

RA CONNECTOR (IDC)

Disconnectable Insulation displacement connectors for 1.27mm (.050") pitch ribbon cables

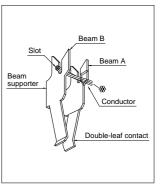

To keep pace with the rapid developments in electronics, internal and external connection systems are naturally increasing in density. At the same time, labor requirements and overall costs must be minimized. RA connectors meet all of these requirements, while providing increased reliability. These connectors, whose materials, shapes, dimensions, and surface treatments have been carefully selected, are based on the latest technological information that has been accumulated and improved over years of experience in crimping connection technology.

Features -

• Twin U-slot

The twin U-slot is the most important IDC element in JST's RA connectors. As shown in the figure, wire conductors are connected between the slots of U-shaped parallel beams, and the distance between each adjacent pair of beams is designed to be one third of the pitch of wire strands.

• Two-die processing and selective gold plating

Two precision dies are used to blank and form the contacts. After the first die blanks the contacts, they are gold plated at crucial points. Then, the contacts are formed by the second die. This eliminates unnecessary gold-plating and overall costs are minimized. This innovation is another example of our industry-leading technology.

Selective gold-plated posts

Header posts are also selectively gold-plated. While square wire material is used for production of conventional posts in loose pieces, continuous flat strip is used for production of our post in chain form. This allows selective gold-plating and provides cost reduction.

Cost-efficient

JST's unique technology allows it to produce connectors that are extremely reliable and cost-efficient.

• Interchangeable cables and connectors

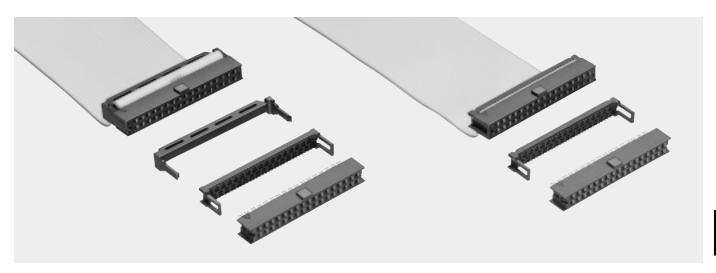

RA connectors fit commercially available 1.27mm (.050") pitch flat ribbon cables. A variety of ribbon cables are offered according to the purpose. Moreover, the RA series receptacles and header are interchangeable with the similar type of connectors commercially available. Contact JST before procuring cables and other manufacturer's mating connectors.

* Contact JST for details.

Receptacle

Specifications

Characteristics

enalaetenetiee			
Current rating	1.0A AC, DC		
Voltage rating	300V AC, DC		
Temperature range	(including temperature rise in applying electrical current) -55°C to +125°C(gold-plated) -55°C to +105°C(tin-plated)		
Initial value/10mΩ max. (gold-plated) 40mΩ max. (tin-plated) Contact resistance After environmental testing/ 15mΩ max. (gold-plated) S0mΩ max. (tin-plated) 10mΩ max. (tin-plated)			
Insulation resistance	5,000MΩ min.		
Withstanding voltage	500V AC/5 seconds		
Applicable wire	AWG #28, 1.27mm(.050") pitch ribbon cable		

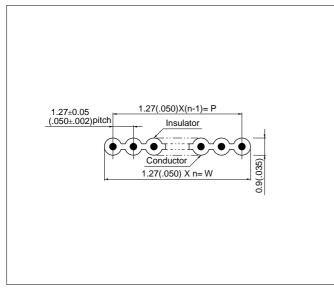

Materials

Contact	Phosphor bronze • Nickel-undercoated, gold-plated • Copper-undercoated, tin/lead-plated
Receptacle housing	Glass-filled PBT, UL94V-0, black
Cover housing	Glass-filled PBT, UL94V-0, black
Strain relief	Glass-filled PBT, UL94V-0, black

*Contact JST details.

Applicable cables

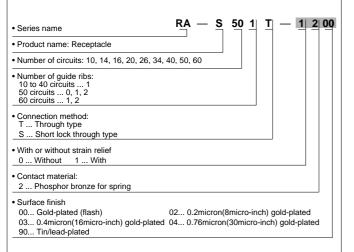

Ribbon cables conforming to the following specifications can be used with RA connector receptacles. Contact JST for details.

No.of	Dimensional tolerance mm(in.)			
conductors (n)	Р	W		
10 to 14	±0.18(.007)	±0.3(.012)		
16 to 26	±0.28(.011)	±0.3(.012)		
34 to 60	±0.38(.015)	±0.3(.012)		
		I		
	AWG #28 stranded wire			

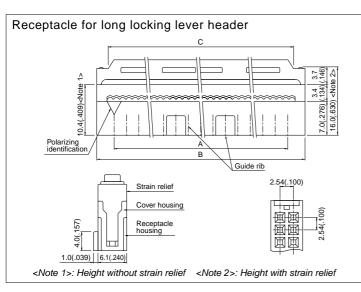

Conductor	Construction: 7/0.127mm (.005")dia Material: Tin-plated annealed copper wire		
Conductor	AWG #28 solid wire Construction: 0.32mm (.013")dia. Material: Tin-plated annealed copper wire		
Insulator	Soft vinyl chloride		

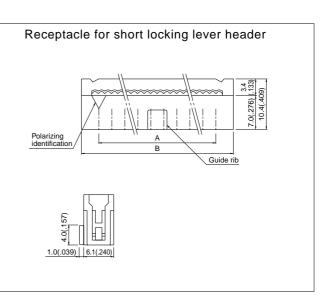

Model number identification

Note:

The standard gold-plated type is identified by the suffix number [-1200], but this suffix number is usually omitted. The gold-plated type identified by [-0200] is indicated by [-0] for short. Other types must be identified by the full code number. Special types do not conform to the above coding system.

Note:

- Tolerances are non-cumulative: ±0.05mm(±.002") for all centers. Hole dimensions differ according to the kind of PC board and piercing method. The dimensions above should serve as a guideline. Contact JST for details.
- The mounting screw holes are not required for standard headers.
 This is normally No. 1 pin position.
