## Functional Description

The AC/ACT139 is a high-speed dual 1-of-4 decoder/ demultiplexer. The device has two independent decoders, each of which accepts two binary weighted inputs $\left(\mathrm{A}_{0}-\mathrm{A}_{1}\right)$ and provides four mutually exclusive active-LOW outputs $\left(\overline{\mathrm{O}}_{0}-\overline{\mathrm{O}}_{3}\right)$. Each decoder has an active-LOW enable ( $\overline{\mathrm{E}}$ ) When $\bar{E}$ is HIGH all outputs are forced HIGH. The enable can be used as the data input for a 4-output demultiplexer application. Each half of the AC/ACT139 generates all four minterms of two variables. These four minterms are useful in some applications, replacing multiple gate functions as shown in Figure 1, and thereby reducing the number of packages required in a logic network.

| Junction Temperature ( $\mathrm{T}_{\mathrm{J}}$ ) |  | $\mathrm{V}_{\text {CC }} @ 4.5 \mathrm{~V}, 5.5 \mathrm{~V}$ 退 $125 \mathrm{mV} / \mathrm{ns}$ |
| PDIP | $140^{\circ} \mathrm{C}$ | Note 1: Absolute maximum ratings are those values beyond which damage to the device may occur. The databook specifications should be met, without exception, to ensure that the system design is reliable over its power supply, temperature, and output/input loading variables. Fairchild does not recommend operation of FACT ${ }^{\text {TM }}$ circuits outside databook specifications. |

LIFE SUPPORT POLICY
FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
2. A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
