

Distinctive Characteristics

Industry's first molded rocker with TV rating. Designed to handle large inrush current. JWM models certified for TV-5 rating and JWL models for TV-8 rating.

Special 5A @ 72V DC rating for JWL models to use in worldwide telecommunication equipment for power distribution applications.

Prominent external insulating barriers increase insulation resistance and dielectric strength.

Constructed for dust resistance with interior cover between actuator and contact area.

Specially designed to break light contact welds.

JWMW panel seal version meets IP67 of IEC60529 Standards (similar to NEMA 4 and 6).

Terminals are molded in and epoxy sealed to lock out flux, dust, and other contaminants.

Housing and case of heat resistant resin meet UL 94V-0 standard.
