1. Identify connector parts. (3 piece parts)
 Except CPL-259-10 (1 Piece)
2. Slide crimp sleeve over cable and strip cable to dimensions shown. Do not nick center conductor during strip operations. (CPL-259-10: trim braid and insulation to .300 (7.62).
3. Slide coupling nut onto the connector body. Then slide the connector body over cable so that the center conductor extends through the front of the contact. Crimp the contact as shown. Trim away the center conductor extending past the contact. (CPL-259-10: fold braid onto jacket before sliding connector body onto cable.)
4. Arrange braid uniformly around crimp stem. Slide crimp sleeve over braid and crimp securely using recommended crimp tool.
