AGL

Left side hinge lever type

## FEATURES

- Conforming to IEC 950

Contact gap of greater than 1.0 mm .039inch

- 2-circuit line of high capacity load contact and low-level circuit load contact
- The high capacity load contact accepts the DC load due to its snap-action construction (6A 30V DC)
- Self-standing terminal for PC board
- Flame retardancy: UL94V-0
- UL/CSA/TÜV/SEMKO approved

## TYPICAL APPLICATIONS

1. Office equipment

- Copiers - Printers • Facsimiles etc.

2. Power supply units

## PRODUCT TYPES

| Actuator | O.F. (N) | Part number |
| :--- | :--- | :---: |
| Pin plunger | Max. 3.23 | AGL4020 |
| Right side hinge lever | Max. 1.47 | AGL4021 |
| Left side hinge lever | Max. 1.47 | AGL4022 |

Remark: Unless you request otherwise, the switch comes with a stamp indicating its conformance to standards.

## SPECIFICATIONS

1. Contact rating

|  | Resistive load ( $\cos \phi \fallingdotseq 1$ ) | Low-level circuit load |
| :---: | :---: | :---: |
| High capacity load contact | $\begin{aligned} & \text { 5A 250V AC } \\ & 6 A \text { 30V DC } \end{aligned}$ | - |
| Low-level circuit load contact | $\begin{aligned} & 0.1 \mathrm{~A} \mathrm{125V} \mathrm{AC} \\ & 10 \mathrm{~mA} 8 \mathrm{~V} \text { DC } \end{aligned}$ | $\begin{aligned} & 5 \mathrm{~mA} 6 \mathrm{~V} \text { DC } \\ & 2 \mathrm{~mA} 12 \mathrm{~V} D C \\ & 1 \mathrm{~mA} 24 \mathrm{~V} \text { DC } \end{aligned}$ |

2. Characteristics

| Item |  | Characteristics |
| :---: | :---: | :---: |
| Expected life (min.) | Electrical (at 10 cpm ) | $10^{5}$ |
|  | Mechanical (at 60 cpm ) | $10^{5}$ |
| Insulation resistance |  | Min. 100M $\Omega$ (at 500V DC) |
| Dielectric strength | Between terminals | 1,000 Vrms for 1 min . |
| Dielectric strength | Between terminals and other exposed metal parts | 1,500 Vrms for 1 min . |
| Dielectric strength | Between terminals and ground | 1,000 Vrms for 1 min . |
| Contact resistance (initial, max.) |  | $100 \mathrm{~m} \Omega$ (by voltage drop) at 1A to 8V DC |
| Temperature rise (load current 5A) |  | Initial: Max. 45 deg. After test: Max. 55 deg. |
| Vibration resistance |  | 10 to 55 Hz at amplitude at 0.75 mm (Contact opening: Max. 1 msec .) |
| Shock resistance |  | Min. 294m/s ${ }^{2}$ \{30G\} (Contact opening: Max. 1 msec .) |
| Actuator strength |  | 39.2 N \{4kgf\} min. |
| Tensile terminal strength |  | 11.8 N \{1.2kgf\} min. |
| Allowable operating speed |  | 1 to $500 \mathrm{~mm} / \mathrm{s}$ |
| Maximum operating cycle rate |  | 300 cpm |
| Ambient temperature |  | $-25^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}-13^{\circ} \mathrm{F}$ to $+140^{\circ} \mathrm{F}$ ( Not freezing below $0^{\circ} \mathrm{C} 32^{\circ} \mathrm{F}$ ) |
| Ambient humidity |  | Max. 85\% R.H. |
| Flame retardancy |  | UL 94V-0 |

Remark: Test condition and judgement are conforming to JIS C 4505, VDE 0630 (EN61058-1), UL 1054 and CSA C22.2.

## 3. Operating characteristics

|  | Pin plunger type |  | Hinge lever type |  |
| :---: | :---: | :---: | :---: | :---: |
|  | From basis | From boss center | From basis | From boss center |
| Free position $\quad \mathrm{mm}$ inch | Max. 7.5 . 295 | Max. 5.1 201 | Max. 12.5 . 492 | Max. 10.1 . 398 |
| Operating position mm inch | 6.5+0.4 .256+. 016 | 4.1+0.4.161+.016 | 9.5+1.3 .374+. 051 | 7.1+1.3.280+.051 |
| Total travel position mm inch | Max. 5.45 . 215 | Max. 3.05.120 | Max. 6.0 . 236 | Max. 3.6 . 142 |
| Over travel mm inch | Min. 0.75 .030 |  | Min. 1.6.063 |  |
| Operating force, Max. | $3.23 \mathrm{~N}\{330 \mathrm{gf}\}$ |  | $1.47 \mathrm{~N}\{150 \mathrm{gf}\}$ |  |
| Total force, Max. | 5.68 N \{580 gf $\}$ |  | $2.45 \mathrm{~N}\{250 \mathrm{gf}\}$ |  |

Remark: Total force is weighed at each total travel position.

## DIMENSIONS

mm inch

## 1. Pin plunger type

Detailed dimensions of terminal mounting
PC board pattern

-------------------------------------------------------

3. Left side hinge lever type

Remark: Other dimensions are the same as those of pin plunger type.

## NOTES

1. $A$ and $B$ of the figure below are the additional terminals to fix the switch body on the PC board. Since these terminals are related No. 1 terminal and No. 2 terminal respectively, please be sure to maintain adequate insulating clearance between each terminal and ground.

2. In setting the movement after operation, the over-travel should be set from $70 \%$ to $100 \%$. Setting the movement less than 70\% may cause degrading the electrical mechanical performance.
3. Soldering operation

Soldering must be done as quickly as possible.
$260^{\circ} \mathrm{C} 500^{\circ} \mathrm{F}$ : within 10 seconds $350^{\circ} \mathrm{C} 662^{\circ}$ : within 3 seconds During the operation, care should be taken to prevent flux entrance inside the switch. The positioning tab may be changed in shape.
4. Please pay attention to the insulation distance between terminals and between terminal and the ground after mounting and wiring.
5. Environment

Avoid the location nearby the conductive material which possibly attaches the switch.
