

## Switchmode/High Frequency Toroidal Inductor

# **FIT44-1**

### **Description:**

The FIT44-1 toroidal inductor is specifically designed to minimize transients. It stores energy and therefore, conditions the output signal by leveling the current waveform providing a more stable current supply. Generally used in high frequency circuits, its standard design provides an economical solution in differential mode applications or as an output inductor.

## **Electrical Specifications (@25C):**

| Min. Induc | tance (µH) | Rated   | Max      |
|------------|------------|---------|----------|
| No Bias    | At Bias    | DC Amps | DCR (mΩ) |
| 18.85      | 12.72      | 2.8     | 44.8     |

Note: No Bias inductance measured at .25V, 10KHZ.

#### **Dimensions:**

| Α    | В    | С    | D    | Е    | F    | G         |
|------|------|------|------|------|------|-----------|
| .625 | .350 | .700 | .250 | .350 | .125 | .020±.003 |

Units: In inches

Weight: .008 lbs.

#### **Technical Notes:**

- 1. Nominal inductance values are typically 10% higher than minimal rating.
- 2. Biased inductance measured at rated DC amps.
- 3. Operation at rated current yields approximately 40°C temperature rise over 20°C ambient.

RoHS Compliance: As of manufacturing date February 2005, all standard products meet the requirements of 2002/95/EC, known as the RoHS initiative.
