100mA / 50V Digital transistors (with built-in resistor)

DTC114GUA / DTC114GKA / DTC114GSA

●Applications
Inverter, Interface, Driver

●Features
1) The built-in bias resistors consist of thin-film resistors with complete isolation to allow negative biasing of the input, and parasitic effects are almost completely eliminated.
2) Only the on / off conditions need to be set for operation, making the device design easy.
3) Higher mounting densities can be achieved.
