

Low voltage dual SP4T switch

Features

- Ultra low power dissipation:
 - I_{CC} = 0.1 μ A (max.) at T_A = 25 °C
- Low "ON" resistance:
 - R_{ON} = 4.6 Ω (T_A = 25 °C) at V_{CC} = 4.3 V
 - R_{ON} = 5.8 Ω (T_A = 25 °C) at V_{CC} = 3.0 V
- Wide operating voltage range:
 - V_{CC} (Opr) = 1.65 to 4.3 V single supply
- 4.3 V tolerant and 1.8 V compatible threshold on digital control input at V_{CC} = 2.3 to 3.0 V
- Typical bandwidth (-3dB) at 300 MHz on all channels
- Latch-up performance exceeds 300 mA per JESD 78, Class II
- ESD performance exceeds JESD22
 - 2000-V Human body model (A114-A)

Description

The STG3482 is a high-speed CMOS low voltage dual analog SP4T (single pole four throw) switch or 4:1 multiplexer/demultiplexer switch fabricated in silicon gate C²MOS technology. It is designed to operate from 1.65 to 4.3 V, making this device ideal for portable applications.

By controlling the SEL1 and SEL2, one of the independent channels will be connected to the common channel. An /OE pin is also available in this device to disconnect all the switches.

Additional key features are fast switching speed, break-before-make delay time and ultra low power consumption. All inputs and outputs are equipped with protection circuits against static discharge, giving them ESD immunity and transient excess voltage.

STG3482 Maximum rating

3 Maximum rating

Stressing the device above the rating listed in the "Absolute maximum ratings" table may cause permanent damage to the device. These are stress ratings only and operation of the device at these or any other conditions above those indicated in the Operating sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability. Refer also to the STMicroelectronics SURE Program and other relevant quality documents.

Table 4. Absolute maximum ratings

Symbol	Parameter	Value	Unit
V _{CC}	Supply voltage	-0.5 to 5.5	V
VI	DC input voltage	-0.5 to V _{CC} + 0.5	٧

Package mechanical data 5

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com.
