ES1000

Raychem

Semirigid, adhesive-lined heat-shrinkable tubing (extended temperature range)

Clear, adhesive-lined ES1000 heat-shrinkable tubing is specifically designed for environmental sealing and electrical insulation of wire splices, terminations, and components where see-through inspection is required.

ES1000 tubing has an outer jacket of radiation-crosslinked, semirigid polyolefin. The jacket is mechanically tough, providing strain relief and

abrasion protection of wire splices and mechanically sensitive components. The inner layer of the tubing is a unique hot-melt adhesive, specially formulated to seal to most types of commercial wire insulation, and to perform well at an extended temperature range. The thick adhesive forms an effective barrier against fluids and moisture, helping to protect the harness from the effects of corrosion and water wicking.

Because ES1000 tubing has a high shrink ratio, only a few sizes are needed to cover a wide range of splice and component diameters. ES1000 tubing dimensions have been engineered to provide low-cost sealing solutions on multiple-wire splices (up to seven wires per side), using standard Raychem application equipment.

Temperature rating

Full recovery temperature:	135°C
Continuous operating temperature:	-40°C to 130°C

Specifications*

Specifications		.91	
Туре	Raychem	UL

ES1000-No.4	17.78 <i>0.700</i>	4.45 <i>0.175</i>	2.41 0.095	1.04 <i>0.041</i>	1.37 <i>0.054</i>

^{**}Wall thickness will be less if tubing recovery is restricted during shrinkage.

Ordering information

Color	Clear
Size selection	Always order the largest size that will shrink snugly over the component being covered.
Standard packaging	Cut pieces. See reverse for information on standard cut lengths.
Marking	Tubing will be marked with the number size (for example, ES-1, ES-2, ES-3, or ES-4).
Ordering description	Specify product name, size, color, and cut length; for example, ES1000-No.2-X-50MM (X=Clear).

Specification values

	Property	Unit	Requirement	Method of test
Physical	Dimensions	mm (inches)	See reverse	ASTM D 2671
	Longitudinal change	percent	0, –10	ASTM D 2671
	Tensile strength*	psi <i>(MPa)</i>	1500 <i>(10.3)</i> minimum	ASTM D 2671
	Ultimate elongation*	percent	200 minimum	ASTM D 2671
	Low-temperature flexibility (–40°C/-40°F)		No cracking	ASTM D 2671
	Heat shock (4 hours at 225°C/437°F)		No cracking of outer jacket	ASTM D 2671
	Heat aging (168 hours at 175°C/ <i>347°F</i>)	No cracking		See note below
Electrical	Volume resistivity	ohm-cm	1.0 x 10 ¹² minimum	ASTM D 257
	Dielectric strength (jacket only)**	volts/mil	350 minimum	ASTM D 149
Chemical	Water absorption	percent	1.0 maximum	ASTM D 570 Procedure A

Note: Consult Raychem RT-1113 for specific details about test procedures.
