## Panasonic ideas for life

GU (General Use)-E Type [1, 2-Channel (Form A) 4, 6-Pin Type]

mm inch

## FEATURES

1. Low cost type.
2. Reinforced insulation 5,000V type (DIP type)
More than 0.4 mm internal insulation distance between inputs and outputs. Conforms to EN41003, EN60950 (reinforced insulation)
3. Various package design (DIP4, SOP4, DIP8, SOP8 packages are available)

## 4. High sensitivity, Low ON resistance

Can control a maximum 0.5 A
(AQY282EH, AQW282EH) load current with a 5 mA input current.
Low ON resistance of $2.5 \Omega$ (AQY282EH, AQW282EH).
Stable operation because there are no metallic contact parts.
5. Low-level off state leakage current The SSR has an off state leakage current of several milliamperes, where as the PhotoMOS relay has only 100 pA even with the rated load voltage of 350 V (AQY280EH).

## PhotoMOS RELAYS

## TYPICAL APPLICATIONS

- Modem
- Telephone equipment
- Security equipment
- Sensors
- Amusement
