■ Features

1. Device-Net Compliant

Conforms to requirements of Factory Automation Network Device-Net standards.
 Hirose products are distinct from products of made others, as described below.

Feature	Made by others	Hirose HR31
Reduced number of termination operations	Crimped to commercially available cap connectors, inserted into housing and fastened by screw.	Crimped and connected to terminal then fastened simply by inserting into housing.
High density mounting	Plug height : 15 mm	Plug height is 10.2 mm, allowing use of less space when mounting several connectors
Prevention of connection errors	Contact positions not identified.	Permanently identified contact positions
Number of required operations to secure receptacle assembly to the board	Connectors are attached by screws from the opposite side.	No need for screws, built-in locking pin secures connector to the board

2 Locking features

The connectors can be supplied with either of the following locking features:

- Screw lock, using attached screws.
- Snap lock, using built-in feature with a definite click-sensation.

3. Commercially available tools may be used

Use crimp tools conforming to JIS C 9711 standards.
 Terminated contacts can be removed using 1 mm dia. steel pin. and re-inserted.

4. Prevention of deformation of the contacts

When fully inserted, the plug contacts are fully protected by the walls of the insulator body eliminating a risk of accidental damage.

■ Applications

Power units and communications units of factory automation related devices

Total space occupied by mated assemblies

With screw lock

Without screw lock

■ Tools

Type	Part No.	CL No.
Manual crimp tool	HR31-TC-01	150-0217-7
Contact removal pin	HR31-SC-TP	150-0215-1

● Tools application procedures

1. Manual contact crimp tool

The tool will terminate all specified crimp contacts. Placement of correct contact in corresponding crimp position on the tool is critical. The positions are clearly indicated on the tool as (2) and (1.25). The exposed conductor strip length is 5mm.

Crimp position indicator	Applicable crimp contact
2	HR31-SC-113 or HR31-SC-111
1.25	HR31-SC-123 or HR31-SC-121

2. Contact removal pin

Contact removal pin provides easy method of contact removal from plug assembly.

- 1) Fully insert the long end of the contact removal pin into the opening in the insulator.
- 2) Move the pin forward, in the direction of the mating face.
This will cause the terminated contact to move in opposite direction.
- 3) Pull out the wire with the attached crimped contact.

◆ Usage Precautions

1. To prevent damage, align receptacle with the panel and board in such a way that it is not subject to excess loads.

1.1 Recommended mounting panel dimensions (right angle through hole type)

Part No.	A
HR31-5.08R-5PDL(**)	36 ^{+0.2} ₀
HR31-5.08RA-5PDL(**)	27.9 ^{+0.2} ₀

1.2 Recommended mounting panel dimensions (straight through hole type)

Part No.	B
HR31-5.08R-5PD(**)	36 ^{+0.2} ₀
HR31-5.08RA-5PD(**)	27.9 ^{+0.2} ₀

2. Insert the crimp contact into the plug in the direction shown below.

3. Use a number 0 cross drive bit to tighten the screw lock's screw.
4. Assure that the circuit's power is off when mating and un-mating connectors.
