#### **Electrical Characteristics for Series**

| % of Ampere<br>Rating | Opening Time at 25°C |  |
|-----------------------|----------------------|--|
| 100%                  | 4 hours, Minimum     |  |
| 200%                  | 5 seconds, Maximum.  |  |
| 300%                  | 0.2 seconds, Maximum |  |

### **Description**

The 434 series fast-acting surface mount fuse series is an ultra small (0603 size) thin-film device designed for secondary protection of circuits used in space constrained applications such as hand-held portable electronic devices.

For RoHS compliant and lead-free design, please refer to the Littelfuse 467 series thin film fuse.

#### **Features**

- The SlimLine 0603 fuse is an extremely small, low profile design (0603 chip size) utilizing thin-film technology to achieve precise control of electrical characteristics.
- The lower height profile produces a flat surface for improved performance in pick-and-place operations and an alternate solution for height critical applications.

## **Applications**

Secondary protection for space constrained applications such as:

- Cell phones
- DVD players
- Battery packs
- · Hard disk drives.
- Digital cameras
