SN65LBC174A-EP
QUADRUPLE RS-485 DIFFERENTIAL LINE DRIVER

SLLS732 – OCTOBER 2006 – REVISED DECEMBER 2006

FEATURES

- **Controlled Baseline**
  - **One Assembly/Test Site, One Fabrication Site**
- **Extended Temperature Performance of –55°C to 125°C**
- **Enhanced Diminishing Manufacturing Sources (DMS) Support**
- **Enhanced Product-Change Notification**
- **Qualification Pedigree** (1)
- **Designed for TIA/EIA-485, TIA/EIA-422, and ISO 8482 Applications**
- **Signaling Rates up to 30 Mbps** (2)
- **Propagation Delay Times <11 ns**
- **Low Standby Power Consumption 1.5 mA Max**
- **Output ESD Protection Exceeds 13 kV**
- **Driver Positive- and Negative-Current Limiting**
- **Power-Up and Power-Down Glitch Free for Line-Insertion Applications**
- **Thermal Shutdown Protection**
- **Industry Standard Pinout, Compatible With SN75174, MC3487, DS96174, LTC487, and MAX3042**

(1) Component qualification in accordance with JEDEC and industry standards to ensure reliable operation over an extended temperature range. This includes, but is not limited to, Highly Accelerated Stress Test (HAST) or biased 85/85, temperature cycle, autoclave or unbiased HAST, electromigration, bond intermetallic life, and mold compound life. Such qualification testing should not be viewed as justifying use of this component beyond specified performance and environmental limits.

(2) The signaling rate of a line is the number of voltage transitions that are made per second, expressed in the unit bits per second (bps).

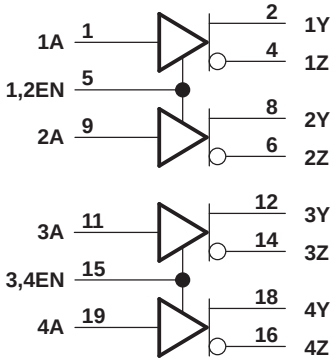
logic diagram (positive logic)



DESCRIPTION/ORDERING INFORMATION

The SN65LBC174A-EP is a quadruple differential line driver with 3-state outputs, designed for TIA/EIA-485 (RS-485), TIA/EIA-422 (RS-422), and ISO 8482 applications.

This device is optimized for balanced multipoint bus transmission at signaling rates up to 30-million bits per second (Mbps). The transmission media may be printed-circuit-board traces, backplanes, or cables. The ultimate rate and distance of data transfer is dependent upon the attenuation characteristics of the media and the noise coupling to the environment.

Each driver features current limiting and thermal-shutdown circuitry, making it suitable for high-speed multipoint applications in noisy environments. The device is designed using LinBiCMOS™ technology, facilitating low power consumption and robustness.

The two enable (EN) inputs provide pair-wise driver enabling, or can be externally tied together to provide enable control of all four drivers with one signal. When disabled or powered off, the driver outputs present a high impedance to the bus for reduced system loading.

The SN65LBC174A-EP is characterized for operation over the temperature range of –55°C to 125°C.

ORDERING INFORMATION

T_A	PACKAGE(1)	ORDERABLE PART NUMBER	TOP-SIDE MARKING
–55°C to 125°C	20-pin SOIC – DW	SN65LBC174AMDWREP	65LBC174EP

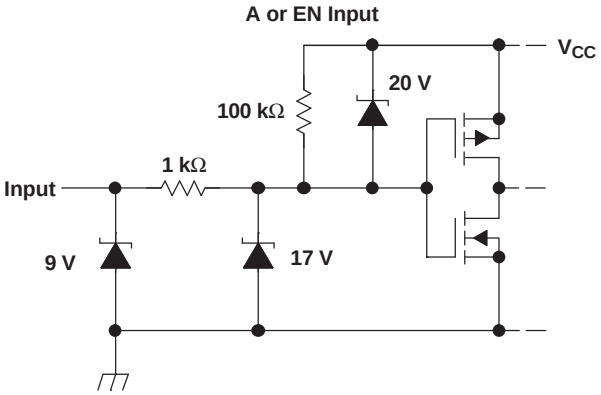
(1) Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

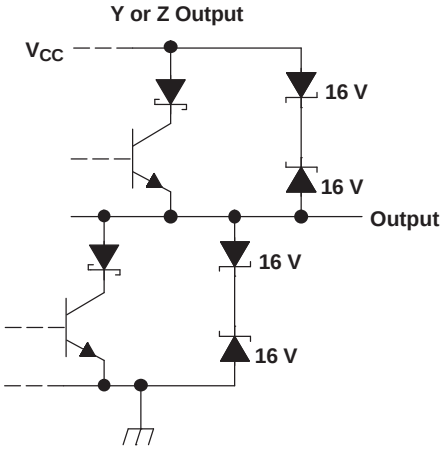
FUNCTION TABLE(1) (each driver)

INPUT A	ENABLE G	OUTPUTS Y	OUTPUTS Z
L	H	L	H
H	H	H	L
OPEN	H	H	L
L	OPEN	L	H
H	OPEN	H	L
OPEN	OPEN	H	L
X	L	Z	Z

(1) H = high level, L = low level, X = irrelevant, Z = high impedance (off)

EQUIVALENT INPUT AND OUTPUT SCHEMATIC DIAGRAMS





Absolute Maximum Ratings(1)

over operating free-air temperature range (unless otherwise noted)

				MIN	MAX	UNIT
V_{CC}	Supply voltage range(2)			–0.3	6	V
	Voltage range at any bus (dc)			–10	15	V
	Voltage range at any bus (transient pulse through 100 Ω, see Figure 8)			–30	30	V
V_I	Input voltage range at any A or EN terminal			–0.5	V_{CC} + 0.5	V
	Electrostatic discharge	Human-Body Model(3)	Y, Z, and GND		13	kV
			All pins		5	
		Charged-Device Model(4)	All pins		1	
T_{stg}	Storage temperature range(5)			–65	150	°C
	Continuous power dissipation			See Dissipation Rating Table		
	Lead temperature 1,6 mm (1/16 in) from case for 10 s				260	°C

(1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) All voltage values, except differential I/O bus voltages, are with respect to GND.
(3) Tested in accordance with JEDEC standard 22, Test Method A114-A.
(4) Tested in accordance with JEDEC standard 22, Test Method C101.
(5) Long-term high-temperature storage and/or extended use at maximum recommended operating conditions may result in a reduction of overall device life. See http://www.ti.com/ep_quality for additional information on enhanced plastic packaging.

DISSIPATION RATING TABLE

PACKAGE	JEDEC BOARD MODEL	$T_A \leq 25°C$ POWER RATING	DERATING FACTOR(1) ABOVE $T_A = 25°C$	$T_A = 70°C$ POWER RATING	$T_A = 125°C$ POWER RATING
20-pin DW	Low K	1483 mW	11.86 mW/°C	949 mW	297 mW
	High K	2753 mW	22 mW/°C	1762 mW	553 mW

(1) This is the inverse of the junction-to-ambient thermal resistance when board mounted with no air flow.

Recommended Operating Conditions

			MIN	NOM	MAX	UNIT
V_{CC}	Supply voltage		4.75	5	5.25	V
	Voltage at any bus terminal	Y, Z	–7		12	V
V_{IH}	High-level input voltage	A, EN	2		V_{CC}	V
V_{IL}	Low-level input voltage	A, EN	0		0.8	V
	Output current		–60		60	mA
T_A	Operating free-air temperature		–55		125	°C

Electrical Characteristics

over recommended operating conditions

PARAMETER		TEST CONDITIONS		MIN	TYP(1)	MAX	UNIT
V_{IK}	Input clamp voltage	I_I = –18 mA		–1.5	–0.77		V
V_O	Open-circuit output voltage	Y or Z, No load		0		V_{CC}	V
$\lvert V_{OD(SS)} \rvert$	Steady-state differential output voltage magnitude(2)	No load (open circuit)		3		V_{CC}	V
		R_L = 54 Ω, See Figure 1		0.8	1.6	2.5	
		With common-mode loading, See Figure 2		0.8	1.6	2.5	
$\Delta V_{OD(SS)}$	Change in steady-state differential output voltage between logic states	See Figure 1		–0.1		0.1	V
$V_{OC(SS)}$	Steady-state common-mode output voltage	See Figure 3		2	2.4	2.8	V
$\Delta V_{OC(SS)}$	Change in steady-state common-mode output voltage between logic states	See Figure 3		–0.04		0.04	V
I_I	Input current	A, G, $\overline{G}$		–-70		70	µA
I_{OS}	Short-circuit output current	V_{TEST} = –7 V to 12 V, See Figure 7	V_I = 0 V	–200		200	mA
			V_I = V_{CC}				
I_{OZ}	High-impedance-state output current		EN at 0 V	–50		50	µA
$I_{O(OFF)}$	Output current with power off		V_{CC} = 0 V	–10		10	
I_{CC}	Supply current	V_I = 0 V or V_{CC}, No load	All drivers enabled			25	mA
			All drivers disabled			1.5	

(1) All typical values are at V_{CC} = 5 V and 25°C.
(2) The minimum V_{OD} may not fully comply with TIA/EIA-485-A at operating temperatures below 0°C. System designers should take the possibility of lower output signal into account in determining the maximum signal transmission distance.

Switching Characteristics

over recommended operating conditions

PARAMETER		TEST CONDITIONS		MIN	TYP	MAX	UNIT
t_{PLH}	Propagation delay time, low- to high-level output	R_L = 54 Ω, C_L = 50 pF, See Figure 4	T_A=25°C	4.0	8	11	ns
			T_A= -55°C to 125°C	4.0		16	ns
t_{PHL}	Propagation delay time, high- to low-level output		T_A=25°C	4.0	8	11	ns
			T_A= -55°C to 125°C	4.0		16	ns
t_r	Differential output voltage rise time		T_A=25°C	3	7.5	11	ns
			T_A= -55°C to 125°C	3		24	ns
t_f	Differential output voltage fall time		T_A=25°C	3	7.5	11	ns
			T_A= -55°C to 125°C	3		24	ns
$t_{sk(p)}$	Pulse skew $\|t_{PLH} - t_{PHL}\|$				0.6		ns
					0.6		
$t_{sk(o)}$	Output skew(1)				2		ns
$t_{sk(pp)}$	Part-to-part skew(2)				3		ns
t_{PZH}	Propagation delay time, high impedance to high-level output	See Figure 5				25	ns
t_{PHZ}	Propagation delay time, high-level output to high impedance					25	ns
t_{PZL}	Propagation delay time, high impedance to low-level output	See Figure 6				30	ns
t_{PLZ}	Propagation delay time, low-level output to high impedance					20	ns

(1) Output skew ($t_{sk(o)}$) is the magnitude of the time delay difference between the outputs of a single device with all of the inputs connected together.
(2) Part-to-part skew ($t_{sk(pp)}$) is the magnitude of the difference in propagation delay times between any specified terminals of two devices when both devices operate with the same input signals, the same supply voltages, at the same temperature, and have identical packages and test circuits.

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
