Store Your World in Ours®

Does your mobile phone world consist of talking at will, grooving to tunes, checking out the latest video, or taking photos—all while you're out and about? Fit it all into your phone with a SanDisk memory card—the easy solution for taking your favorite tunes, cool videos, and great photos with you, wherever you go. Choose a SanDisk card that fits your phone's removable memory card slot, and in addition to adding more memory you also get the reliability that comes from the world leader in flash memory cards. More memory, more fun, more of your world.

SanDisk® microSD™

The SanDisk microSD removable memory cards are the newest standard in SD flash memory designed for the latest generation of small, ultra-thin mobile phones. The microSD cards may be used in any SD-compatible device with the use of either a miniSD-adaptor, or an SD-adaptor. Capacities: 1GB and 2GB.

SanDisk® microSDHC™

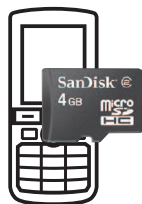

SanDisk has introduced a new category of “high-capacity” memory cards: microSDHC. These high-capacity solutions use the same form-factor as microSD, but have significantly more storage space and faster transfer rates allowing for more rapid upload and download of files between the card and a PC. Mobile devices must support SDHC memory card solutions to be compatible. Capacity: 4GB.

*1 gigabyte (GB) = 1 billion bytes. Some of the listed capacity is used for formatting and other functions, and thus is not available for data storage.

SanDisk® Memory Stick Micro™ (M2)

The SanDisk Memory Stick Micro (M2) card provides removable high-capacity storage for Sony Ericsson's newest ultra-thin mobile phones. The new M2 card includes an adapter so that you can use the card in any device that takes a Memory Stick PRO Duo™ card. Capacities: 1GB, 2GB and 4GB.

Approximate values based on the mobile phone model, file resolution and compression.

MobileMate™ Micro (SDDR-121) Memory Card Reader

The SanDisk MobileMate Micro flash memory card reader is making the transfer of your digital music, videos, photos, and games between your card and PC quick and convenient. With a USB connection, you will be able to take advantage of USB 2.0 transfer speeds to move files. The MobileMate Micro is compatible with microSD, microSDHC, and Memory Stick Micro (M2) memory cards. Whether you carry it in your pocket, or attach it with a lanyard (included) to your phone, you will find you won't want to go anywhere without it!

MUSIC¹ or VIDEOS² or PHOTOS³

1GB*	250 songs	or	320 minutes	or	2400 images
2GB*	500 songs	or	640 minutes	or	4800 images
4GB*	1000 songs	or	1280 minutes	or	9600 images

¹Approximation based on 4 minute songs at 128kb/MP3.

²Approximate number of compressed JPEG images from a 2MP camera. Actual numbers of photos may vary based on camera model, resolution and compression.

³Approximation for MPEG-4 video at 384 kbps. Actual time may vary based on resolution and compression.
