

V-EVAL

V-Series Evaluation Unit

This unit allows you to evaluate V 1, V 125 and V 600 voltmeter modules. These V-series meters feature a full scale reading of 200mV d.c. This evaluation unit incorporates built-in scaling resistors to increase the measurement range to 20V d.c. The unit is powered by an internal 9V (PP3) battery. The ON/OFF switch is used to apply power to the voltmeter module you have plugged in.
