#### PRECAUTIONS

[1]The DC blocking capacitors have to be placed at RF terminal of RX, TX, ANT1 and ANT2.

- [2] Please locate bypass capacitors (C5,C6) close to appropriate terminals to reduce stripline influence on RF characteristics.
- [3]For good RF performance, the GND terminal must be placed close to ground plane of substrate, and through holes for GND should be placed near by the GND pin connection.
- [4]Exposed pad in the bottom must be connected to ground by via holes.
