

Current-compensated chokes

- Rated currents from 0.3 to 10A
- DC to 1kHz frequency
- 100kHz to 3MHz common-mode resonance frequency
- Dual-choke configurations
- Multiple PCB-mounting options

Approvals

Technical specifications

Maximum continuous operating voltage:	250VAC @ 40°C
Operating frequency:	dc to 1kHz
Rated currents:	0.3 to 10A @ 40°C max.
High potential test voltage winding-to-winding @ 25°C:	1500VAC, 60 sec, guaranteed 1500V, 50Hz, 2 sec, factory test
winding-to-housing @ 25°C:	4000VAC, 60 sec, guaranteed
Surge current @ 10msec:	20 x I _{nominal} @ 25°C
Temperature range (operation and storage):	-40°C to +125°C (40/125/56)
Flammability corresponding to:	UL 94V-0
MTBF @ 40°C/230V (Mil-HB-217F):	> 5,000,000 hours

Typical electrical schematic

RN chokes are attenuating common-mode or asymmetric (P/N → E) interference signals, by being connected in series with the phase and neutral lines of an AC powerline input. Symmetrical components of the noise are also attenuated by the leakage inductance of the windings. These chokes are typically used in conjunction with suppression capacitors.

Features and benefits

- High saturation resistance and excellent thermal behavior.
- Through hole pin connections.
- Dual-choke configuration.
- Small compact design.
- Multiple housing options.
- Custom-specific versions are available on request.

Typical applications

- Phase-angle control circuits in combination with saturating chokes
- EMI input filters
- For suppressing equipment with no earth connection
- Suppressing high interference levels
