

dsPIC® Digital Signal Controllers

A large, stylized graphic of the text 'dsPIC' in a metallic, 3D font. The 'ds' is red, and 'PIC' is silver. Below it, the words 'Digital Signal Controllers' are written in a bold, black, sans-serif font. The background is a dynamic, abstract pattern of purple and orange wavy lines.

dsPIC®
Digital Signal Controllers

Digital Signal Controller Solutions

Building on the legacy of Microchip's world-leading 8-bit PIC® microcontrollers, 16-bit dsPIC® Digital Signal Controllers (DSCs) deliver a large product portfolio to make your demanding applications more competitive by providing lower system cost and improved efficiency.

Reduce Development Risk

Natural step up for 8-bit MCU users needing more performance/memory

- Industry's largest DSC portfolio for optimal product fit
- Extensive software and application design support
- Same Integrated Development Environment for 8/16/32-bit MCUs
- Extensive web seminars and training courses

Save System Cost

Simplify your design through integration and efficiency

- Best in class 'C' efficiency enables reduced Flash size
- Low pin count packages provide lower product cost
- Replace complex analog filters with digital filters
- Highly Integrated DSCs reduce external components

Discover New Design Options

Transform ideas into reality

- Add powerful features with DSC capabilities
- Employ advanced algorithms to improve efficiency
- Explore innovative ways to protect your design
- Use industry's smallest DSC to shrink product size

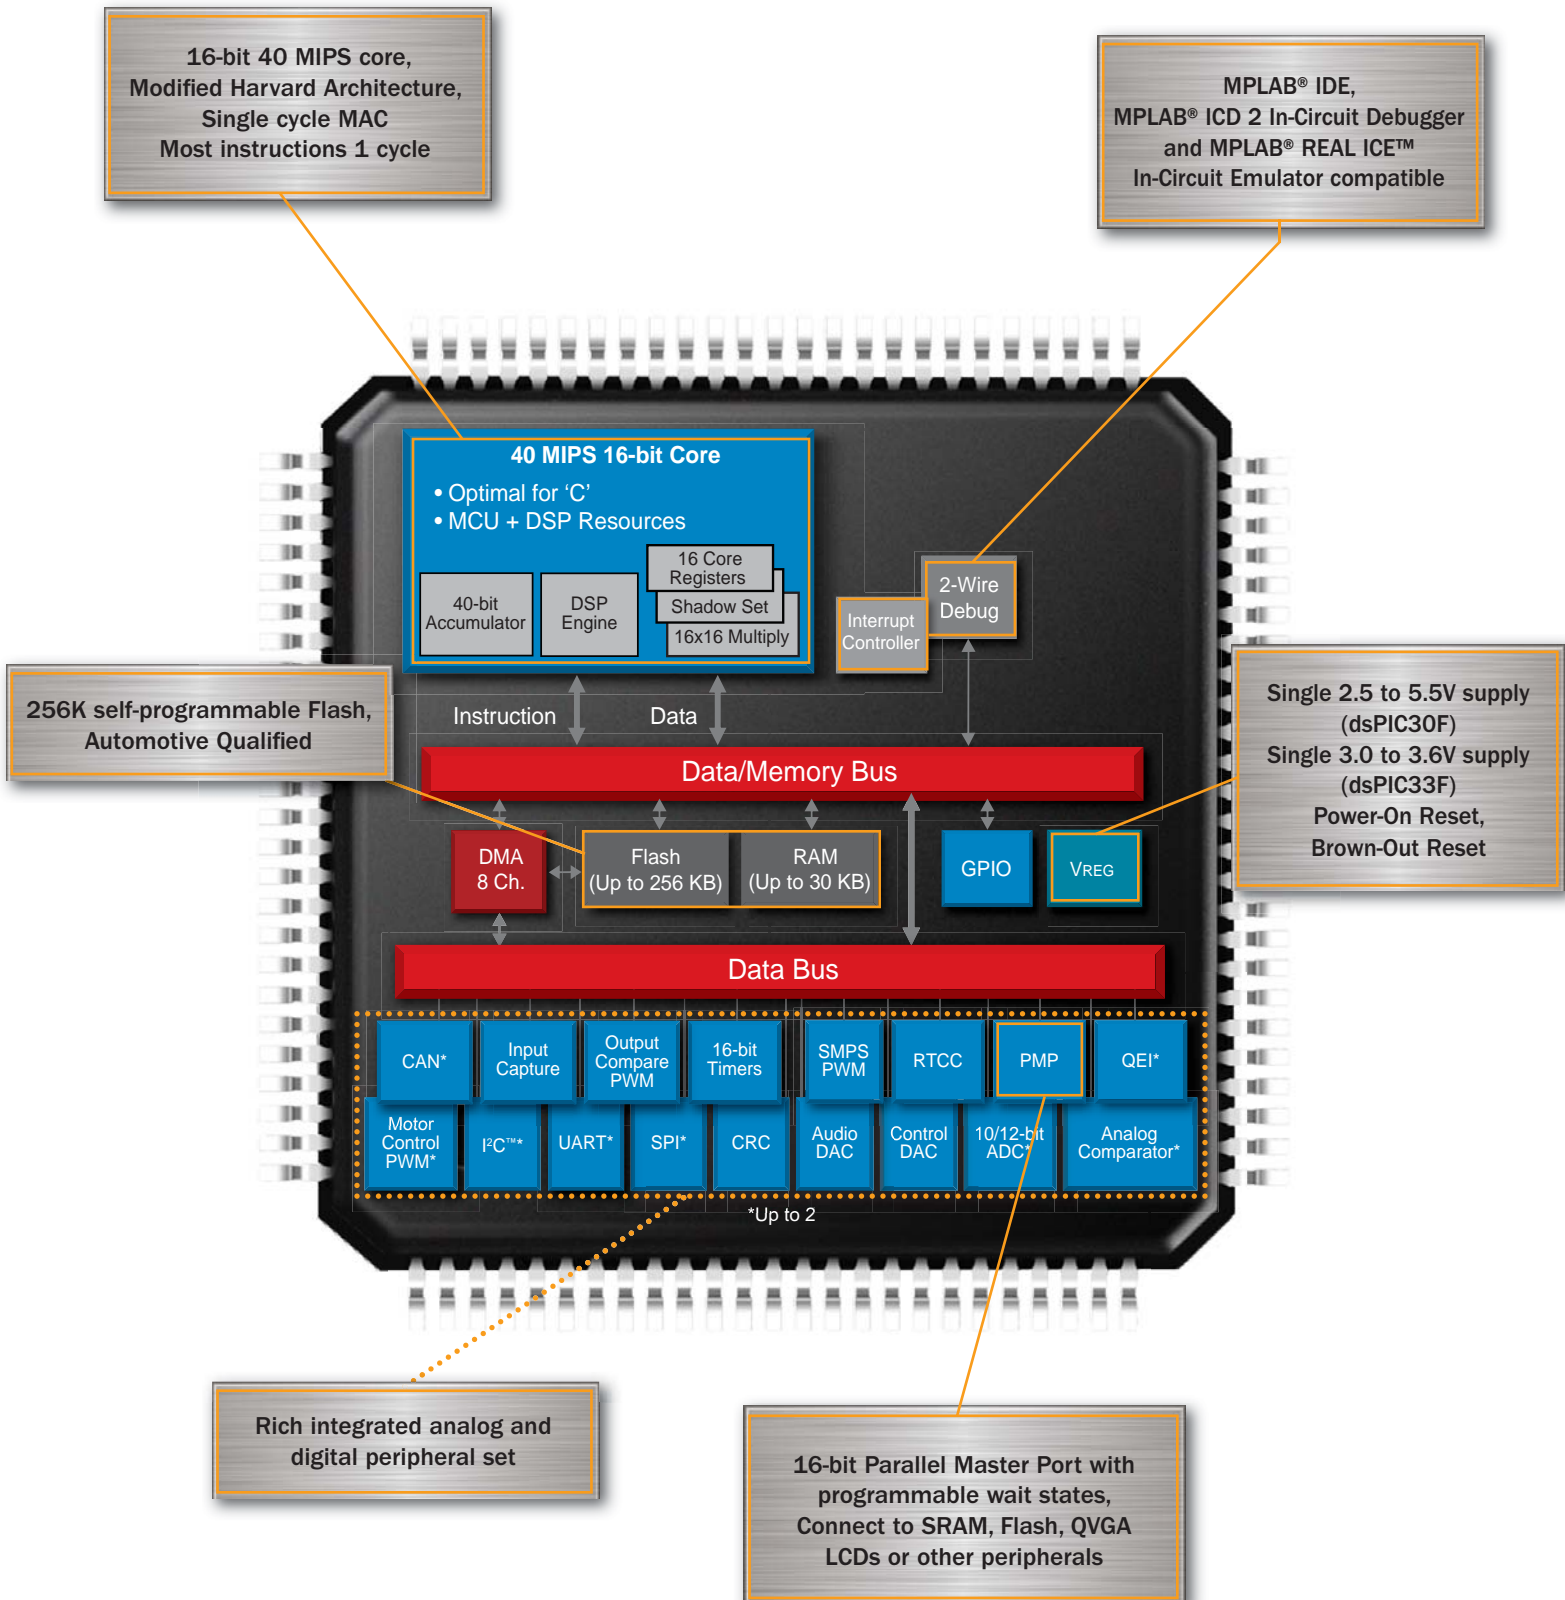

Complete Project on Schedule

Leverage existing software, unprecedented compatibility and powerful graphical tools

- Free software, code examples and peripheral libraries
- Extensive family compatibility maximizes reuse
- Powerful graphical tools for rapid product development
- High-level application libraries add features, not time

Inside the dsPIC® Digital Signal Controller

Developing with dsPIC® Digital Signal Controllers

Microchip is the only silicon vendor with a full 8-, 16- and 32-bit microcontroller portfolio supported by a unified development environment. Our MPLAB® IDE is free and easy to use.

dsPIC® Starter Kit (DM330011)

Getting started is easy with the fully integrated dsPIC Starter Kit featuring simple installation, getting started tutorial and dsPIC Starter Kit board with easy USB connection to your PC.

The Starter Kit features:

- MPLAB IDE and MPLAB C Compiler for dsPIC DSCs†
- dsPIC Starter Kit Board with Integrated Debugger
- Code Examples, Tutorials and Sample Projects

MPLAB® C Compiler

The MPLAB C Compiler for dsPIC DSCs is a full-featured, ANSI compliant optimizing compiler. The Compiler includes a complete ANSI C standard library, including string manipulation, dynamic memory allocation, data conversion, timekeeping and math libraries. The MPLAB C Compiler has a powerful code optimizer; other 16-bit MCUs generate as much as 165 percent larger code for the same application.

Explorer 16 Development Board (DM240001)

A low-cost modular development system for Microchip's 16- and 32-bit microcontrollers. Add MPLAB® ICD 2 or MPLAB REAL ICE™ in-circuit debugger/programmer for software development.

Explorer 16 Motor Control Development System for dsPIC33F

The Explorer 16 Motor Control environment is an excellent platform to develop and prototype BLDC, PMAC and ACIM applications. Microchip offers free motor control source code to jump start your designs.

Plug-In Modules for Explorer 16 Development Board

Controller	Pin Adaptation	Part Number	Notes
dsPIC33FJ256GP710	100 pin to 100 pin	MA330011	included in DM240001
dsPIC33FJ256MC710	100 pin to 100 pin	MA330013	Purchase separately
dsPIC33FJ12MC202	28 pin to 100 pin	MA330014	Purchase separately
dsPIC33FJ12GP202	28 pin to 100 pin	MA330015	Purchase separately
dsPIC33FJ32GP204	44 pin to 100 pin	MA330016	Purchase separately
dsPIC33FJ32MC204	44 pin to 100 pin	MA330017	Purchase separately
dsPIC33FJ128GP804	44 pin to 100 pin	MA330018	Purchase separately
dsPIC33FJ128MC804	44 pin to 100 pin	MA330019	Purchase separately

PICtail™ Plus Daughter Boards with dsPIC33F Family Supported Devices

Development Tool	Description	Part Number
PICtail Plus Daughter Boards For use with the Explorer 16 Development Board (DM240001)	Wireless Communications PICtail™ Plus Daughter Board	AC163027-4
	PICtail Plus Daughter Board for Secure Digital (SD)/Multimedia Card (MMC) to SPI interface	AC164122
	ECAN/LIN PICtail Plus Daughter Board	AC164130
	Audio PICtail Plus Daughter Board	AC164129
	Ethernet PICtail Plus Daughter Board	AC164123
	IrDA® PICtail Plus Daughter Board	AC164124
	Speech Playback PICtail Plus Daughter Board	AC164125
	Prototype PICtail Plus Daughter Board	AC164126
	Graphic PICtail Plus Daughter Board	AC164127
	Motor Interface PICtail Plus Daughter Board	AC164128

†Student Edition is a full feature compiler for the first 60 days.

16-Bit dsPIC® Digital Signal Controller (DSC) Products

Family	Program Memory (Kbytes)	RAM (Bytes)	Pins	Max Speed	A/D Ch.	A/D Res. (bits)	A/D Sample (ksp/s)	Comp	8/16/32-bit Timers (x8, x16, x32)	Communication Peripherals	PWM Ch.	PWM Type	Other Features

Web Seminars, Application Notes and Code Examples

Microchip offers extensive on-line resources for designers to learn and apply dsPIC Digital Signal Controller. These helpful resources are available at:

www.microchip.com/webseminar
www.microchip.com/codeexamples
www.microchip.com/appnotes
www.microchip.com/dscmotor
www.microchip.com/SMPS

Microchip Regional Training Centers

Microchip's Regional Training Center classes enable engineers to implement the right solution for their development needs. Our training is presented in product, technology and implementation classes that are grouped into application based curricula that provides the foundational tool and product knowledge to quickly begin designs and help speed time to market. Engineers looking to gain in depth knowledge of dsPIC DSCs are encouraged to take one or more of our classes. For the latest training schedule visit www.microchip.com/training.

For the most up-to-date information about our 16-bit dsPIC DSC portfolio and related development tools and technical support, visit:
www.microchip.com/DSC

Support

Microchip is committed to supporting its customers in developing products faster and more efficiently. We maintain a worldwide network of field applications engineers and technical support ready to provide product and system assistance. In addition, the following service areas are available at www.microchip.com:

- **Support** link provides a way to get questions answered fast: <http://support.microchip.com>
- **Sample** link offers free evaluation samples of any Microchip device: <http://sample.microchip.com>
- **Training** link offers webinars, registration for local seminars/workshops and information on annual MASTERS events held throughout the world: www.microchip.com/training
- **Forum** link provides access to knowledge base and peer help: <http://forum.microchip.com>
