

850nm Fiber Optic Receiver Module in Dual-in-Line Package

OPF2416, OPF2416T, OPF2416TC

Technical Data

Features

- 850 nm wavelength
- Link distance up to 2 km
- Data rates up to 155 Mbps
- Wide operating temperature range
- Optimized for use with 62.5/125 μ m and 50/125 μ m Multimode Fiber
- ST[®] Receptacle
- Wave Solderable Dual-in-Line Package

Description

The OPF0400 series is a cost effective solution for 850 nm fiber optic link designs. The transmitter and receiver pair are designed for use with multimode optical fiber with either 50/125 μ m or 62.5/125 μ m diameters. This fiber optic pair is housed in a space saving, auto-insertable package that is compatible with most wave solder processes.

Receiver

OPF2416 is a low cost solution for high speed, fiber optic communications designs. The internal lensing of this receiver's design allows optimal response from fiber sizes of 100 μ m and below.

The receiver is comprised of a high speed, low noise, photodiode coupled to a transimpedance amplifier (TIA). The photodiode/TIA combination produces an output voltage that is proportional in the input light amplitude. This hybrid approach solves many of the problems of high speed data link designs by placing the photodiode close to the TIA. The amplification of the TIA makes the output much less susceptible to EMI.

The output of the OPF2416 is an analog, low impedance, emitter follower voltage source. Subsequent circuitry can be utilized to convert the analog voltage to ECL/TTL for digital data rates up to 155 Mbps.

The OPF2416 is available with either standard or threaded panel mount ST[®] receptacles. The threaded version is also available in conductive plastic. Refer to the part number guide for more details.

ST[®] is a registered trademark of OFS Fitel USA.

Absolute Maximum Ratings

Storage Temperature Range	-55 to +85 °C
Operating Temperature Range	-40 to +85 °C
Lead Soldering Temperature	260 °C for 10 Seconds
Supply Voltage Range	-0.5 to 6.0 V
Output Current	25mA
Output Pin Voltage	-0.5 V

Recommended AC coupled receiver circuit
