## FOD050L, FOD250L: Single Channel FOD053L: Dual Channel <br> LVTTL/LVCMOS 3.3V High Speed Transistor Optocouplers

## Features

- Low power consumption

■ High speed
■ Available in single channel 8-pin DIP (FOD250L), 8-pin SOIC (FOD050L) or dual channel 8-pin SOIC (FOD053L)
■ Superior CMR $-\mathrm{CM}_{\mathrm{H}}=50 \mathrm{kV} / \mu \mathrm{s}$ (typical) and $\mathrm{CM}_{\mathrm{L}}=35 \mathrm{kV} / \mu \mathrm{s}$ (typical)
■ Guaranteed performance over temperature: $0^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$
■ U.L. recognized (File \# E90700)
■ VDE pending

## Applications

- Line receivers
- Pulse transformer replacement

■ High speed logic ground isolation: LVTTL/LVCMOS

- Wide bandwidth analog coupling

## Description

The FOD250L, FOD050L and FOD053L optocouplers consist of an AIGaAs LED optically coupled to a high speed photodetector transistor. These devices are specified for operation at a 3.3 V supply voltage.

A separate connection for the bias of the photodiode improves the speed by several orders of magnitude over conventional
phototransistor optocouplers by reducing the basecollector capacitance of the input transistor.
An internal noise shield provides superior common mode rejection of $\mathrm{CM}_{\mathrm{H}}=50 \mathrm{kV} / \mathrm{ms}$ (typical) and $\mathrm{CM}_{\mathrm{L}}=$ $35 \mathrm{kV} / \mathrm{ms}$ (typical).

Absolute Maximum Ratings ( $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$ unless otherwise specified.)
Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

## Notes:

2. The $1.9 \mathrm{k} \Omega$ load represents 1 TTL unit load of 1.6 mA and $5.6 \mathrm{k} \Omega$ pull-up resistor.
3. The $4.1 \mathrm{k} \Omega$ load represents 1 LSTTL unit load of 0.36 mA and $6.1 \mathrm{k} \Omega$ pull-up resistor.
4. Common mode transient immunity in logic high level is the maximum tolerable (positive) $d V_{\mathrm{cm}} / \mathrm{dt}$ on the leading edge of the common mode pulse signal $\mathrm{V}_{\mathrm{CM}}$, to assure that the output will remain in a logic high state (i.e., $\mathrm{V}_{\mathrm{O}}>2.0 \mathrm{~V}$ ). Common mode transient immunity in logic low level is the maximum tolerable (negative) $\mathrm{dV}_{\mathrm{cm}} / \mathrm{dt}$ on the trailing edge of the common mode pulse signal, $\mathrm{V}_{\mathrm{CM}}$, to assure that the output will remain in a logic low state (i.e., $\mathrm{V}_{\mathrm{O}}<0.8 \mathrm{~V}$ ).
5. Device is considered a two terminal device: Pins 1, 2, 3 and 4 are shorted together and Pins 5, 6, 7 and 8 are shorted together.

## DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY，FUNCTION，OR DESIGN．FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN；NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS，NOR THE RIGHTS OF OTHERS．THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD＇S WORLDWIDE TERMS AND CONDITIONS，SPECIFICALLY THE WARRANTY THEREIN， WHICH COVERS THESE PRODUCTS．

## LIFE SUPPORT POLICY

FAIRCHILD＇S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION．

As used herein：

1．Life support devices or systems are devices or systems which，（a）are intended for surgical implant into the body or（b）support or sustain life， and（c）whose failure to perform when properly used in accordance with instructions for use provided in the labeling，can be reasonably expected to result in a significant injury of the user．

2．A critical component in any component of a life support，device，or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system，or to affect its safety or effectiveness．

## ANTI－COUNTERFEITING POLICY

Fairchild Semiconductor Corporation＇s Anti－Counterfeiting Policy．Fairchild＇s Anti－Counterfeiting Policy is also stated on our external website，waw．fairchildsemi．com， under Sales Support．
Counterfeiting of semiconductor parts is a growing problem in the industry．All manufacturers of semiconductor products are experiencing counterfeiting of their parts． Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation，substandard performance，failed applications， and increased cost of production and manufacturing delays．Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts．Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above．Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts，have full traceability，meet Fairchild＇s quality standards for handling and storage and provide access to Fairchild＇s full range of up－to－date technical and product information． Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise．Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources．Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors．
