## 3.96 mm Pitch Miniature Connectors for Internal Power Supplies (UL,C-UL and TÜV Listed)

### **DF7** Series

#### Features

#### **1. Complete Locking Function**

Reliable interior lock protects mated connectors from accidental disconnection.

#### 2. Increased Contact Retention of Crimped Contacts and Prevention of Incomplete Insertion

Separate contact retainer increases the contact retention, assures and visually confirms the complete contact insertion.

#### 3. Molded-in Contact Retention Tabs

Handling of terminated contacts during the assembly and termination is easier and avoids entangling of wires, since there are no protruding metal tabs.

#### 4. Incorrect Insertion Prevention

Connectors are polarized to assure correct mating with corresponding parts.

#### **5.Solder Crack Prevention**

Glass reinforced resin is used in the pin header bodies to prevent solder cracks caused by the heat shrinkage.

#### 6. Prevention of Incorrect Board Placement

Built-in locating posts assure correct connector placement and orientation on the board.(2-12 pos.)

#### 7. Supports Sealing after Installation.

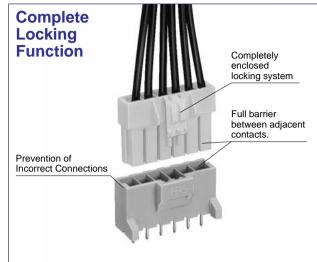

Sealing compound can be applied to the board installed connector for distance of 6 mm max. from the mounting surface (9 mm max. for single position).

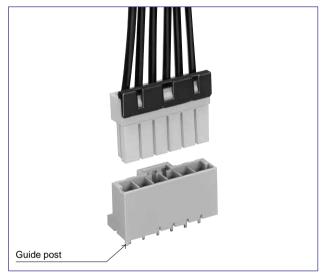

#### 8.Cost Effective Tooling

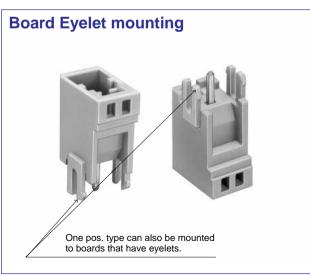

The same crimping tools are used to terminate socket and pin contacts.

#### 9. Prevention of Short Circuits between Adjacent Contacts

Each contact is completely surrounded by the insulator housing, electrically isolating it from adjacent contacts.

Continued.

#### 10. 10 A maximum Current

Connector can carry current of 10 A per contact with #16 AWG conductor.Refer to page 3 for current ratings for multi-position connectors using other conductor sizes.

#### **11. Color Variations**

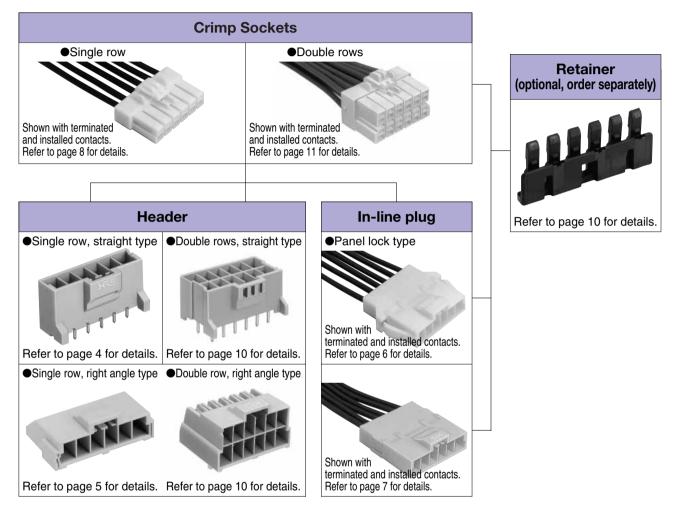

1 pos. is available in a standard 3 colors: natural, blue, and red.

#### **12. Supports Eyelets**

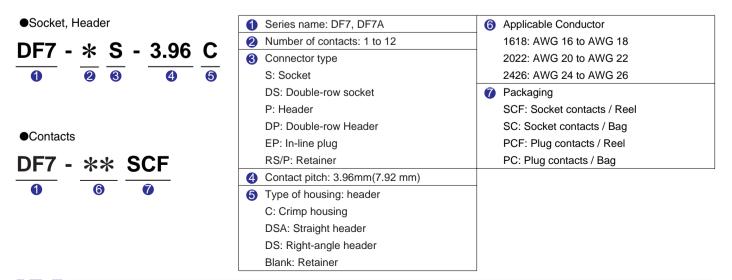

1 pos. can be mounted to boards which have eyelets attached.

#### Applications

Office equipment, power supplies for industrial, medical and instrumentation applications, variety of consumer electronic and electrical applications.

### Ordering information

| Item   | Specification   | Condition   |
|--|---|---|
| 1. Contact resistance                          | Contact resistance(Initial value)                           | 10 m ohms max. 20mV max., 1mA   |
| 2. Insulator resistance                        | 1000 M ohms min.  | 500 V DC  |
| 3. Withstanding voltage                        | No flashover or Insulator breakdown                         | 1500 V AC for 1 minute  |
| 4. Insertion-Extraction force<br>(per contact) | 0.3N min., 4.5N max.  | Measured with a steel pin of 0.64 x 1.2 $\pm$ 0.002 mm  |
| 5. Durability<br>(mating/unmating)             | 30 cycles   | Contact resistance of 20 m ohms max.  |
| 6. Vibration                                   | No momentary disconnections of 1 $\mu$ s min.               | Frequency 10 to 55 Hz, single amplitude of 0.75 mm, 3 axis, 2 hours   |
| 7. Shock                                       | No electrical discontinuity of 1 $\mu$ s. min.              | Acceleration of 490 m/s <sup>2</sup> , 11 ms duration, sine half-wave waveform, 3 cycles in each of the 3 axis. |
| 8. Humidity                                    | Contact resistance 20 m ohms max.                           | Temperature $40^{\circ}C \pm 2^{\circ}C$ , 90% to 95% RH, 96 hours  |
| 9. Temperature cycle                           | Contact resistance of 20 m ohms max.                        | (-55°C: 30 minutes → 5 to 35°C: 5 minutes → 85°C: 30 minutes → 5 to 35°C: 5 minutes) for 5 cycles               |
| 10. Resistance to soldering heat               | No deformation of the insulator parts affecting performance | Flow solder temperature 250°C, 10 seconds<br>Manual soldering: Soldering iron temperature 300°C, 3 seconds      |

Note 1: Includes temperature rise caused by the current flow.

Note 2: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non- conducting condition of installed connectors in storage, shipment or during transportation.

#### Materials

| Product        | Part                         | Material                       | Finish                    | Remarks |
|----------------|------------------------------|--------------------------------|---------------------------|---------|
| Sockets        | Insulator                    | Polyamide                      | Color: White              | UL94V-0 |
|                | Insulator                    | Polyamide                      | Color: Beige (Single row) | UL94V-0 |
| Headers        | insulator                    | (Glass reinforced)             | Color: Grey (Double row)  | 0L94V-0 |
|                | Contact                      | High conductivity copper alloy | Tin plating (Note)        |         |
| In-line plug   | Insulator                    | Polyamide                      | Color: White              | UL94V-0 |
| Retainer       | Retainer Insulator Polyamide |                                | Color: Black              | UL94V-0 |
| Crimp contacts | Contacts                     | High conductivity copper alloy | Tin plating (Note)        |         |

Note: Hirose Electric's plating incorporates anti-whisking compounds.

### Contact Extraction Procedure

# ■ Contact extraction tool: Flat-bladed screwdriver, 1.4 mm blade width ■ Use with crimp Contacts: DF7-1618SC(F), DF7-2022SC(F),

DF7-1618PC(F), DF7-2022PC(F)

### Work Method

#### **Housing Cross-Section**

- 1. Refer to the drawing No. 1. Insert correct size screwdriver in the insulator against the molded-in lance. Deflect the lance as shown.
- 2. Assure that the lance is deflected to release the contact and pull- out wire with the terminated contact.

### General Use Precautions

- Make sure that the lock is fully depressed before un-mating the connectors.
- Use correct size of the wires. Do NOT forcefully twist or deform wires, as this may affect the crimped contact connection.
- When the potting process is to be performed, please take into consideration the surface tension of the resin when filling.
