**(Precautions for Use)**

- 1) In order to stabilize power supply line, connect a by-pass capacitor of more than  $0.33\mu\text{F}$  between  $V_{CC}$  and GND near the device.
- 2) Please do not perform dip cleaning or ultrasonic cleaning because lens part of this product is an optical device of acrylic resin.
- 3) Remove dust or stains, using an air blower or a soft cloth moistened in cleaning agent.

However, do not perform the above cleaning using a soft cloth with cleaning solvent in the marking portion.

In this case, use only the following type of cleaning solvent used for wiping off:

Ethyl alcohol, Methyl alcohol, Isopropyl alcohol

When the cleaning solvents except for specified materials are used, please contact us.

- As for other general precautions, refer to the chapter "Precautions for Use".
