# Quad 2-line to 1-line selector/multiplexer, non-inverting (3-State)

74F257A

#### **FEATURES**

- Industrial range available (-40°C to +85°C)
- Multifunction capability
- Non-inverting data path
- 3-State outputs
- See 74F258A for inverting version

#### **DESCRIPTION**

The 74F257A has four identical 2-input multiplexers with 3-State outputs which select 4 bits of data from two sources uncer control of a common Select (S) input. The I0a inputs are selected when the common Select input is Low and the I1n inputs are selected when the common Select input is High. Data appears at the outputs in true non-inverted form from the selected inputs. The 74F257A is the logic implementation of a 4-pole, 2-position switch where the position of the switch is determined by the logic levels supplied to the common Slect input. Outputs are forced to a high impedance "off" state when the Output Enable  $(\overline{\rm OE})$  is High. All but one device must be in high impedance state to avoid currents that would exceed the maximum rating if the outputs were tied together. Design of the Output Enable signals must ensure that there is no overlap when outputs of 3-state devices were tied together.

#### **PIN CONFIGURATION**

| TYPE    | TYPICAL<br>PROPAGATION DELAY | TYPICAL<br>SUPPLY CURRENT<br>(TOTAL) |
|---------|------------------------------|--------------------------------------|
| 74F257A | 4.3ns                        | 12mA                                 |

#### ORDERING INFORMATION

| DESCRIPTION        | COMMERCIAL RANGE $V_{CC} = 5V \pm 10\%$ , $T_{amb} = 0^{\circ}C$ to $+70^{\circ}C$ |           |          |  |  |  |
| 16-pin plastic DIP | N74F257AN  | 174F257AN | SOT38-4  |  |  |  |
| 16-pin plastic SO  | N74F257AD  | I74F257AD | SOT109-1 |  |  |  |

#### INPUT AND OUTPUT LOADING AND FAN-OUT TABLE

| PINS     | DESCRIPTION                      | 74F (U.L.) HIGH/LOW | LOAD VALUE HIGH/LOW |
|----------|----------------------------------|---------------------|---------------------|
| I0n, I1n | Data inputs                      | 1.0/1.0             | 20μA/0.6mA          |
| S        | Common Select input              | 1.0/1.0             | 20μA/0.6mA          |
| ŌĒ       | Output Enable input (active Low) | 1.0/1.0             | 20μA/0.6mA          |
| Ya – Yd  | Data outputs                     | 150/33              | 3.0mA/20mA          |

#### NOTE:

One (1.0) FAST unit load is defined as:  $20\mu\text{A}$  in the High state and 0.6mA in the Low state.

## NOTES:

- 1. For conditions shown as MIN or MAX, use the appropriate value specified under recommended operating conditions for the applicable type.
- All typical values are at V<sub>CC</sub> = 5V, T<sub>amb</sub> = 25°C.
   Not more than one output should be shorted at a time. For testing I<sub>OS</sub>, the use of high-speed test apparatus and/or sample-and-hold techniques are preferable in order to minimize internal heating and more accurately reflect operational values. Otherwise, prolonged shorting of a High output may raise the chip temperature well above normal and thereby cause invalid readings in other parameter tests. In any sequence of parameter tests, I<sub>OS</sub> tests should be performed last.
- 4. Measure ICC with all outputs open and inputs grounded.

# Quad 2-line 1-line selector/multiplexer, non-inverting (3-State)

74F257A

# SO16: plastic small outline package; 16 leads; body width 3.9 mm

SOT109-1

### DIMENSIONS (inch dimensions are derived from the original mm dimensions)

| DEFINITIONS               |   |  |  |  |  |
|---------------------------|---|--|--|--|--|
| Data Sheet Identification | Product Status  | Definition   |  |  |  |
| Objective Specification   | Formative or in Design  This data sheet contains the design target or goal specifications for product development. S may change in any manner without notice. |  |  |  |  |
| Preliminary Specification | Preproduction Product   | This data sheet contains preliminary data, and supplementary data will be published at a later date. Philips Semiconductors reserves the right to make changes at any time without notice in order to improve design and supply the best possible product. |  |  |  |
| Product Specification     | Full Production   | This data sheet contains Final Specifications. Philips Semiconductors reserves the right to make changes at any time without notice, in order to improve design and supply the best possible product.  |  |  |  |

Philips Semiconductors and Philips Electronics North America Corporation reserve the right to make changes, without notice, in the products, including circuits, standard cells, and/or software, described or contained herein in order to improve design and/or performance. Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products, and makes no representations or warranties that these products are free from patent, copyright, or mask work right infringement, unless otherwise specified. Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

#### LIFE SUPPORT APPLICATIONS

Philips Semiconductors and Philips Electronics North America Corporation Products are not designed for use in life support appliances, devices, or systems where malfunction of a Philips Semiconductors and Philips Electronics North America Corporation Product can reasonably be expected to result in a personal injury. Philips Semiconductors and Philips Electronics North America Corporation customers using or selling Philips Semiconductors and Philips Electronics North America Corporation Products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors and Philips Electronics North America Corporation for any damages resulting from such improper use or sale.

Philips Semiconductors 811 East Arques Avenue P.O. Box 3409 Sunnyvale, California 94088–3409 Telephone 800-234-7381 Philips Semiconductors and Philips Electronics North America Corporation register eligible circuits under the Semiconductor Chip Protection Act.
