Tag-it™ HF-I PLUS TRANSPONDER INLAYS LARGE RECTANGLE

FEATURES

- **ISO/IEC 15693-2,-3; ISO/IEC 18000-3 Compliant**
- **13.56 MHz Operating Frequency**
- **2048 Bit User Memory in 64x32-bit Blocks**
- **User and Factory Lock per Block**
- **Application Family Identifier (AFI)**
- **Data Storage Format Identifier (DSFID)**
- **Combined Inventory Read Block**

APPLICATIONS

- **Product Authentication**
- **Library Applications**
- **Supply Chain Management**
- **Asset Management**
- **Ticketing/ Stored Value**

DESCRIPTION

Texas Instruments' Tag-it HF-I Plus Transponder Inlays consist of 13.56 MHz high frequency (HF) transponders that are compliant with the ISO/IEC 15693 and ISO/IEC 18000-3 global open standards. These products offer a user accessible memory of 2048 bits, organized in 64 blocks and an extensive command set available in six different antenna shapes with frequency offset for integration into paper, PVC or other substrates.

Tag-it HF-I Plus Transponder Inlays are manufactured with TI's patented laser tuning process to provide consistent read performance. And prior to delivery, the transponders undergo complete functional and parametric testing in order to provide the high quality that customers have come to expect from TI.

The Tag-it HF-I Plus Transponder Inlays are well suited for a variety of applications including *but not limited to*: product authentication, library applications, supply chain management, asset management, and ticketing/stored value applications.

SPECIFICATIONS

PART NUMBER	RI-I02-112A-03	RI-I02-112B-03
Supported Standard	ISO/IEC 15693-2,-3; ISO/IEC 18000-3	
Recommended Operating frequency	13.56 MHz	
Passive Resonance Frequency (at +25°C)	13.86 MHz ± 200kHz (includes frequency offset to compensate further integration into paper)	14.4 MHz ± 200kHz (includes frequency offset to compensate PVC lamination)
Typ. required activation field strength to read (at +25°C)	94 dBμA/m #	94 dBμA/m *
Typ. required activation field strength to write (at +25°C)	97 dBμA/m #	97 dBμA/m *
Factory programmed Read Only Number	64 bits	
Memory (user programmable)	2k bits organized in 64 x 32-bit blocks	
Typical programming cycles (at +25°C)	100,000	
Data retention time (at +55°C)	> 10 years	
Simultaneous Identification of Tags	Up to 50 tags per second (reader/ antenna dependent)	
Antenna size	45 mm x 76 mm (~1.77 in x ~2.99 in)	
Foil width	48 mm ± 0.5 mm (1.89 in ± 0.02 in)	
Foil pitch	96 mm +0.1mm/-0.4mm (~3.78 in)	
Thickness	Chip area: 0.355 mm (~0.014 in) Antenna area: 0.085 mm (~0.0033 in)	

Base material	Substrate: PET (Polyethylenetherephtalate) Antenna: Aluminum
Smallest bending radius allowed	18 mm (~0.71 in)
Operating temperature	-25°C to +70°C
Storage temperature (single inlay)	-40°C to +85°C (warpage may occur at upper temperature range)
Storage temperature (on reel)	-40°C to +40°C
Delivery	Single row tape wound on cardboard reel with 500 mm diameter Reel outer width: approx. 60 mm (~2.36 in) Reel inner width: approx. 50 mm (~1.97 in) Hub diameter: 76.2 mm (3 in)
Typical quantity of good units per reel	5,000

Note: For highest possible read-out coverage we recommend to operate readers at a modulation depth of 20% or higher
After integration into paper; * After PVC Lamination

SUPPORTED COMMAND SET

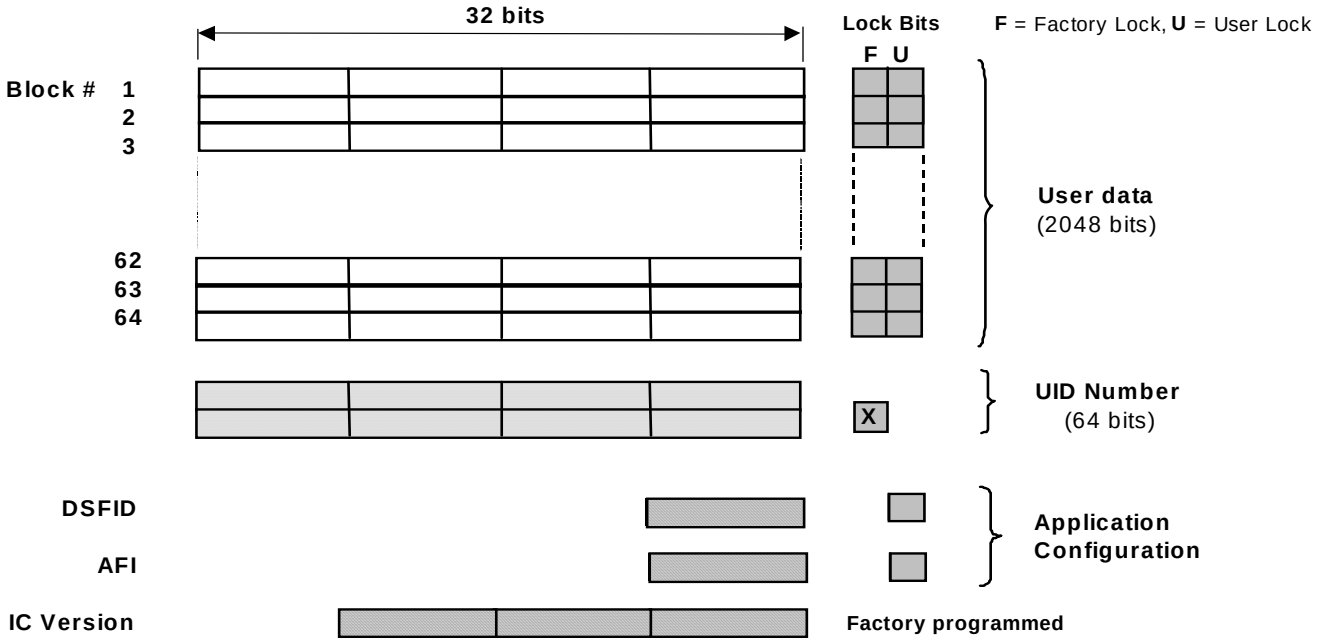
MEMORY ORGANIZATION



IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
