Note1 : Pulse width PW≤1us,300pps.

Note2 : This device is regarded as a two terminal device : pins 1 and 3 are shorted together, as are pins 4,5 and 6.

Note3 : The detector of this product requires a power supply voltage (VCC) of 4.5 V or higher for stable operation.
If the VCC is lower than this value, an ICC may increase, or an output may be unstable.
Be sure to use the product after checking the supply current, and the operation of a power-on/-off.
