SCSI/Fibre Channel - External SCSI Adapter HD50M to DB25F

Highlights

Adapters convert older SCSI devices to work with newer SCSI installations
Perfect for upgrading mixed installations

Description

Tripp Lite's external SCSI II adapter has HD50M to DB25F connections. This adapter allows for the connection of mismatched SCSI peripherals. With these adapters you can save the time and expense of buying new cables by simply adapting your existing ones to interface with the connector types found on many of the newer model SCSI peripherals. Tripp Lite warrants this product to be free from defects in materials and workmanship for life.

System Requirements

Mismatched external SCSI devices

Package Includes

External SCSI Adapter HD50M to DB25F

Features

Allows adaptation of existing cabling

All Tripp Lite SCSI products, regardless of the SCSI generation, meet the latest specifications of ANSI

Tripp Lite offers a complete line of internal and external solutions for SCSI/RAID and fibre channel ranging from the very latest Ultra 320 to legacy SCSI-1 and every combination in between

Tripp Lite warrants this product to be free from defects in materials and workmanship for life
