Kilovac PD10 Make & Break Load Switching

Panel Mount Version shown above is applicable to both PD5 and PD10. For PD10, the two power terminals are .064" (1.63) diameter. Refer to PD5 for PCB Mount Dimensions.

Based on extrapolated data. Since each application is unique, user is encouraged to verify rating in actual application. The load terminals should always be connected as follows: Common Contact (A2) positive; Other Contact negative.

Features:

- Excellent for control applications
- PCB and panel mountings
- Rugged design for the most demanding applications, including seismic shock
- Small size and weight
- Low power consumption
- No heat sinks required •
- Vacuum-sealed; can operate in explosive and harsh environments
- 2000V isolation across open contacts
- Meets requirements of SAE ARD 50031
- Vacuum dielectric for power switching •
