The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS products have been discontinued, or will be discontinued soon. Please check the products status on the Hirose website RoHS search at www.hirose-connectors.com, or contact your Hirose sales representative.

## 0.5mm pitch, 0.9mm above the board, Flexible Printed Circuit & Flexible Flat Cable ZIF Connectors

## FH19C & FH19SC Series

#### Features

#### 1. Low-profile 0.5mm pitch FPC/FFC Connectors

Miniaturization of portable equipment and personal mobile devices has created increased demand for a low profile, high density, and high reliability connectors.

\*The design of this connector has been made thinner and smaller, with a height of 0.9mm and width of 3mm.

\*PCB footprint: Reduced approximately 48% (as compared with Hirose Electric's 0.5mm pitch FH12 Series connectors)

\*Connector weight: Reduced approximately 78% (as compared with Hirose Electric's 0.5mm pitch FH12 Series connectors)

## 2. Conductive traces on the PCB can run under the connector

All bottom surface of the connector is solid, without any exposure of the contact.

3. Proven Flip-Lock Actuator System assures easy and reliable operation Rotating actuator permits easy insertion and reliable

connection with the FPC & FFC.

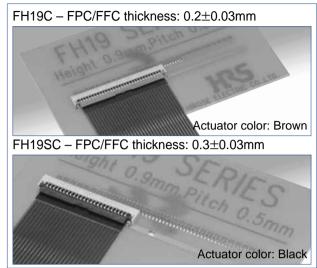

Tactile sensation confirms complete mechanical locking of the actuator and the electrical connection.

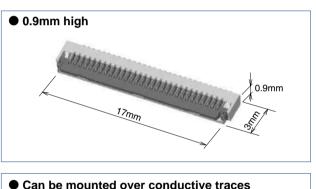

**4. Accepts 0.2mm & 0.3mm thick FPC/FFC** No exposed contacts on the bottom of the connector. The connector will also terminate with 0.2mm thick Flat Flexible Cable (FFC).

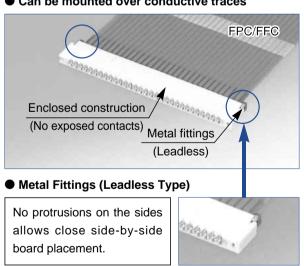

5. Board placement with automatic equipment Flat top surface and packaged on the tape-and-reel allows use of vacuum nozzles. Standard reel contains 5,000 pieces.

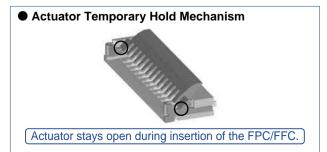

#### Applications

Notebook PC's, PDA's, digital cameras and other compact devices requiring interconnections of the main circuit board with the LCD, plasma display (PDP), HDD or other compact devices requiring FPC/FFC connections using low profile, high reliability ZIF connectors.

The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS products have been diagonized for million of the second state of the diagonized of

| 6. Shock                                 | No electrical discontinuity of 1 $\mu$ s. min.<br>Contact resistance: 100 m ohms max.<br>No damage, cracks, or parts dislocation.    | Acceleration of 981 m/s <sup>2</sup> , 6 ms duration, sine half-<br>wave waveform, 3 cycles in each of the 3 axis.    |
| 7. Humidity<br>(Steady state)            | Contact resistance: 100 m ohms max.<br>Insulation resistance: 100 M ohms min.<br>No damage, cracks, or parts dislocation.            | 96 hours at temperature of 40°C and humidity of 90 to 95%                                                             |
| 8. Temperature cycle                     | Contact resistance: 100 m ohms max.<br>Insulation resistance: 100 M ohms min.<br>No damage, cracks, or parts dislocation.            | Temperature: -55°C → +15°C to +35°C → +85°C → +15°C to +35°C<br>Time : 30 → 2 to 3 → 30 → 2 to 3(Minutes)<br>5 cycles |
| 9. Resistance to soldering heat          | No deformation of components affecting performance.                                                                                  | Reflow: At the recommended temperature profile Manual soldering: 350°C±5°C for 5 seconds                              |

Note 1: When passing the current through all of the contacts, use 70% of the current rating.

Note 2: Includes temperature rise caused by current flow.

Note 3: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non- conducting condition of installed connectors in storage, shipment or during transportation.

## Connector Dimension

[FH19C Series]

Notes 1 The coplanarity of each terminal lead and metal fitting is within 0.1

 $\boxed{2}$  The contact terminal lead position indicates the dimension from the bottom surface of the insulator body.

 $\boxed{3}$  Difference between terminal contact to be max. 0.1mm.

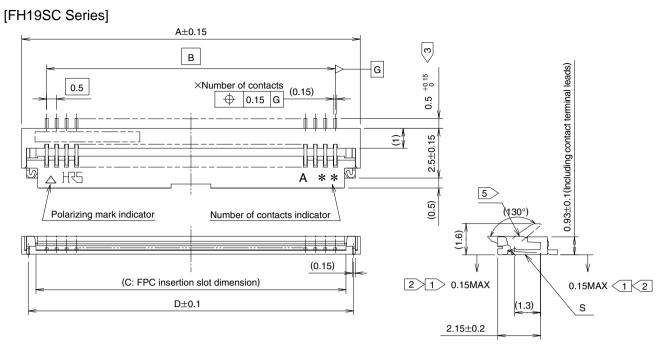

4 Any discoloration of the plastic compound will NOT AFFECT form, fit or function of the connector. Note that preventive hole for sink mark could be added for improvement.

Note1: Embossed tape reel packaging (5,000 pieces/reel) .

Order by number of reels.

## Recommended PCB Land and Metal Mask Dimensions

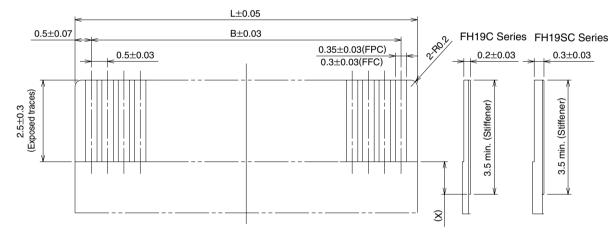

#### [Common to FH19C & FH19SC Series]

Recommended metal mask thickness: 0.10 mm.

## Recommended FPC, FFC Dimensions

[Common to FH19C & FH19SC Series]

Note1: Polyamide and a thermally hardened adhesive is recommended as the materials for the stiffener. Note2: Stiffener dimension should be 3.5mm min., and X dimension should be 0.5mm for improved flexibility of FPC.

\* Practical tolerance of thickness dimension is  $\pm 20\mu$ m (i.e., 187 to  $227\mu$ m).

Note 1: This specification is a recommendation for the FH19C, FH19SC Series connectors using  $0.2/0.3 \pm 0.03$  mm thick FPC/FFC.

The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS products have been diagonized and the discontinued and the second state of the disconduct information information.

### Recommended Temperature Profile

#### [For FH19C & FH19SC Series]

| HRS test condition |                                         |
|--------------------|-----------------------------------------|
| Solder method      | :Reflow, IR/hot air                     |
|                    | (Nihon Den-netsu Co., Ltd.'s            |
|                    | Part Number: SENSBY NR- ${\mathbb I}$ ) |
| Environment        | :Room air                               |
| Solder composition | :Paste, 96.5%Sn/3.0%Ag/0.5%Cu           |
|                    | (Senju Metal Industry, Co., Ltd.'s Part |

| Test board         | :Glass epoxy 45mm×100mm×1.6mm thick     |
| Land dimensions    | :0.3mm×0.8mm                            |
| Metal mask         | :0.25mm×0.8mm×0.1mm                     |

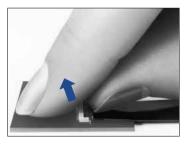

This temperature profile is based on the above conditions. In individual applications the actual temperature may vary, depending on solder paste type, volume/thickness and board size/thickness. Consult tour solder paste and equipment manufacturer for specific recommendations. The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-Rolfs projects within this price of the second state of the product of the product of the second state of the

## Operation and Precations

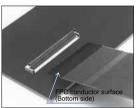

#### 1. FPC/FFC Termination procedure. Connector installed on the board.

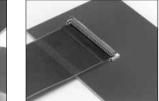

1) Lift up the actuator. Use thumb or index finger.

Operation

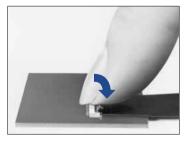

2) Assure that the FPC/FFC is fully inserted parallel to mounting surface, with the exposed conductive traces facing down.

 Rotate down the actuator until firmly closed. It is critical that the inserted FPC/FFC is not moved and remains fully inserted. Should the FPC/FFC be moved, open the actuator and repeat the process, starting with Step 1 above.

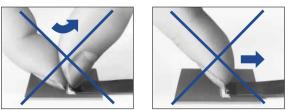

#### 2. FPC/FFC Removal

- Lift up the actuator.
- 2) Carefully remove the FPC/FFC.

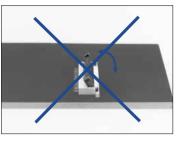

#### Precautions

1) Do not apply excessive force or use any type of tool to operate the actuator.

 The connector will assure reliable performance when the actuator is open to 130° maximum. Do not exceed this angle, as this may cause permanent damage to the connector.

 Application of excessive force to the inserted FPC/FFC may cause damage to connector and may affect the reliability of electrical connection.

If specific application requires continuous or repeated pull or bend of the inserted FPC/FFC, assure that the forces are NOT transmitted directly to the connector.
