# DM74ALS74A Dual D Positive-Edge-Triggered Flip-Flop with Preset and Clear

## **General Description**

The DM74ALS74A contains two independent positive edge-triggered flip-flops. Each flip-flop has individual D, clock, clear and preset inputs, and also complementary Q and  $\overline{Q}$  outputs.

Information at input D is transferred to the Q output on the positive going edge of the clock pulse. Clock triggering occurs at a voltage level of the clock pulse and is not directly related to the transition time of the positive going pulse. When the clock input is at either the HIGH or LOW level, the D input signal has no effect.

Asynchronous preset and clear inputs will set or clear Q output respectively upon the application of low level signal.

### **Features**

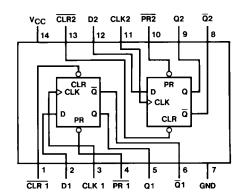

- Switching specifications at 50 pF
- $\blacksquare$  Switching specifications guaranteed over full temperature and  $V_{CC}$  range
- Advanced oxide-isolated, ion-implanted Schottky TTL process
- Functionally and pin-for-pin compatible with Schottky and LS TTL counterpart
- Improved AC performance over LS74 at approximately half the power

# **Ordering Code:**

| Order Number | Package Number | Package Description   |
|--------------|----------------|---|
| DM74ALS74AM  | M14A           | 14-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-012, 0.150 Narrow |
| DM74ALS74ASJ | M14D           | 14-Lead Small Outline Package (SOP), EIAJ TYPE II, 5.3mm Wide               |
| DM74ALS74AN  | N14A           | 14-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-001, 0.300 Wide       |

Devices also available in Tape and Reel. Specify by appending the suffix letter "X" to the ordering code.

# **Connection Diagram**

#### **Function Table**

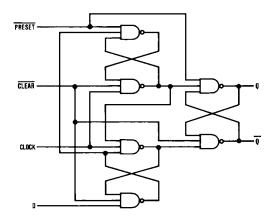

|    | Inp | uts        | Out | puts       |                  |
|----|-----|------------|-----|------------|------------------|
| PR | CLR | CLK        | D   | Q          | Q                |
| L  | Н   | Х          | Χ   | Н          | L                |
| Н  | L   | X          | Χ   | L          | Н                |
| L  | L   | X          | Χ   | H (Note 1) | H (Note 1)       |
| Н  | Н   | $\uparrow$ | Н   | Н          | L                |
| Н  | Н   | $\uparrow$ | L   | L          | Н                |
| Н  | Н   | L          | Χ   | $Q_0$      | $\overline{Q}_0$ |

- L = LOW State
- H = HIGH State
- X = Don't Care
- ↑ = Positive Edge Transition
- Q<sub>0</sub> = Previous Condition of Q

**Note 1:** This condition is nonstable; it will not persist when preset and clear inputs return to their inactive (HIGH) level. The output levels in this condition are not guaranteed to meet the V<sub>OH</sub> specification.

# **Absolute Maximum Ratings**(Note 2)

Supply Voltage 7V Input Voltage 7V Operating Free Air Temperature Range 0°C to +70°C

Storage Temperature Range –65°C to +150°C

Typical  $\theta_{JA}$ 

 N Package
 87.0°C/W

 M Package
 117.0°C/W

Note 2: The "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. The device should not be operated at these limits. The parametric values defined in the Electrical Characteristics tables are not guaranteed at the absolute maximum ratings. The "Recommended Operating Conditions" table will define the conditions for actual device operation.

#### LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

- Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
