The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS products have been discontinued, or will be discontinued soon. Please check the products status on the Hirose website RoHS search at www.hirose-connectors.com, or contact your Hirose sales representative.

2.5mm Pitch Connector for Full Lock and Discrete Wire Connection

DF1E Series

Features

1. Full Lock Function Added

The inner lock system adopts a full lock mechanism. This mechanism prevents disengagement to occur due to an unexpected external shock. (Refer to photo 1)

2. Increase in Crimping Contact Fixation Force and Semi-insertion Prevention

The double lock is activated for the use method to give a stress to the cable, to increase crimping contact fixation force, and to prevent the semi-insertion of the crimping contact. (Refer to photo 2)

3. Mold Lance Adopted

Since the contact lance may be deformed involving in the contact after the crimping process, the mold lance has been adopted.

4. Mis-insertion Prevention

Equipped with the mechanism to completely prevent reverse insertion and insertion between dissimilar contacts.

5. Means to Prevent Solder Crack

The glass enforcement resin is adopted for the pin header to prevent a solder crack to occur due to heat compression.

6. Correspond to Potting

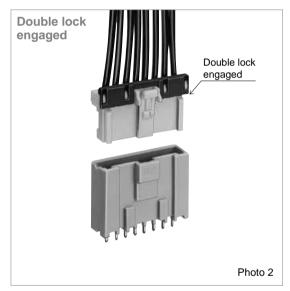

Corresponding to potting, the pin header is provided for product variations.

Corresponding to potting up to 8mm and mounting height 19.8mm (no retainer), the low profile is achieved.

7. Production Facility Cost Reduction

The female crimping contact uses the DF1B series crimping contact, which has been conventionally marketed. Investment for new facilities isn't needed. However, if the retainer is installed in the cable with AWG#22 or more wire, use the DF1E crimping contact. The female crimping contact for in-line is used together with the DF1B applicator. Therefore, no investment is needed for new facilities.

8. Various Applications

With the same series, various applications can be used for the board solder dip type and inline.

9. Listed by UL, C-UL

■Applications

Electronic equipment, office machines, industrial equipment, and consumer equipment, and so on

The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS products have been discontinued, or will be discontinued soon. Please check the property is studies the discontinued soon. Deting	Current rating	AWG#24 to #28 : 1A		
Rating		AWG#30 : 0.5A		
	Voltage rating	30V AC		

File No. and Recognition No. :E52653 :E52653

Item	Specification	Condition	
1. Contact Resistance	30m ohms max.	Measured at 20mV max. and 1mA	
2. Insulation Resistance	1000M ohms min.	500V DC	
3. Withstanding voltage	No flashover or insulation breakdown.	650V AC/1 minute	
4. Single Insertor/Extraction Forth	MIN 0.4N, MAX 4.4N	Measured at the square steel pin with 0.635±0.002	
5. Durability (Mating/un-mating)	30m ohms max	30 cycles	
6. Vibration	No electrical discontinuity of 1μ s or more	Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions.	
7. Shock	No electrical discontinuity of 1μ s or more	Acceleration of 490 m/s ² , 11 ms duration, sine half-wave waveform, 3 cycles in each of the 3 axis	
8. Humidity (Steady state)	30m ohms max	96 hours at temperature of 40±2°C and humidity of 90% to 95%	
9. Temperature Cycle	30m ohms max.	(-55°C: 30 minutes-> 5 to 35°C: 5 minutes-> 85°C: 30 minutes-> 5 to 35°C: 5 minutes) 5 cicles	
10. Resistance to Soldering heat	No deformation of components affecting performance.	Flow: 260°C for 10 seconds	
		Manual soldering: 300°C for 3 seconds	

Note 1: Current rating of header is 3A.

Note 2: Includes temperature rise caused by current flow.

Note 3: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation. Note 4: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a

specific part number shown.

Socket Crimping Contact

●DF1E-2022SCF

•DF1B - * * * * SCF

•Applicable Cable (Tin plating annealed copper wire)

Conductor Size (Wire construction)
AWG # 20 (21 cores./0.18mm)
AWG # 22 (17 cores./0.16mm)
AWG # 24 (11 cores./0.16mm)
AWG # 26 (7 cores./0.16mm)
AWG # 28 (7 cores./0.127mm)
AWG # 30 (7 cores./0.1mm)

•Recommended Cable UL1061, UL1007

•Strip Length

2.0mm to 2.5mm

Note : If other cables are used instead of the applicable cable, consult Hirose sales department.

▲ Application Pattern

Standard Header

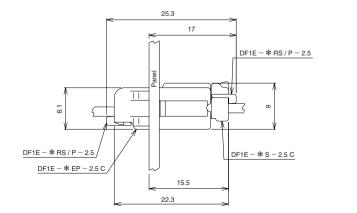

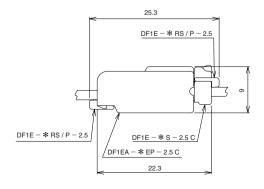

•Header for Potting

Panel Mounting Lock In-line Plug

B160 **HS**

Precautions

1. Recommended Soldering Condition	Flow: 260°C for 10 seconds		
	Manual soldering: 300℃ for 3 seconds		
2. Cleaning Condition	Refer to Nylon Connector Use Hand book.		
	However, if the connector is cleaned by the potting header, the detergent remains within the		
	connector, which will cause malfunction.		
3. Connection Condition	Refer to Nylon Connector Use Hand book.		
4. Cautions	To remove the connector, if the connector is forcedly removed, it will cause connector		
	damage. If the connector is hardly removed, slightly push the connector once, and then		
	remove it using the lock.		
	In some method for laying the cable within equipment, a tension may be applied to the		
	cable so as to remove the contact. In this case, it is recommended to use the retainer.		
	 Incomplete insertion of the contact can be prevented by mounting a retainer; however, 		
	mounting of a retainer might not be possible when the contact protrudes beyond the		
	socket. Insert the contact securely and then mount the retainer.		
	 If the potting process is implemented, it is desirable to fill the connector with resin, 		
	considering the resin surface tensile force.		
	The color phase of this product may be slightly different from that of the forming product		
	according to the manufacturing lot and future storage conditions, however the difference		
	doesn't affect the performance.		
5. Precautions	Refer to Nylon Connector Use Hand book.
