Lockin Device

- Tamper-resistant design blocks unauthorized removal of cable, IP phone, other networking equipment or critical connection

- Deters unauthorized users from moving or stealing VoIP phones helping to maintain E911 service
- Compact design does not interfere with adjacent jacks, even in high-density applications

| Part Number   | Part Description  | Color               | Std. Pkg. Qty. | Std. Ctn. Qty. |

## Metal Wall Mount Cabinet

- Conveniently store lockout tools and accessories in one common area

- Durable steel case can be wall-mounted (nine mounting holes) or used as a portable case
- 14.75" x 10.25" x 4.63" (375.00mm x 260.00mm x 117.00mm)

## Group Lock Box

- Manage multiple employees and energy sources involved in a group lockout procedure
- Accommodates up to thirteen padlocks (not included)

- Industrial powder coated steel construction
- Dimensions: 9.00"W x 6"H x 3.25"D (228.60mm x 152.40mm x 82.55mm)

A. System Overview

## Warning Label

B1. Cable Ties

- Warning label prohibits tampering with push buttons during repair or service
- Write-on area for adding your own warning message
- Made of vinyl cloth material that allows label to be removed easily after repairs are completed
- Features the international prohibition symbol for “Do Not Throw Switch”

B2. Cable Accessories

B3. Stainless Steel Ties

### Material Chart

| Material           | Print Method | Temperature Range              | Features  |
|--------------------|--------------|--------------------------------|---|
| Vinyl Cloth, White | Pre-Printed  | -50°F to 170°F (-46°C to 77°C) | Indoor/outdoor rated; thin conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces. |

## Circuit Breaker Directory Sign

D2. Power Connectors

- Adhesive paper sign designed to provide clear identification of circuit breaker connections, list up to 40 circuits
- Eliminate the guesswork when identifying power sources – a must for lockout/tagout compliance

D3. Grounding Connectors

### Material Chart

| Material | Print Method | Temperature Range              | Features  |
|----------|--------------|--------------------------------|---|
| Paper    | Pre-Printed  | -65°F to 200°F (-54°C to 93°C) | Indoor rated; general purpose material; excellent adhesion properties when applied to a clean, dry surface. |

These locks are not suitable for custom engraving.  
See Custom Lock Options on page E5.20.

## Value Line Padlocks

- Economical padlock has laminated steel body with case hardened, corrosion resistant steel shackle, and double steel ball locking system
- Each lock keyed differently and supplied with two keys and colored padlock label
- All locks have black bumpers and are supplied with color-coded self-laminating padlock labels
- .25 inches (6.00mm) diameter shackle

| Part Number                    | Color                 | Std. Pkg. Qty. |
|--------------------------------|-----------------------|----------------|
| <b>.75" (19.00mm) Shackle</b>  |                       |                |
| PSL-5BLK                       | Black padlock label.  | 6              |

| PSL-5RED-LS                    | Red padlock label.    | 6              |

These locks not suitable for custom engraving and cannot be master keyed or keyed alike.  
Labels are designed with blank write-on area for name and department designation and can be clearly identified with PANDUIT permanent marking pens on page E5.20.

## Lockout Hasps

- Energy sources can be locked out quickly and easily by more than one worker for group lockout applications
- Heavy duty hasps with tamper-resistant designs to deter vandalism
- Variety of lockout hasp styles and sizes to accommodate a wide range of lockout applications

| Part Number | Part Description   | Max. No. Locks | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|--|----------------|----------------|----------------|
| PSL-MLD     | Multiple lockout device; includes lockout hasp and 6.0' (1.8m) vinyl coated galvanized steel cable with loop-hole. | 6              | 1              | 20             |

## Self-Laminating Padlock Labels

- Used to identify employees' locks; employees sign the label, attach it to the padlock, and overwrap with the clear vinyl to protect the legend
- Available in six colors for departmental coding
- One-piece design is easy to use

| Part Number | Color  | Width |        | Height |       | Std. Pkg. Qty. | Std. Ctn. Qty. |
|-------------|--------|-------|--------|--------|-------|----------------|----------------|
|             |        | In.   | mm     | In.    | mm    |                |                |
| PSL-PL1BLKY | Black  | 10.00 | 254.00 | .75    | 19.00 | 25             | 150            |

Labels are designed with blank write-on area for name and department designation and can be clearly identified with *PANDUIT* permanent marking pens.

## Custom Lock Options

Padlocks are available with the following common lock options:

- Master keyed
- Keyed-alike
- Variety of lock sizes and shackle lengths
- Engraving available on PSL-4 Safety Lockout and PSL-11 High Security Padlocks

**Note:** Excludes PSL-5 Value Line Padlocks.

## Padlock Eyes

C3.  
Abrasion  
Protection

- Padlock eyes assist with compliance to OSHA standards requiring that equipment be modified to accept locks and lockout devices
- Surface mounted eyes are made of .13 inches (3.00mm) hard wrought steel
- Tamper resistant inside mounting eyes – 2.50 inches W (64.00mm), accept shackle diameters up to .63 inches (16.00mm)

## Write-On Safety Tags

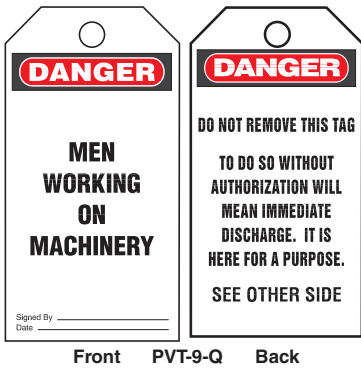

- Meet OSHA Standard 1910.147 requirements for tagout applications
- Semi-rigid plastic tags are 3.00"W x 5.75"H (76.00mm x 146.00mm) with a .38" (9.00mm) brass grommet for greater strength and increased durability

- Tags can be attached with a lockout device or with a *PANDUIT* PLT2S nylon tie (50 lb. loop tensile strength) supplied with each tag
- PVT-\* Package consists of five tags and five cable ties
- PVT\*-Q Package consists of 25 tags and 25 cable ties
- Can be clearly identified with *PANDUIT* permanent marking pens

## Lockout/Tagout Safety Signs

### Indoor/Outdoor Sub-Surface Printed Adhesive Polyester (Type PPS)

- High quality signs for use indoors and outdoors
- Excellent resistance to UV light, chemical atmosphere, and abrasion
- Excellent life and adhesion properties
- Printed graphics are protected by clear polyester laminate

### Indoor/Outdoor Rigid Polyethylene (Type PRS)

- Rugged signs for indoors and outdoors
- Abrasion resistant
- Used where adhesives will not work

### Indoor Adhesive Vinyl (Type PVS)

- Economical general purpose signs for use in most environments
- Very good adhesive properties when applied to a clean, dry surface

## SAFETY AND FACILITY IDENTIFICATION

PANDUIT offers a full line of safety and facility identification products to ensure employee safety with an effectively identified workplace.

- Safety signs and labels offered in a variety of materials, colors, sizes and legends
- Voltage markers in adhesive and snap-on style
- Utility tapes in a variety of materials, colors, sizes and legends
- Letters and numbers in a variety of materials and sizes
- Tags in a variety of materials, colors, sizes and legends

PANDUIT safety and facility identification products are designed to assist you with creating a safe, compliant, and efficient workplace.

^ Can be clearly identified with PANDUIT permanent marking pens.

## Short Circuit Warning Signs

- Aids in compliance with UL 508A requirement

PPS0305W2200  
PPS0507W2200

### Material Chart

| Material        | Print Method | Temperature Range               | Features  |
|-----------------|--------------|---------------------------------|---|
| Polyester (PPS) | Pre-Printed  | -40°F to 275°F (-40°C to 135°C) | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light, chemical atmosphere, and abrasion; excellent life and adhesion properties. |

### Size Reference Chart

| Part Number | Width |        | Height |        | Signs Per Card |
|-------------|-------|--------|--------|--------|----------------|
|             | In.   | mm     | In.    | mm     |                |
| *0305*      | 5.00  | 127.00 | 3.00   | 76.20  | 5              |
| *0507*      | 7.00  | 177.80 | 5.00   | 127.00 | 5              |
| *0710*      | 10.00 | 254.00 | 7.00   | 177.80 | 1              |
| *1014*      | 14.00 | 355.60 | 10.00  | 254.00 | 1              |
| *1209*      | 9.00  | 228.60 | 12.00  | 304.80 | 1              |

\*Denotes the part numbers' prefix and suffix.

## Photoluminescent Safety Signs

- Used to mark egress routes, fire alarms, and fire equipment that is clearly visible for up to ten hours after power is lost
- Absorbs energy from ambient light and releases this energy in the form of a glow when power is lost
- *PANDUIT* Photoluminescent Signs meet or exceed the following safety standard specification for photoluminescent safety markings including: ASTM E 2072-00, ASTM E 2073-00, ASTM E 2030-99, DIN67510-1, IMO Resolution A.752.18, ISO/CD 15370, DIN 67510, UL 924, ASTM 162, ASTM 648, ASTM 662, MIL-L-3891 B,

## Electrical Symbols on Cards

### Material Chart

| Material    | Print Method | Temperature Range              | Features   |
|-------------|--------------|--------------------------------|--|
| Vinyl Cloth | Pre-Printed  | -50°F to 170°F (-46°C to 77°C) | Indoor/outdoor rated; conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces. |

| Part Number | Symbol | Description   | Marker Size |               | Markers Per Card | Std. Pkg. Card(s) | Std. Ctn. Card(s) |

## Photoluminescent Tapes – Thermal Transfer Printable

Normal Lighting

- Used to mark egress routes, fire alarms, and fire equipment that is clearly visible for up to ten hours after power is lost
- Absorb energy from ambient light and releases this energy in the form of a glow when power is lost
- Can be used in the *PANDUIT* thermal transfer desktop printers to create direction arrow tape, striped tape, or safety signs on demand
- *PANDUIT* Photoluminescent Tapes meet or exceed the following safety standard specification for photoluminescent safety markings including: ASTM E 2072-00, ASTM E 2073-00, ASTM E 2030-99, DIN67510-1, IMO Resolution A.752.18, ISO/CD 15370, DIN 67510, UL 924, ASTM 162, ASTM 648, ASTM 662, MIL-L-3891 B, NFPA 101 Life Safety Code, OSHA 1910.137

Black Light

### Material Chart

| Material                         | Print Method         | Temperature Range                  | Features  |
|----------------------------------|----------------------|------------------------------------|---|
| Polyester, Photoluminescent (Y2) | Thermal Transfer (T) | -40°F to 230°F<br>(-40°C to 110°C) | Indoor/outdoor rated; provides durability, high temperature resistance, and dimensional stability; does not stretch or easily tear; After power is lost, material emits glow that is clearly visible for up to ten hours. |

## Vinyl Cloth Letters and Numbers

### Material Chart

| Material                 | Print Method | Temperature Range              | Features  |
|--------------------------|--------------|--------------------------------|---|
| Vinyl Cloth, (PCL,PCLCP) | Pre-Printed  | -50°F to 170°F (-46°C to 77°C) | Indoor/outdoor rated; thin conformable material with repositionable adhesive allows label to be removed and reused or used in temporary applications; provides durability, high temperature resistance, and dimensional stability for rough or textured surfaces. |

| Part Number            | Legend               | Legend Height |       | Height |       | Width |       | Color (Legend/Background) | Markers Per Card | Std. Pkg. Card(s) | Std. Ctn. Card(s) |

## Sign Panels – Blank Space for Custom Messages

### Indoor/Outdoor Sub-Surface Printed Adhesive Polyester (Type PPS)

- High quality signs for use indoors and outdoors
- Excellent resistance to UV light, chemical atmosphere, and abrasion
- Excellent life and adhesion properties
- Printed graphics are protected by clear polyester laminate

### Indoor/Outdoor Rigid Polyethylene (Type PRS)

- Rugged signs for indoors and outdoors
- Abrasion resistant
- Used where adhesives will not work

- Can be used with *PANDUIT* Thermal Transfer Desktop Printers and *EASY-MARK™* Labeling Software to create your own custom signs
- Print your own legend on clear polyester tape with the TDP43MY Thermal Transfer Desktop Printer and adhere label to adhesive or non-adhesive sign panel
- Can also be used with *PANDUIT* Die Cut Letter and Numbers

**Material Chart**

| Material                 | Print Method | Temperature Range                   | Features  |
|--------------------------|--------------|-------------------------------------|---|
| Polyester (PPS)          | Pre-Printed  | -40°F to 275°F<br>(-40°C to 135°C)  | Indoor/outdoor rated; laminated label material protects legend from abrasion and chemicals; resistant to UV light, chemical atmosphere, and abrasion; excellent life and adhesion properties. |
| Rigid Polyethylene (PRS) |              | -105°F to 250°F<br>(-76°C to 121°C) | Indoor/outdoor rated; high quality, rugged material resistant to abrasion; use where adhesives will not work.   |

## Thermal Transfer Printable Arc Flash Labels

B1. Cable Ties

- Provide employees with the highest degree of safety through proper identification and communication
- Clearly visible and recognizable hazard information to communicate arc flash hazards present

- Labels are constructed of durable polyester designed to withstand UV exposure, outdoor use, water, abrasion
- Custom Arc Flash Hazard Labels can be printed using *PANDUIT* labeling software and desktop thermal transfer printers

## Laser Printable Adhesive Signs

- Signs can be printed with a standard laser printer
- Indoor polyolefin pressure sensitive signs with square corners on stay flat liner

- Signs are 8.50" x 11.00" (215.90mm x 279.40mm) in size
- 25 signs per package

### Generic Padlock Options

| Generic Lock Part Number | Description | Qty Min. 12/Lock Series | Notes (Colors, Key Numbers, Set Description) |
|--------------------------|-------------|-------------------------|--|
|--------------------------|-------------|-------------------------|--|

#### PSL-3 Laminated Steel Padlocks: (Select from red, yellow, blue, black, green or white bumper colors)

|              |   |  |  |
|--------------|---|--|--|
| GPSL-3KA     | Keyed Alike Padlock – 3/4" Shackle                  |  |  |
| GPSL-3LSKA   | Keyed Alike Padlock – 2" Shackle                    |  |  |
| GPSL-3MK     | Master Keyed Padlock – 3/4" Shackle                 |  |  |
| GPSL-3LSMK   | Master Keyed Padlock – 2" Shackle                   |  |  |
| GPSL-3MKEY   | Master Key for a PSL-3 Master Keyed Padlock         |  |  |
| GPSL-3KAMK   | Keyed Alike and Master Keyed Padlock – 3/4" Shackle |  |  |
| GPSL-3LSKAMK | Keyed Alike and Master Keyed Padlock – 2" Shackle   |  |  |

#### PSL-4 Safety Lockout Padlocks: (Select from red, yellow, blue, black, green, orange or teal body colors)

|              |  |  |  |
|--------------|--|--|--|
| GPSL-4KA     | Keyed Alike Padlock                              |  |  |
| GPSL-4LBKA   | Keyed Alike Padlock – Long Body                  |  |  |
| GPSL-4MK     | Master Keyed Padlock                             |  |  |
| GPSL-4BMK    | Master Keyed Padlock – Long Body                 |  |  |
| GPSL-4MKEY   | Master Key for a PSL-4 Master Keyed Padlock      |  |  |
| GPSL-4KAMK   | Keyed Alike and Master Keyed Padlock             |  |  |
| GPSL-4LBKAMK | Keyed Alike and Master Keyed Padlock – Long Body |  |  |

#### PSL-11 Coated Aluminum Padlocks: (Select from red, yellow, blue, black, green or orange body colors)

|                |   |  |  |
|----------------|---|--|--|
| GPSL-11KA      | Keyed Alike Padlock – 1" Shackle                  |  |  |
| GPSL-11LKSA    | Keyed Alike Padlock – 3" Shackle                  |  |  |
| GPSL-11MK      | Master Keyed Padlock – 1" Shackle                 |  |  |
| GPSL-11LSMK    | Master Keyed Padlock – 3" Shackle                 |  |  |
| GPSL-11MKEY    | Master Key for a PSL-11 Master Keyed Padlock      |  |  |
| GPSL-11KAMK    | Keyed Alike and Master Keyed Padlock – 1" Shackle |  |  |
| GPSL-11-LSKAMK | Keyed Alike and Master Keyed Padlock – 3" Shackle |  |  |

## Wire Size Selection Guide

To use this guide place your wire or cable in the appropriate circle to determine wire, outside diameter.

|                          |  |
|--------------------------|--|
| Diameter .10" (2.50mm)   |  |
| Diameter .20" (5.10mm)   |  |
| Diameter .28" (7.10mm)   |  |
| Diameter .54" (13.70mm)  |  |
| Diameter .94" (23.90mm)  |  |
| Diameter 1.40" (35.50mm) |  |
| Diameter 1.90" (48.30mm) |  |
| Diameter 2.40" (61.00mm) |  |

The charts below indicate the approximate cable outside diameter or various electrical and communication cables.

### Electrical Cables

| Size     | Approximate Wire Outside Diameter In. (mm) |              |              |               |
|----------|--|--------------|--------------|---------------|
|          | TF   | THW          | TW           | TFN/THHN/THWN |
| 18 AWG   | .11 (2.80)                                 | .11 (2.80)   | .11 (2.80)   | .09 (2.30)    |
| 16 AWG   | .12 (3.00)                                 | .12 (3.00)   | .12 (3.00)   | .10 (2.50)    |
| 14 AWG   | .13 (3.30)                                 | .16 (4.10)   | .16 (4.10)   | .10 (2.50)    |
| 12 AWG   | .15 (3.80)                                 | .18 (4.60)   | .18 (4.60)   | .12 (3.00)    |
| 10 AWG   | .17 (4.30)                                 | .20 (5.10)   | .20 (5.10)   | .15 (3.80)    |

# Searching by Part Numbers in this Catalog PDF

1. To search for a Part Number in this Catalog PDF, either press the Control key and the letter F (Ctrl-F) at the same time OR from the menu bar, select Edit, and then select Find/Change.

2. The screen will spit into two parts. In the first window on the right side, type in the part number you wish to find. For example, if you wish to find LCCF300-12H-6, type as shown. There is no need to be case sensitive in your typing.

3. When you are done typing, press the "Search" button.

If you want to be less precise in your search, and find all instances of similar part numbers, you could type in just part of the number. For example, if you want to find all the LCCF300 numbers, just type in LCCF300.

4. The right side of the screen, under "Results", will now display all occurrences of the part number. Select any of the choices to be taken to that page.

5. The left side of your screen will now show the page with the part number, and the part number will be highlighted (see below).

| Part Number    | Class K & M | Locomotive  | W    | B    | T    | L    | Code |      |        |
|----------------|-------------|-------------|------|------|------|------|------|------|--------|
| LCCF40-14BH-X  |             |             | 1.14 | 0.75 | 1.17 | 1.81 | 14   | 5.06 | Yellow |
| LCCF40-18DH-X  |             |             | 3.8  | 1.00 | 1.17 | 1.81 | 14   | 5.55 | Yellow |
| LCCF40-18H-X   | 40 AWG      | 40 AWG      | 3.8  | 1.75 | 1.17 | 1.81 | 14   | 4.30 | Yellow |
| LCCF40-12H-X   |             |             | 1.2  | 1.75 | 1.17 | 1.81 | 14   | 4.69 | Yellow |
| LCCF250-14BH-X |             |             | 1.14 | 0.75 | 1.28 | 2.24 | 17   | 5.88 | White  |

| LCCF750-38DH-3 |             |             | 3.8  | 1.00 | 2.17 | 3.00 | 32   | 5.45 | Orange |
| LCCF750-12H-3  |             | 777.7 kcmil | 1.2  | 1.75 | 2.17 | 3.00 | 32   | 6.39 | Orange |

6. To return to a full screen view, select the "Hide" button. To keep the "Search PDF" screen and search for more part numbers, select the "New Search" button (see below).

**Note:** An alternative is to look in the Part Number Index at the back of this PDF and find the part number manually, then manually scroll to the page indicated.

## CONTACT US

## Acrobat Alert "...may contain newer information than this viewer can support..."

When opening PDF documents on this disc, you may see this alert.

Check the **Do not show...** box and click OK. PDF files on this disc are formatted to be completely functional with Acrobat Reader version 5 or higher. As long as the PDF file opens, all required features will be available.

If you wish to upgrade to a newer version of Acrobat (now Adobe) Reader, click the Program Links button to the left.

[TOP](#)

## Links not working (Pop-Up Blockers)

Some links will open a new browser window. If you have a pop-up blocker installed in your browser, it may see new linked windows as pop-ups. Setting the blocker to allow pop-ups from this site (CD) should resolve this problem.

[TOP](#)

## Links not working / security alerts (Windows XP)

If you have installed Service Pack 2 (SP2) for Windows XP (Home or Professional) you are aware of the very high level of security enforced by the system. It is particularly aggressive in protecting you against "active links". Virtually every file on this CD has active links that allow you to move between pages and open other documents. As a result, some documents may seem to have links that don't work or pages that open blank. If this happens, look at the top of the web page for this alert:

Allow Blocked Content...

What's the Risk?

Information Bar Help

## Adobe Reader Application or Browser Options

When you install Acrobat Reader, it installs both an Application (stand-alone program) and a plug-in for your browser program(s). By default it will be configured to open PDF files in your Internet browser. You may setup Acrobat to open documents in either your browser window or to open them in the standard Reader application window.

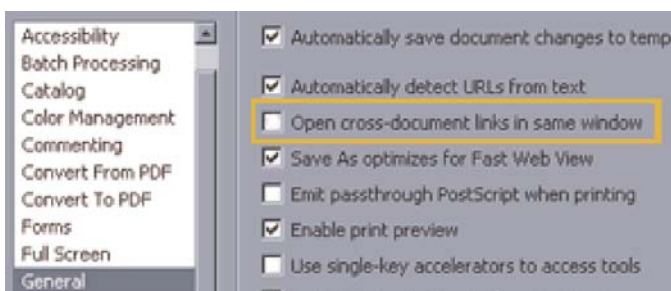

### What's the Difference?

| INTERNET BROWSER WINDOW   | APPLICATION WINDOW                                |
|---|---|
| ▶ Can have only one PDF Document open at a time                                     | ▶ Can have multiple documents open simultaneously |
| ▶ Search may be limited by support provided at the site of the PDF file             | ▶ Support for full Search of the site/CD contents |
| ▶ Potential security alert in Windows XP (SP2) everytime you link to a new document | ▶ No Security alerts                              |

This option can be easily changed in the Reader application. To open the application window, look for the Adobe icon on your Start menu or Desktop. This option can only be edited within the application. These instructions apply to version 5 through 7.

- Select Edit/Preferences
- From the list in the left pane select Internet
- Check "Display PDF in Browser" to have PDF file open in your Browser; uncheck it to have PDF files open in the Reader application.

[TOP](#)

The Reader application offers you the option of having links between documents open to replace the original window or open as a new window. While in the Preferences area of Reader, select the General option in the left pane.

Default (checked) is to have links open in the same window. Uncheck "Open cross-document links in same window" if you prefer to have links open in a new window.

## Bookmarks - Hyper Table of Contents

In very large PDF files, Acrobat bookmarks become a much faster and more convenient than searching through massive Table of Content listings.

Bookmarks can be toggled on or off by selecting the appropriate tab on the left side of the page.

Bookmarks contain nested listings so you can locate major categories, then drill down to specific products types.

Click the "+" or "-" in front of the listing to expand or collapse a category.

Click on a bookmark link at any level to jump to that specific location.

[TOP](#)

## Navigation / Page View Options

Acrobat enhances your experience in PDF catalogs with two sets of navigation buttons. The arrow buttons work just like the Next and Previous buttons in a web browser.

[TOP](#)

Page view buttons allow you to choose to view one page at a time or scroll so you can see portions of the bottom of one page and the top of the next.

Some pages, like Roadmaps in *PANDUIT* catalogs, are best viewed as spreads (side-by-side pages). You can choose this option with the page view buttons.

## Using Acrobat Find or Search

In Acrobat, Find and Search are distinct functions.

- Find scans the currently selected document for matches to your criteria
- Search can be configured to include one or multiple documents on a disc computer or server, then return results that appear in any of those documents.

### Acrobat Version 6 or 7

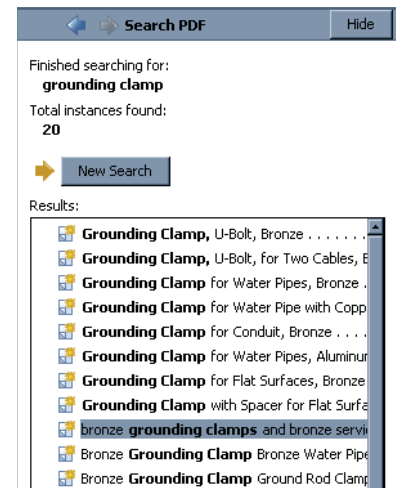

**Find** is accessed with the Ctrl+F key combo (Edit>Find). Type in the search criteria and click Next. If there are matches to your criteria, a page will appear with the results highlighted. Continuing to click Next or Previous changes pages and highlight locations.

Open **Search** by clicking the binocular button Search (Ctrl+Shift+F). The Search dialog offers the option of selecting locations to be included (1).

Enter your search criteria, click the search button.

### TOP

Results will appear as a list. Each item is an active link to that location in the document where it was found. Click a link to jump to that location.

## Optional Installation Programs & Links

PDF files on this optimized for use with Acrobat 5 or higher.

### Installing Acrobat / Adobe Reader

If you don't already have Acrobat Reader, it is always recommended that you download the most current version from the Adobe website. Click the logo under Third Party Links (below) to go the the download page. The name of the program was changed from Acrobat Reader to Adobe Reader starting with Version 6.x. The version on this CD is 7.0.5 (U.S. English, Windows only) and is made available for those who do not have ready access to the internet. To install from this disc, browse the CD folders and open Programs.

### Installation Cautions

Adobe strongly recommends that only one version of Reader be installed on any computer. Please uninstall previous versions before you install. Uninstalling a previous version after installing a newer one can also delete files required by the newer one.

### Free Third Party Links (if needed)

PANDUIT Web sites, CDs and DVDs may contain multimedia programs that require your computer to have one or more of the following programs or plugins installed. Selecting a file or link requiring one of these programs will alert you of the program required. All these programs are free by way of the Internet links below. If you frequent the Internet, you probably already have some or all of these programs installed.
