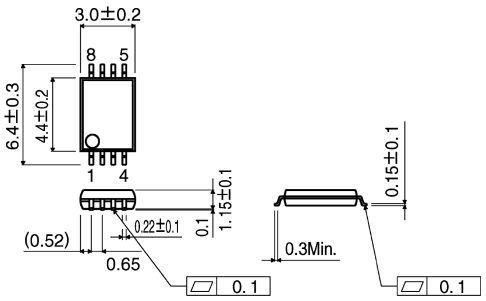
Variable output, negative voltage IC
BD6111FV

Description

The BD6111FV is a charge-pump, negative supply IC containing a regulator. The charge pump block inverts a positive power supply voltage that is inputted to VBAT pin into a negative voltage and outputs it from the NEGOUT pin. The regulator block stabilizes this negative voltage with low-noise and outputs it from OUT pin. Output voltage values of this regulator can be controlled by voltage value inputted to VIN pin and determined by OUT=-1.6 ×VIN .

Dimension(Units:mm)



SSOP-B8

Features

1) Highly efficient, built-in inverting charge pump
2) Built-in variable, negative voltage linear regulator.
3) Built-in stand-by switch circuit (pull down resistor 1M Ω)
4) Compact SSOP-B8 package

Applications

Compact information computer terminal, such as PDC, PHS and PDA.
Battery driving apparatus requiring negative voltage.

Absolute Maximum Ratings (Ta=25˚C)

Parameter	Symbol	Limits	Unit
Maximum applied power supply voltage	V_{BAT}	-0.3 ~ +6.0	V
Maximum applied input voltage	V_{IN}	-0.3 ~ +6.0	V
Power dissipation	Pd	300 *	mW
Operating temperature range	Topr	-20 ~ +70	˚C
Storage temperature	Tstg	-55 ~ +125	˚C

*Derating:3.0mW/˚C for operation above Ta=25˚C.

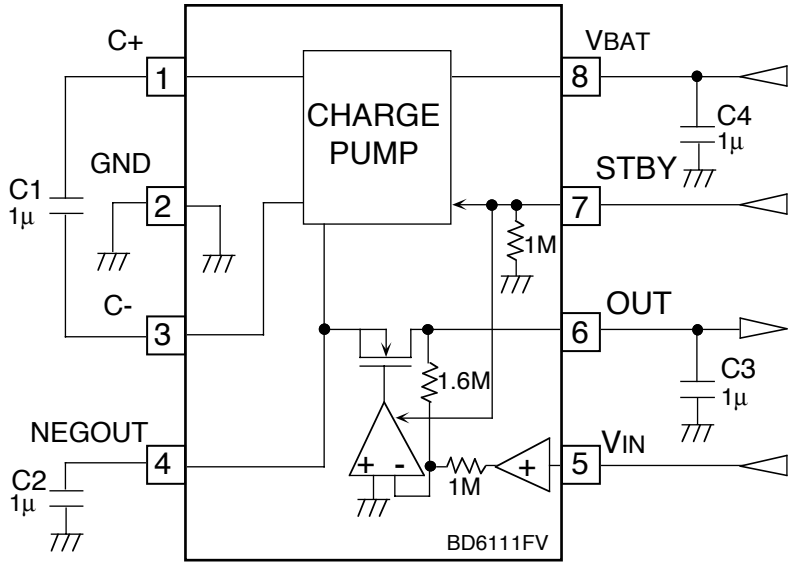
Recommended Operating Conditions (Ta=25˚C)

Parameter	Symbol	Min.	Typ.	Max.	Unit
Power supply voltage	V_{BAT}	2.5	-	5.5	V

Electrical characteristics (Unless otherwise noted: Ta=25˚C, VBAT=3.6V, STBY=3.6V)

Parameter		Symbol	Min.	Typ.	Max.	Unit	Conditions
Circuit current		IQ1	-	0.6	3	mA	No-load, VIN=1.25V
Stand-by current		IQ2	-	-	5	μA	No-load, VIN=0V, STBY=0V
<Regulator block>							
Output voltage		Vo	-2.1	-2.0	-1.9	V	VIN=1.25V, IOUT=10mA
Output ripple voltage		VRR	-	-70	-60	dBV	VIN=1.25V, IOUT=10mA
Maximum output current		IOMAX	20	-	-	mA	VIN=1.25V, VOUT ≦Vo+0.1V
Load stability		ΔVOL	-	2	40	mV	VIN=1.25V, Io=0~10mA
Input stability		ΔVOI	-	5	40	mV	
VIN pin inflow current		IIN	-	0	2	μA	VIN=1.25V
<Charge pump block>							
Oscillation frequency		fosc	-	120	-	kHz	
Voltage conversion efficiency		VCE	-	97	-	%	No-load, NEGOUT monitor
Stand-by pin pull down resistor		RSTBY	0.6	1.0	1.6	MΩ	
Stand-by pin Control voltage	Operation	VIH	2.0	-	-	V	
	Non-operation	VIL	-0.3	-	0.3	V	

Application circuit



Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document use silicon as a basic material.
  Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).
Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of with would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.
In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
