0.5 mm Pitch, 2.55 mm above the board, Flexible Printed Circuit & Flexible Flat Cable ZIF Connectors

FH28 Series

Overview

Continuing market trends demand higher contact count connectors while maintaining high electrical/mechanical reliability, exact FPC/FFC positioning and durability.

Features

1. Precise FFC/FPC positionining

Large angle of the actuator opening and built-in side guides in the connector allow straight and exact insertion of the FPC/ FFC.

2. Rotating actuator

Proven rotating actuator system allows easy ZIF connection, confirming it with a definite tactile feel. The contact securely holds the actuator in place, providing reliable normal force. The unique contact configuration assures that the connector will remain dimensionally stable over the device's life.

3. Restricted space applications

Space-saving version has lower profile actuator and smaller front-to-back dimensions.

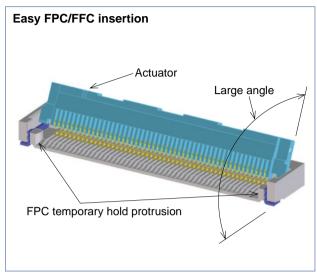

4. Standard FFC / FPC thickness

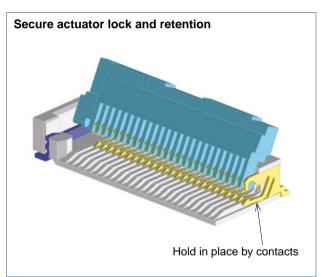

Reliable connection with the use of readily available 0.3 mm thick FFC/FPC.

- 5. Available in 40, 50, 55, 60, 64 and 80 contact positions. Contact HRS for other contact positions.
- 6. Board placement with automatic equipment Flat top surface and supplied on tape-and-reel the connectors can be easily placed on the PCB.

Applications

LCD, PDP, notebook computers, HDD, video and audio equipment, digital cameras, OA equipment and other devices requiring high reliability ZIF connection of FFC/FPC.

Product Specifications

Item	Specification	Conditions
1.Insulation resistance	500 MΩ min	100 V DC
2.Withstanding voltage	No flashover or insulation breakdown.	150 V AC /one minute
3.Contact resistance	50 mΩ max.	1 mA (DC or 1000Hz)
3.Contact resistance	* Including FPC/FFC conductor resistance	
4.Durability	Contact resistance: 50 mΩ max.	20 cycles
(insertion/ withdrawal)	No damage, cracks, or parts dislocation.	
	No electrical discontinuity of 1μ s or more.	Frequency: 10 to 55 Hz, single amplitude of 0.75
5.Vibration	Contact resistance: 50 mΩ max.	mm, 2 hours in each of the 3 directions.
	No damage, cracks, or parts dislocation.	
	No electrical discontinuity of 1μ s. min.	Acceleration of 981 m/s2, 6 ms duration, sine half-
6.Shock	Contact resistance: 50 mΩ max.	wave waveform, 3 cycles in each of the 3 axis.
	No damage, cracks, or parts dislocation.	
7 Llumiditu	Contact resistance: 50 mΩ max.	96 hours at temperature of 40℃ and humidity of
7.Humidity	Insulation resistance: 50 M Ω min.	90% to 95%.
(Steady state)	No damage, cracks, or parts dislocation.	
	Contact resistance: 50 mΩ max.	Temperature: -40°C→+15°C to+35°C→+85°C→+15°C to +35°C
8.Temperature cycle	Insulation resistance: 50 M Ω min.	Time: $30 \rightarrow 2$ to $3 \rightarrow 30 \rightarrow 2$ to 3 (Minutes)
	No damage, cracks, or parts looseness.	5 cycles
9.Resistance to	No deformation of components affecting	Reflow: At the recommended temperature profile
soldering heat	performance.	Manual soldering: $350^{\circ}C \pm 5^{\circ}C$ for 5 seconds

Note 1: Includes temperature rise caused by current flow.

Note 2: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non- conducting condition of installed connectors in storage, shipment or during transportation.

Note 3: When using FPC with gold plated contact traces, the connector contacts must be also gold plated: Select the (05) plating code specification.

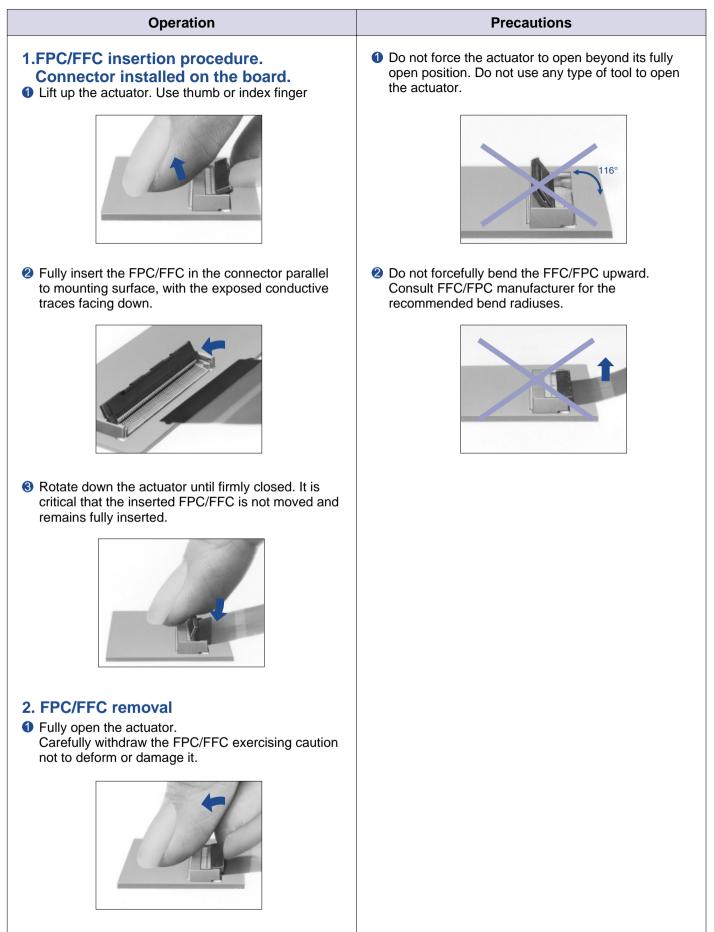

Materials / Finish

Part	Material	Finish	Remarks
Insulator	LCP	Color: Gray	UL94V-0
Actuator	LCP	Color: Black	UL94V-0
Contacts	Phosphor bronze	Gold or Tin-lead plated (Note 3)	
Metal fittings	Phosphor bronze	Tin plated (Lead free)

Operation and Precautions

Connector Dimensions

Standard type

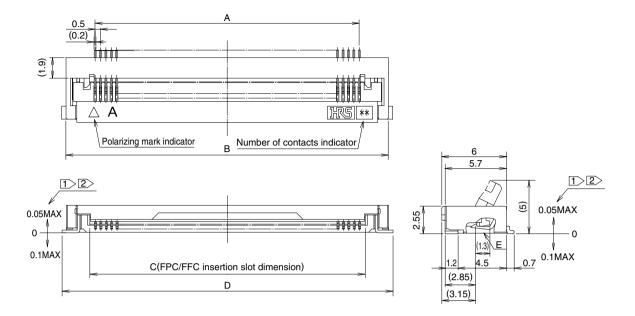

Notes

- \square The coplanarity of each terminal lead is within 0.1.
- 2 The contact terminal lead position indicates the dimension from the E surface, the bottom surface of the insulator body.
- 3 Slight variations in color of the plastic compounds do not affect form, fit or function of the connector.

						Unit: mm

Recommended Temperature Profile

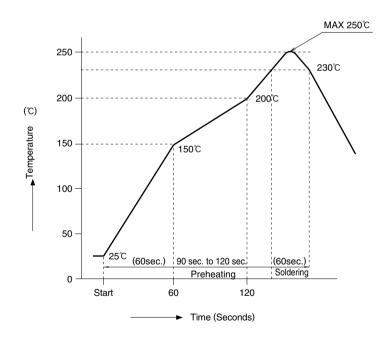

•Using Typical Solder Paste

HRS test conditions

Solder method	:Reflow, IR
Solder composition	:Paste, 63%Sn/37%Pb
	(Flux content 11wt%)
Test board	:Glass epoxy
	45mm×100mm×1.6mm thick
Metal mask	:0.15mm thick

•Using Lead-free Solder paste

HRS test condition

Solder method	:Reflow, IR
Solder composition	:Paste, 96.5%Sn/3.0%Ag/0.5%Cu
	(Flux content 11wt%)
Test board	:Glass epoxy
	45mm×100mm×1.6mm thick
Metal mask	:0.15mm thick

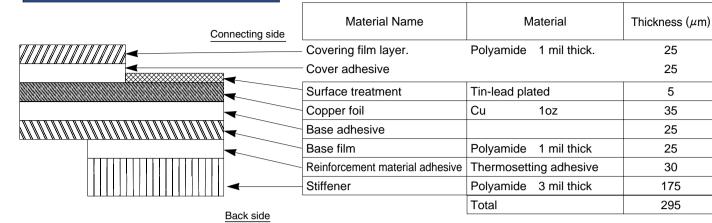

The temperature profiles are based on the above conditions.

In individual applications the actual temperature may vary, depending on solder paste type, volume/thickness and board size/thickness. Consult your solder paste and equipment manufacturer for specific recommendations.

FH28 Series FPC Construction (Recommended Specifications)

1. Using Single-sided FPC

FPC : Flexible Printed Circuit

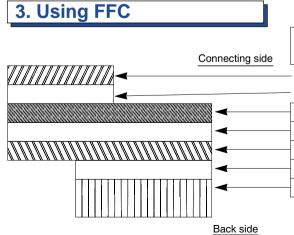

2. Using Double-sided FPC

FPC : Flexible Printed Circuit
