

## Description:

Each OPB680, OPB680-20 and OPB690Z optical flag switch consists of an infrared emitting diode in a molded plastic housing. The phototransistor has an enhanced low current roll-off that improves contrast ratio and immunity to background irradiance.

A lever arm actuated flag interrupts the light beam and switches the output between states that can readily drive logic gates. This can be actuated by passing a paper sheet without damaging the paper's edge.

OPB680-20 offers increased lever operating force that prevents false triggering due to incidental contact in door sensing and other heavy-duty applications.

OPB690Z is designed to easily snap mount into a $0.037 " \pm 0.001^{\prime \prime}$ ( $0.940 \mathrm{~mm} \pm 0.025 \mathrm{~mm}$ ) thick material with a rectangular opening of $0.320 " \pm 0.003^{\prime \prime} \times 0.472^{\prime \prime}(8.128 \mathrm{~mm} \times 11.989 \mathrm{~mm})$ minimum. Insertion into the punched side of metal is recommended.

Customized lever arms and spring torques can be designed for specific applications for each of the devices.
Custom electrical, wire, cabling and connectors are available. Contact your local representative or OPTEK for more information.

## Applications:

- Mechanical switch replacement
- Speed indication (tachometer)
- Mechanical limit indication
- Edge sensing

| Ordering Information |  |  |  |  |  |

## OPB680, OPB680-20

| Pin \# | Description | Pin \# | Description |
| :---: | :---: | :---: | :---: |
| 1 | Anode | 3 | Collector |
| 4 | Cathode | 2 | Emitter |

[ MILLIMETERS]
DIMENSIONS ARE IN:
inches

Notes:
(1) For OPB680 and OPB680-20, the "on" condition exists when the lever arm is in the rest position (16 from vertical).
(2) For OPB680 and OPB680-20, the "off" condition exists when the lever arm is deflected clockwise $8^{\circ} \pm 3^{\circ}$ from the rest position $\left(16^{\circ}\right.$ from vertical). Maximum allowable deflection is $35^{\circ}$ from the rest position.

## OPB690Z

Notes:
(1) For OPB690Z, the "on" condition exists when the lever arm is deflected clockwise $18^{\circ}+/-3^{\circ}$ from the rest position ( $20^{\circ}$ from vertical).
(2) For OPB690Z, the "off" position exists when the lever arm is in the rest position ( $20^{\circ}$ from vertical).
(3) For OPB690Z, from the rest position to the switch point the lever torque measured at the end of the arm is 1.5 grams maximum.

## Slotted Optical Flag Switch OPB680, OPB680-20, OPB690Z

## Absolute Maximum Ratings ( $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$ unless otherwise noted)

| Storage \& Operating Temperature Range | $-40^{\circ} \mathrm{C}$ to $+100^{\circ} \mathrm{C}$ |
| :--- | ---: |
| Lead Soldering Temperature $[1 / 16 \text { inch }(1.6 \mathrm{~mm}) \text { from the case for } 5 \text { sec. with soldering iron }]^{(1)}$ | $260^{\circ} \mathrm{C}$ |

Input Diode

| Forward DC Current | 50 mA |
| :--- | ---: |
| Peak Forward Current $(1 \mu$ s pulse width, 300 pps$)$ | 3 A |
| Reverse DC Voltage | 3 V |
| Power Dissipation ${ }^{(2)}$ | 100 mW |

Output Phototransistor

| Collector-Emitter Voltage | 30 V |
| :--- | ---: |
| Emitter Reverse Current | 10 mA |
| Collector DC Current | 30 mA |
| Power Dissipation $^{(3)}$ | 200 mW |

Electrical Characteristics ( $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$ unless otherwise noted)

| SYMBOL | PARAMETER | MIN | TYP | MAX | UNITS | TEST CONDITIONS |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
