Please check the products status on the Hirose website RoHS search at www.hirose-connectors.com, or contact your Hirose sales representative.

2mm Double-Row Connector (Product Compliant to UL/CSA Standard)

DF11 Series

Features

1. Space-saving on Board Realized

Double rows of 2mm pitch contact has been condensed within the 5mm width.

The multiple number of signals can be secured in the same space as the conventional 2mm single-row contact.

2. Broad Variation

The insulation displacement and crimping methods are prepared for connection. Thus, board to cable, in-line, board to board connectors are provided in order to widen a board design variation.

In addition, "Gold" or "Tin" can be selected for the plating according application, while the SMT products line up.

3. Applicable Wire Covers Wide Range

According to the double rows of 2mm pitch compact design, the applicable wire can cover AWG22 to 30.

4. The ID Type Connector Achieves Connection Work.

Using the full automatic insulation displacement machine, the complicated multi-harness can be easily connected, reducing the man-hour and eliminating the manual work process.

Applications

Business equipments such as copy machine, printer and so on.

B220 **HS**

Features of DF11 Insulation Displacement Machine (Single Core Punching Full Automatic ID Machine AM700/DF11)

• 5 Major Features of ID Machine AM700/DF11

- 1. Perform the multi-harness.
- 2. The setup time has been widely reduced. (10 minutes maximum)
- 3. Space saving design.

(About half space compared with the conventional machine)

- 4. Minimize initial cost with low cost.
- 5. The harness data can be saved in the floppy disk and easily changed.

Points

Since the DF11 insulation displacemention allows double rows ID with a single part, the harness service is completed with machine connection only.

Product Specifications

Item	Specification	Condition			
1. Insulation Resistance	1000M ohms min.	500V DC			
2. Withstanding voltage	No flashover or insulation breakdown.	650V AC/1 minute			
3. Contact Resistance	30m ohms max.	100mA			
4. Single Insertion/Extraction Force	0.3N (30gf) min., 4.4N(450gf) max.	Measured by the square stee	el-made pin of 0.5±0.002mm		
5. Vibration	No electrical discontinuity of 1μ s or more	Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 direction			
6. Humidity (Steady state)	Contact resistance: 30m ohms max. Insulation resistance: 500M ohms min.	96 hours at temperature of 40° C and humidity of 90% to 95%			
7 Tomporatura Cuala	Contact resistance: 30m ohms max. Insulation resistance: 1000M ohmsmin.	(-55°C: 30 minutes → 5 to 35°C: 5 to 15 minutes			
7. Temperature Cycle		85°C: 30 minutes → 5 to 35°C: 5 to 15 minutes) 5 cycles			
Q. Durchility (Moting/up moting)	Contact register as 20m abms may	Tin plated: 30 cycles			
8. Durability (Mating/un-mating)	Contact resistance: 30m ohms max.	Gold plated:50 cycles			
		Flow:	Manual soldering:		
O. Desistance to Caldering heat	No defermation of components offecting performance	260℃ for 10 seconds	300℃ for 2 seconds		
9. Resistance to Soldering heat	No deformation of components affecting performance.	Reflow:	Manual soldering:		
		At the recommended temperature profile	300°C for 3 seconds		

Note 1: Current rating of header is 2A.

Note 2: Includes temperature rise caused by current flow.

Note 3: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.

Note 4: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-Rol Stradues beez discontinued from the solution of the section of

Note1: DF11A-2428SCF/SC is of tin plated low insertion/extraction type.

Applicable Wire (Tin Plated Annealed Copper Wire)

Recommended Wire

UL1061, UL1007 (Note 2.)

Strip Length

1.7 to 2.3mm

Jacket Diameter			
<i>∲</i> 1.2 to <i>∲</i> 1.45mm			
<i>∲</i> 0.9 to <i>∲</i> 1.45mm			
<i>∲</i> 0.75 to <i>∲</i> 1.2mm			

Note1: If other wires are used than the applicable wire, consult the HRS sales department. Note2: DF11-22SCF/SC/SCFA/SCA is for UL1061.

Crimping Contact for In-line Plug

Precautions

1. Recommended Temperature Profile (SMT)	Temperature (°C) 10s max 250 200 180±10 150 100~120s Time (S) Note1: UP to 2 cycles of Reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle Note2: The temperature profile indicates the board surface temperature at the point of contacts				
	with the connector terminals.				
2. Recommended Manual Soldering Condition (SMT)					
3. Recommended Screen Thickness (SMT)	0.15 to 0.2mm				
4. Board Warp age (SMT)	Based on the both connector edges, 0.03mm max. is allowed in the connector center area.				
5. Recommended Soldering Condition(Through hole)	Flow: 250°C for 10 seconds				
	Manual soldering: 290°C for 2 seconds				
6. Cleaning Condition	Refer to the "Nylon Connector Use Hand book".				
7. Connection Condition	Refer to the "Nylon Connector Use Hand book".
