### Typical electrical schematic

### Features and benefits

- Broad range of power ratings for fast and convenient filter selection.
- Available as 440VAC (FN 351) and 520VAC (FN 351H) versions for network-specific applications.
- FN 351 filters provide a broadband common and differential-mode attenuation performance, which remains available also when high interference levels are present.
- Solid, touch-safe filter terminals contribute to overall equipment safety and make the filters compliant with IEC 60950.
- Introduced as one of the very first motor drive EMC filters in the market, FN 351 has been widely imitated and has successfully proven its function over more than 10 years.

### Typical applications

- Three-phase motor drives
- Inverters and converters
- Industrial automation equipment
- UPS
- SMPS
- General purpose three-phase filtering

\* To compile a complete part number, please replace the .. with the required I/O connection style.

\*\* Calculated at rated current, 400VAC (FN 351)/480VAC (FN 351H) and cos phi = 0.8. The exact value depends upon the efficiency of the drive, the motor and the entire application.

\*\*\* Maximum leakage under normal operating conditions (FN 351 at 400V, FN 351H at 480V). Note: if two phases are interrupted, worst case leakage could reach 6 times higher levels.
