

### FAST RECOVERY DIODES

### MAGN-A-pak™ Power Modules

#### Features

- Fast recovery time characteristics
- Electrically isolated base plate
- Industrial standard package
- Simplified mechanical designs, rapid assembly
- High surge capability
- Large creepage distances
- 3000 V<sub>RMS</sub> isolating voltage
- UL E78996 approved 
- RoHS Compliant

250A

#### Description

The IRK.L240 Series of MAGN-A-paks uses fast recovery power diodes in four basic configurations. The semiconductors are electrically isolated from the metal base, allowing common heatsinks and compact assemblies to be built. Application includes power supplies, battery chargers, welders, motor controls and general industrial current rectification. These modules are intended for those applications where fast recovery characteristics are required.

#### Major Ratings and Characteristics
