

- Structure : Silicon Monolithic Integrated Circuit
- Product name : Audio Driver (Speaker AMP) for Mobile telephone
- Type : **BH7826FVM**
- Features :
- 1) BTL monaural speaker amplifier
  - 2) Capable of high power 500mW/8Ω/BTL output
  - 3) Correspond to dynamic speaker(8/12/16Ω)load
  - 4) Wide power supply voltage range
  - 5) Supports active/shutdown modes
  - 6) Built-in softmute circuit (Need outside resistor and capacitor)
  - 7) Built-in anti-pop circuit / thermal shutdown circuit

○Absolute Maximum Ratings (Ta=25°C)

Parameter	Symbol	Limits	Unit
Supply voltage	V <sub>CCMAX</sub>	6.0	V
Power dissipation	P <sub>d</sub>	470 (*1)	mW
Operating temperature	T <sub>opr</sub>	-30~+85 (*2)	°C
Storage temperature	T <sub>stg</sub>	-55~+125	°C

\*1 Deratings is done at 4.7mW/°C above Ta=25°C.

When mounted on a 70mm × 70mm × 1.6mm PCB board.

\*2 T<sub>opr</sub>=70°C~85°C is the range for performing basic operations and does not guarantee characteristics or rated output.

Moreover, TSD (Thermal Shutdown) may operate if input signals occurring in this range are excessive.

○Operating range (Ta=25°C)

Parameter	Symbol	Limits	Unit
Supply voltage (V)	V <sub>ccs</sub>	+2.6~+5.5	V

\*This product is not designed for protection against radioactive rays.

Application example

The product described in this specification is designed to be used with ordinary electronic equipment or devices (such as audio-visual equipment, office-automation equipment, communications devices, electrical appliances, and electronic toys).

Should you intend to use this product with equipment or devices which require an extremely high level or reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

○Electrical characteristics (Unless otherwise noted,  $T_a=27^{\circ}\text{C}$ ,  $V_{CC}=3.6\text{V}$ ,  $f=1\text{kHz}$ ,  $R_L=8\Omega$ )

Parameter	Symbol	Min.	Typ.	Max.	Unit	Conditions
Circuit current 1	$I_{CC1}$	-	3.5	7	mA	No signal Active MODE
Circuit current 2	$I_{CC2}$	-	0	2	$\mu\text{A}$	No signal Suspend MODE
Voltage gain 1	$G_V$	+9.5	+11.5	+13.5	dB	$V_{IN1}=V_{IN2}=-20\text{dBV}$ Rf/Rs=100k/22k SE *1
Voltage gain 2	$V_{OM1}$	+4.0	+6.0	-	dBV	DSTN=1% BTL *1
Maximum output voltage	$V_{OM2}$	-	+5.1	-	dBV	VCC=3.4V DSTN=1% BTL *1
Output distortion	$D_{STN}$	-	0.2	1.0	%	$V_{IN1}=V_{IN2}=-20\text{dBV}$ SE *1
Output noise level	$V_{NO}$	-	-94	-80	dBV	No signal, SE Active MODE *2
Suspend attenuation	$G_S$	-	-107	-80	dBV	$V_{IN1}=V_{IN2}=-20\text{dBV}$ BTL *2
Bias setting voltage	$V_{BIAS}$	1.6	1.8	2.0	V	3pin DC voltage
Suspend hold voltage/H	$V_{SH1}$	2.0	-	Vcc	V	Active MODE, Hold voltage
Suspend hold voltage/L	$V_{SL}$	0	-	0.5	V	Suspend MODE, Hold voltage

\*1 B.W.=0.4~30kHz, \*2 DIN AUDIO

○Outer dimensions

○Block diagram

○Pin number and pin name

Pin No.	Pin name
1	SP IN2
2	SUSPEND CTRL
3	BIAS
4	SP IN1
5	SP OUT1
6	VCC
7	GND
8	SP OUT2

○Cautions on use

1) Absolute maximum ratings

If applied voltage, operating temperature range, or other absolute maximum ratings are exceeded, the LSI may be damaged. Do not apply voltages or temperatures that exceed the absolute maximum ratings. If you think of a case in which absolute maximum ratings are exceeded, enforce fuses or other physical safety measures and investigate how not to apply the conditions under which absolute maximum ratings are exceeded to the LSI.

2) GND potential

Make the GND pin voltage such that it is the lowest voltage even when operating below it. Actually confirm that the voltage of each pin does not become a lower voltage than the GND pin, including transient phenomena.

3) Thermal design

Perform thermal design in which there are adequate margins by taking into account the allowable power dissipation in actual states of use.

4) Shorts between pins and miss-installation

When mounting the LSI on a board, pay adequate attention to orientation and placement discrepancies of the LSI. If it is miss-installed and the power is turned on, the LSI may be damaged. It also may be damaged if it is shorted by a foreign substance coming between pins of the LSI or between a pin and a power supply or a pin and a GND.

5) Operation in strong magnetic fields

Adequately evaluate use in a strong magnetic field, since there is a possibility of malfunction.

### Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

#### About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
