

# E2C/E2C-H

## Separate Amplifier Sensor with Sensitivity Adjustment

- Compact design with smaller Sensor Head.
- Heat-resistance model available for application between -10 and 200°C.

 Be sure to read *Safety Precautions* on page 15.

## Ordering Information

**Sensors** [Refer to *Dimensions* on page 18.]

Accessories	Instruction manual			Caution labels, Mounting Bracket, instruction manual	Instruction manual		

\*1. A full-wave rectification power supply of 24 VDC ±10% (average value) can be used (except for the E2C-GE4□).

\*2. The sensing distance range required to maintain performed is given for using the Amplifier Unit in combination with the Sensor.

\*3. Internal relay: G2R-14 DC 12V

\*4. The weight of the Connection Socket is not included.

## Heat-resistant Models

### Sensors

Item	Model	E2C-X1R5AH	E2C-X2AH	E2C-X5AH
Detectable object	Ferrous metal (The sensing distance decreases with non-ferrous metal, refer to <i>Engineering Data</i> on page 7.)			
Standard sensing object	Iron, 8 × 8 × 1 mm	Iron, 12 × 12 × 1 mm	Iron, 18 × 18 × 1 mm	
Stable sensing area	0 to 1.5 mm	0 to 2 mm	0 to 5 mm	
Differential travel	0.04 mm max.		0.1 mm max.	
Response frequency *1	300 Hz			
Ambient temperature range	Operating/Storage: -10 to 200°C (with no icing or condensation)			
Ambient humidity range	Operating/Storage: 35% to 95% (with no condensation)			
Temperature influence	±0.2%/°C			
Vibration resistance	Destruction: 10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y, and Z directions			
Shock resistance	Destruction: 500 m/s <sup>2</sup> 3 times each in X, Y, and Z directions			
Degree of protection	IEC 60529 IP60 *2			
Connection method	Pre-wired Models (Cable length: 3 m) Heat-resistant, high-frequency coaxial cable			
Weight (packed state)	Approx. 50 g	Approx. 60 g	Approx. 140 g	
Materials	Case	Brass		
	Sensing surface	PEEK (polyether ether ketone)		
	Cable	Fluorine resin		
	Clamping nut	Brass, nickel-plated		
	Toothed washer	Iron, zinc-plated		

Note: Ratings and characteristic are given for 50% of the stable sensing area.

\*1. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.

\*2. Do not operate the Sensor in areas exposed to water vapor because the enclosure is not waterproof.

### Amplifier Units

Item	Model	E2C-JC4CH	E2C-JC4DH	E2C-JC4EH
Power supply voltage *1 (operating voltage range)	12 to 24 VDC (10 to 30 VDC), ripple (p-p): 10% max.			
Current consumption	45 mA max.			
Sensing distance adjustment range *2	20% to 100% of rated sensing distance 4-turn potentiometer			
Control outputs	Load current	NPN open collector, 100 mA max. (40 VDC max.)		
	Residual voltage	0.8 V max.		
Indicators	Detection indicator (red)			
Operation mode	Changed with NO/NC switch.			
Cable length compensation	Switched between 3 and 5 m.			
Ambient temperature range	Operating/storage: -10 to 55°C (with no icing or condensation)			
Ambient humidity range	Operating/storage: 35% to 85% (with no condensation)			
Temperature influence	±0.08%/°C			
Voltage influence	±2% max. of sensing distance at rated voltage in the rated voltage ±20% range			
Insulation resistance	50 MΩ min. (at 500 VDC) between current-carrying parts and case			
Dielectric strength	1,000 VAC, 50/60 Hz for 1 min between current-carrying parts and case			
Vibration resistance	Destruction: 10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y, and Z directions			
Shock resistance	Destruction: 100 m/s <sup>2</sup> 3 times each in X, Y, and Z directions			
Degree of protection	IEC 60529 IP20			
Connection method	Pre-wired Models (Cable length: 2 m)			
Weight (packed state)	Approx. 80 g			
Accessories	Caution labels, Mounting Bracket, instruction manual			

\*1. A full-wave rectification power supply of 24 VDC ±10% (average value) can be used.

\*2. The sensing distance range required to maintain performed is given for using the Amplifier Unit in combination with the Sensor.

## Cable Lengths for Sensor-Amplifier Unit Combinations

### Standard Models

Sensor Amplifier Units	E2C-CR8A	E2C-CR8B	E2C-X1A	E2C-C1A	E2C-X1R5A	E2C-X2A	E2C-X5A	E2C-X10A	E2C-C20MA
E2C-GE4A	Restricted to 3 m.					---	---	---	---
E2C-GF4A	Restricted to 3 m or 5 m. Set cable length switch to desired position.*					---	---	---	---
E2C-WH4A	1 to 3 m: Short cable length terminals* 3 to 5 m: Open cable length terminals*					---	---	---	---
E2C-JC4AP	Restricted to 3 m.					---	---	---	---
E2C-JC4A	0 to 5 m Set cable length switch to desired position.*					0 to 10 m Set cable length switch to desired position.*			
E2C-AM4A									
E2C-AK4A									

Note: The standard cable length is 3 m. Models with 5-m or 10-m are manufactured upon order.  
\* Refer to page 14 for the operation of cable length switching.

### Heat-resistant Models

Sensor Amplifier Units	E2C-X1R5AH	E2C-X2AH	E2C-X5AH
E2C-JC4CH	Set 3 m/5 m cable length switch to desired position.		
E2C-JC4DH			
E2C-JC4EH			

Note: The standard cable length is 3 m. Models with 5-m are manufactured upon order.

## Self-diagnostic Function

The self-diagnostic output transistor will turn ON in the following cases. (The output will turn ON for any of these conditions individually.)

(1) Sensor open circuit: Transistor will turn ON the instance there is an open circuit for the Sensor (including the cable).

### Sensor Open Circuit

### Sensor Connected

Note: When the E2C-X2A Sensor is used, 93% is 96% and 107% is 104%.  
\* The self-diagnostic output may turn ON if the sensing objects moves a low speed. In actual application, include an ON-delay timer circuit or other suitable measure.

(2) Detection: The output will turn ON if a sensing object is within 93% to 100% of the sensing distance continuously for 0.3 s or longer (e.g., for sensing object position offset).

(3) No detection: The output will turn ON if a sensing object is within 100% to 107% of the sensing distance continuously for 0.3 s or longer (e.g., when background is influencing detection).

## Indicators

- The detection indicator lights when a sensing object approaches the sensing distance to indicate that a sensing object has been detected.
- The stability indicator lights when the sensing object approaches within 93% of the sensing distance or moves away from 107% of the sensing distance to indicate a stable sensing or non-sensing condition.

\* When the E2C-X2A Sensor is used, 107% is 104% and 93% is 96%.

\* Cable Length Compensation Switching

Set this switch to the proper setting depending on whether the standard cable length is being used or the cable has been cut shorter.

### Amplifier Unit Switch Settings

Applicable Sensors	Cable length	0 to 1 m	1 to 2 m	2 to 3 m	3 to 4 m	4 to 5 m	5 to 6 m	6 to 7 m	7 to 8 m	8 to 9 m	9 to 10 m
E2C-CR8A E2C-CR8B E2C-X1A E2C-C1A E2C-X1R5A							—	—	—	—	—
E2C-X2A E2C-X5A E2C-X10A E2C-C20MA											

Note: 1. Mutual Interference Prevention: When mounting Sensors with the same diameter and cable length in parallel, set the DIP switch to modes that differ by 1 m in cable length. Specifications, however, may not be sufficiently met, so always check operation before actual application. This method cannot be used for the E2C-C20MA.

2. When using the E2C-CR5B + E2C-AM4A (or AK4A), set all the pins on the Amplifier Unit DIP switch to the left.

## Safety Precautions

Refer to *Warranty and Limitations of Liability*.

### ⚠ WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

### Precautions for Correct Use

Do not use the Encoder under ambient conditions that exceed the ratings.

#### ● Design

#### Influence of Surrounding Metal

When mounting the Sensor within a metal panel, ensure that the clearances given in the following table are maintained. Failure to maintain these distances may cause deterioration in the performance of the Sensor.

#### Influence of Surrounding Metal (Unit: mm)

Model	Distance	l	d	D	m
E2C-CR8	0	0	(3.5)	0	2.4
E2C-X1A			(5)		3
E2C-C1A			(5.4)		4.5
E2C-X1R5A(H)			(8)		6
E2C-X2A(H)			(12)		15
E2C-X5A(H)			(18)		30
E2C-X10A			(30)		60
E2C-C20MA			25		120

Note: Values in parentheses for diameter d are the outer diameters of Shielded Models.

#### Mutual Interference

When installing Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained. Mutual interference can be prevented by using the cable length compensation switch, but doing so will also change coil characteristics. Specifications such as temperature specifications and sensing distance, may not be sufficiently met, so always check operation before actual application. This method cannot be used for the E2C-G□4A, E2C-JC4A, E2C-C20MA.

#### Mutual Interference (Unit: mm)

Model	Distance	A	B
E2C-CR8	20	15	15
E2C-X1A			
E2C-C1A			
E2C-X1R5A(H)	30	20	20
E2C-X2A(H)			
E2C-X5A(H)	50	35	
E2C-X10A	100	70	
E2C-C20MA	300	200	

Note: The above values are for a differential travel setting of 5%.

#### Mounting

- Do not use excessive force when tightening the nuts on the E2C-X and E2C-C20MA. A washer must be used with the nut.

Model	Torque
E2C-X1A	0.98 N·m
E2C-X1R5A(H)	2.0 N·m
E2C-X2A(H)	5.9 N·m
E2C-X5A(H)	15 N·m
E2C-X10A	39 N·m
E2C-C20MA	15 N·m

Note: The above leeways in tighten torque assume that a toothed washer is being used.

#### ● Mounting Unthreaded Cylindrical Models

When using a set screw, tighten it to a torque of 0.2 N·m max.

Y92E-F3R5 Mounting Bracket (for 3.5 dia.) (Order Separately)

The Y92E-F5R4 (for 5.4 dia.) is also sold separately.

## ● Mounting

### Mounting the Amplifier Unit

E2C-JC4A, E2C-JC4□H

#### Lengthwise Mounting

- (1) Secure the Mounting Bracket with the enclosed M3 screws.
- (2) Slide the protrusion on the Amplifier Unit into the holes on the Mounting Bracket.
- (3) Secure the Amplifier Unit with mounting screws.
- (4) Secure the cover to the case.

#### Mounting to the Side

- (1) Remove the cover screw and mounting screw.
- (2) Attached the enclosed M3 screw to the cover and secure the cover to the case.
- (3) Secure the Amplifier Unit with M3 screws from the side.

E2C-WH4A

#### Mounting Method

- (1) Mount to DIN Track as shown in the following diagram.
- (2) Hook part (A) at the top of the Amplifier Unit on the DIN Track first and then press in on the Amplifier Unit in the direction indicated by (B).

#### Removing the Amplifier Unit

- (3) Pull down on the track stopper (C) with a flat-blade screwdriver and then remove the Amplifier Unit from the DIN Track. When using DIN standard 35 track, keep other devices on the track separated from the Amplifier Unit by at least 30 mm to facilitate mounting and removal.

After completing adjustments, attach the enclosed caution label over the adjustment holes to prevent adjustment mistakes.

## E2C-A□4A

### Using P2CF-11, P2CF-08

When aligning the Amplifier Unit vertically with the Socket, consider the space required for the hooks and allow a leeway of about 20 mm above and below the Amplifier Unit.

### Mounting Embedded in a Panel

(1) When using the Y92F-30 Embedded Mounting Adapter, insert the Amplifier Unit into a square hold in the panel, attach the Adapter from the back and press in to reduce the gap with the panel. Then secure the Adapter with the screws.

(2) When using the Y92F-70 or Y92F-71 Embedded Mounting Adapter, just press the Amplifier into a square hole in the panel. If the panel coating is too thick and the hooks do not lock in place, spread the hooks from the back by pushing in the directions of the arrows.

### Removing the Amplifier Unit

• When the Amplifier Unit is mounted using the Y92F-30, loosen the screws on the adapter, spread the hooks at the top and bottom, and remove the Adapter.

• Using Y92F-70, Y92F-71  
Press in on the hooks with your thumb and forefinger and press forward on the Amplifier Unit.

### ● Wiring

#### Self-diagnostic Output

When not using the self-diagnostic output, connect the orange wire to 0 V or cut it and wrap it with insulation tape so that it does not come into contact with other terminals.

### ● Miscellaneous

The sensor does not have a water-resistant structure. Do not use it where it would be subjected to water or water vapor.

- Hold-down Clip**
- PYC-A1

### E2C-AK4A (11-pin) E2C-AM4A (8-pin)

- Applicable Sockets (Sold Separately)**
- For E2C-AK4A (11-pin)
- P2CF-11
  - P3GA-11
- For E2C-AM4A (8-pin)
- P2CF-08
  - P3G-08

### E2C-JC4A

#### Mounting Bracket Installation

\* After completing adjustments, attach the caution label to prevent adjustment mistakes.

### E2C-JC4AP

#### Mounting Bracket Installation

\*1. After completing adjustments, attach the caution label to prevent adjustment mistakes.

\*2. Not required when mounting to DIN Track.

\*3: 4.5-dia. vinyl-insulated round cable with 4 conductors (Conductor cross section: 0.2 mm<sup>2</sup>, Insulator diameter: 1.2 mm), Standard length: 2 m

## E2C-JC4□H

\*1. After completing adjustments, attach the caution label to prevent adjustment mistakes

\*2. Not required when mounting to DIN Track.

\*3. 4-dia. vinyl-insulated round cable with 3 conductors (Conductor cross section:  $0.2 \text{ mm}^2$ , Insulator diameter: 1.2 mm), Standard length: 2 m  
The cable can be extended up to 200 m (separate metal conduit).

## E2C-WH4A

\*Connector for E2C-WH4AF and S3D8.

## Read and Understand This Catalog

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

## Warranty and Limitations of Liability

### WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

### LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

## Application Considerations

### SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

### PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

## Disclaimers

### CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

### DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

### PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

### ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

2008.11

In the interest of product improvement, specifications are subject to change without notice.
