

Compact Power Line Shelves

Ordering Guide – Models: J85480S1 and J2007001

The CPL family of shelves is 1U (1.75") high, mounts in 19-inch wide frames and provides up to 11kW of 48V output power per shelf. There are two types of shelves. Model **J85480S1** has three or four slots for rectifiers, converters (PEMs), CP843A Pulsar controller with display or distribution modules. Model **J2007001** is similar with four slots for rectifiers or distribution, and also includes space for a CP841A Pulsar Edge controller without sacrificing a slot.

Model J85480S1

- Only 16.81" wide fits inside equipment that is designed into a 19" rack
- Two DC Outputs may be common or split. Each output bus is rated for 100A with two-hole lug landings for 2 AWG wire.
- Choose between IEC-320 or AMP Mate_N_Lok for AC input connections.
- Select between analog, RS485 or dual/redundant I²C communications.
- Adjustable mounting ears for either flush front or multiple set back positions.
- Some shelves are stackable up to 8 high with 32 paralleled power supplies.
- Optional Plug-N-Play CP843A controller w/display & interactive panel

Model J2007001

- 17.375" wide fits into a 19" rack
- Single DC output rated for 200A with two-hole lug landings for up to 2/0 AWG cable.
- Choose between IEC-320 or Molex Mini-Fit SR for AC input connections. Single, dual or quad input feeds
- RS485 communications.
- Adjustable mounting ears with multiple set back positions.
- Up to 3 shelves may be interconnected with bus straps for DC outputs for a 600A system
- Plug-N-Play CP841A controller with front access craft port, rear access LAN and alarm connections
- Select Shelves include Distribution Modules

J85480S1 Shelves

List	Max Power	# AC Inputs	AC Input Plug	DC Output Bus	Max Rectifier Size	Communications Features	
						Shelf Controller	Protocol
1	8kW	4	IEC-320, C13	Common	CP2000	CP843A	Analog, I ² C RS485
4	8kW		IEC-320, C13	Common			
6	8kW		AMP Mate_N_Lok	Common			
7	11kW		AMP Mate_N_Lok	Split	CP2725	No	Analog, I ² C
9	8kW		IEC-320, C13	Split	CP2000		Analog, I ² C
List	Capacity	# DC Inputs	DC Input Plug	DC Output Bus	Max PEM Size	Communications Features	
						Controller	Protocol
14	8kW	2	AMP Power-Blade	Split	CP2000	No	Analog, I ² C

Notes:

List 1 shelf allows side access to CP843A Pulsar Controller Outputs

Split Bus Shelves cannot be paralleled together. Up to 8 Common Bus Shelves may be connected together.

J85480S1 Shelves (Continued)

Rear Views

Lists 1, 4, 9

Lists 6, 7

Lists 14

DC Output Connections

- Each Output Bus is rated for 100A and up to 2 gage two-hole lugs.
- M6 nuts with conical washers provided.
- Touch-Safe plastic covers around output buses.

DC Split Output Bus Option

- Split Vout (-) buses on either side of the shelf. Vout (+) is common to both sections.
- Common I²C communications. +5V bias maintains communications even during a feeder fault. Each bus may be independently controlled
- Multiple shelves may not be paralleled together.

J85480S1 Shelves (Continued)

Controller Options

- NE843G is a standalone 1U high Pulsar Controller for use with J85480S1 CP shelves
- CP843A installs in slot 1 of a J85480S1 List 1 shelf. Connections to the controller are made on the left side as shown.
- CP843A controller comes with wireset that plugs into J1 connector enabling the controller.

Controllerless Operation

- Lists 4 and 6 ship with a jumper 881545-2 installed on connector J1 pins 21 and 23. This allows the shelf to be powered without a controller. Remove this jumper if controller cable installed.
- CP843A controller ships with cc848838284 connector that plugs into J1 on a List 1 shelf activating the controller.
- Lists 7, 9 and 14 require cc848836107 connector be installed in J1 to allow the shelf to power up without a controller.

Communication Signals

J1 – Controller Cable Connection:

848738245 ribbon cable is for Lists 1, 4, 6.

J2 – Multi-shelf Connection:

848738253 ribbon cable is for List 1, 4, 6. Lists 7, 9, 14 are split bus shelves that cannot be daisy chained together.

J2007001 Shelves (AC Input, DC Output)

List	Max Power	Slots/Feeds	AC Input Plug	DC Output Bus	Max Rect Size	Communications Features	
						Controller	Protocol
2	8.4kW	3 / 3	Molex Mini-Fit Sr	Common	CP2725	CP841A	RS485
4	11kW	4 / 4	Molex Mini-Fit Sr				
5	11kW	4 / 2	Molex Mini-Fit Sr				
6	11kW	4 / 4	IEC-320, C19				

Notes:

CP841A Edge Controller ships separately.

Up to 3 Shelves may be Interconnected.

List 2 Shelf includes a 100A DC distribution module with Latching LVBD, two 30A circuit breakers and four GMT fuse positions.

J2007001 Shelves (Continued)

Rear Views

List 2

- F1, F2 and F3: Molex 39-01-2028 housing with 44476-3111 16awg contact or 44476-1111 18-24awg contacts
- F4, CB1 and CB2: Molex 42816-0212 housing with 42815-0011 10-12awg contact
- AC Input: 42816-0612 housing with 42815-0011 10-12awg contact
- Battery Input Bus is rated for 100A and up to 2/0 gage two-hole lugs for ¼-20 studs on 5/8" centers.

Front View

Rear View

List 4

- AC Input: 42816-0312 housing with 42815-0031 10-12awg contact or 42815-0031 8awg contact.
- DC Output Bus is rated for 200A for two 2 gage or one 2/0 gage two-hole lugs (¼-20 studs on 5/8" centers).

Rear View

List 5

- AC Input: 42816-0312 housing with 42815-0031 10-12awg contact or 42815-0031 8awg contact. Each Input feeds two rectifiers.
- DC Output Bus is rated for 200A for two 2 gage or one 2/0 gage two-hole lugs (¼-20 studs on 5/8" centers).

Rear View

List 6

- AC Input: IEC-320 C19 AC receptacles
- DC Output Bus is rated for 200A for two 2 gage or one 2/0 gage two-hole lugs (¼-20 studs on 5/8" centers).

Rear View

J2007001 Shelves (Continued)

Controller Options

Several versions of the CP841A Pulsar Edge controller are available. They offer different alarm input/outputs on the J1 Connector of the shelf:

- **CP841A_9C0R:** 9 Alarm inputs with a common return
No Alarm Output Relays
- **CP841A_3C3R:** 3 Alarm inputs with a common return
3 Output Relays (Pwr Maj, Pwr Mnr, 1 Selectable)
- **CP841A_0I5R:** 5 Output Relays (Pwr Maj, Pwr Mnr, 3 Selectable)
No Alarm Inputs

CP841A has a DB9 craft port on the front of the unit.

Communication Signals

- J1 provides certain alarm outputs and inputs depending on the controller. Inputs are "Dry", no voltage, contact Closures or Opens to a common return. Outputs are Relays. These Alarms are customer selectable on the controllers web pages.
- J2 provides additional alarm inputs on shelves with equipped with distribution or distribution control connections (LVD, Shunt, FAJ) for shelves with external distribution panel. Alarm inputs are contact Closures or Opens to the non-grounded side of the dc bus [-48V]. -48V is provided for these alarm inputs.
- J3, J4 Battery Thermal Probe (QS873A) or Battery Mid-String Voltage Monitor (ES771) with battery thermal probe or Shelf-to-Shelf Daisy Chain Cable.
- J5 LAN/Ethernet

Product Documentation (These documents are available upon request)

Data Sheets: CPL Rectifiers, converters (PEMs) and Shelves

Application Notes: application guidelines, CPL platform, interfacing the CP power supplies, interface board & GUI setup, functional verification and debugging,

Protocol specifications: i²c, RS485

Customer Service Contacts

For customers in the United States, Canada, Puerto Rico, and the US Virgin Islands, call 1-800-THE-1PWR (1-800-843-1797). This number is staffed from 7:00 am to 5:00 pm Central Time (zone 6), Monday through Friday, on normal business days. At other times this number contacts an answering service with on-call personnel for out of service emergencies. Services provided through this contact include initiating the spare parts procurement process, ordering documents, product warranty administration, and providing other product and service information.

Customer Training

Lineage Power offers customer training on many Power Systems products. For information call 1-972-284-2163. This number is answered from 8:00 a.m. until 4:30 p.m., Central Time Zone (Zone 6), Monday through Friday.
