

STGBL6NC60D - STGDL6NC60D STGFL6NC60D - STGPL6NC60D

600 V - 6 A hyper fast IGBT

Features

- Low C_{RES} / C_{IES} ratio (no cross-conduction susceptibility)
- Very soft ultra fast recovery antiparallel diode

Applications

- Very high frequency operation
- High frequency lamp ballast
- SMPS and PFC (hard switching too)

Description

Based on PowerMESH technology and thanks to a new lifetime control system, this new series exhibits very low turn-off energy realizing the best trade-off between on-state voltage and switching losses and so allowing very high operating frequencies.

4 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
