- Features
 Case Material: Molded Plastic. UL Flammability
- Classification Rating 94V-0 and MSL Rating 1 Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors
- The bias resistors consist of thin-film resistors with complete isolation to allow negative biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.
- Only the on/off conditions need to be set for operation, making device design easy

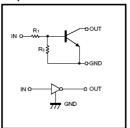

Absolute maximum ratings @ 25°
