

- Peak Switching
- Panel Mount
- 600V Transient Capability
- Internal Snubber
- Input Status Indicator Option Available

Featuring state-of-the-art Surface Mount Technology, these SPST-NO relays deliver proven reliability in the most demanding applications.

Output consists of an SCR AC switch turning ON at the next peak of sinusoidal AC wave form after the input has been activated. Continuing to conduct normally until the input is de-activated and then turning off at the next current zero cross Suitable for switching of transformers and other highly inductive loads where significant inrush current may otherwise cause problems. Manufactured in Crydom's ISO 9001 Certified facility for optimum product performance and reliability.
