

Distinctive Characteristics

Sealed construction prevents contact contamination and allows automated soldering and cleaning.

.244" (6.2mm) square body allows compact mounting.

Heat tolerant resin used for actuator and base meets UL flammability rating of 94V-0 and maintains switch reliability through vapor phase and infrared convection reflow soldering.

Dome contact gives crisp tactile feedback to positively indicate circuit transfer and assures high reliability and long life – more than 100,000 operations.

Gull-winged terminals ensure mechanical stability during soldering and simplify solder joint inspection.

Insert molded terminals lock out flux, solvents, and other contaminants.

Packaged in tape-reel or partitioned tray. Tape-reel packaging meets EIA-481-2 Standard.

Coplanarity: all considered surfaces must lie between two parallel planes that are a maximum distance apart of .0059" (0.15mm). (Additional coplanarity details in Terms and Acronyms in the Supplement section.)

Standards & Certifications

Flammability Standards: UL94V-0 actuator & base
UL Recognition or CSA Certification: The CB3 Series tactiles have not been tested for UL recognition or CSA certification. These switches are designed for use in a low-voltage, low-current, logic-level circuit. When used as intended in a logic-level circuit, the results do not produce hazardous energy.

PACKAGING

R

Tape-Reel (packaged to EIA-481-2 standard)

Switches must be ordered in 1,000-piece increments when tape-reel packaging is selected.

No Code

Partitioned Tray

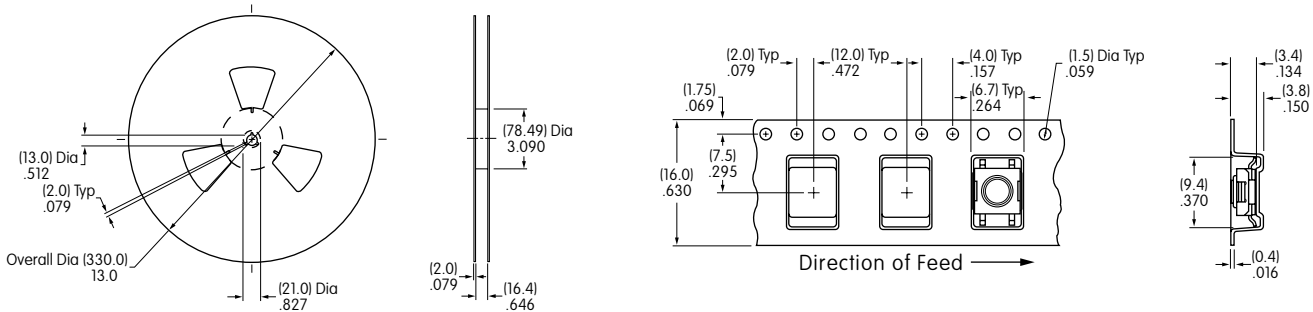

If less than 1,000 pieces are ordered, the switches are packaged in a partitioned tray. No code is required.

Tape-Reel Dimensions & Specifications

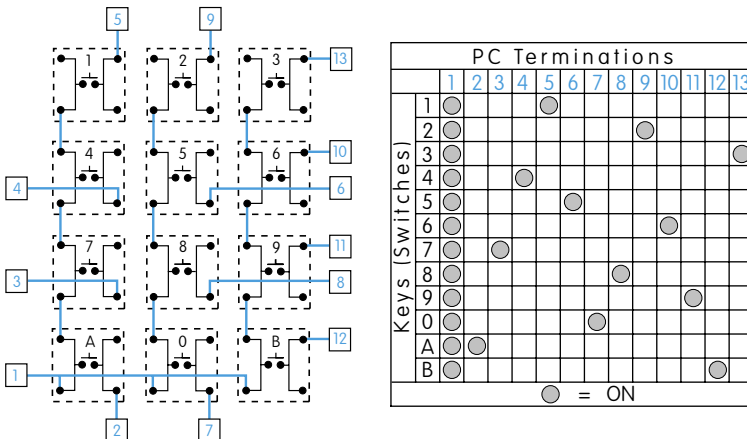

Each tape-reel of 1,050 pockets contains 1,000 switches

Minimum Leader Length: 16.54" (420mm) Minimum Trailer Length: 7.09" (180mm)

KEYBOARD MATRIX

Common Bus Matrix

Blue = PCB Trace, Black = Switch Circuit

These single pole, single throw switches can be used in a keyboard matrix and, using strapped terminals, achieve a common bus electrical configuration on a single-sided PC board.

X-Y Matrix

Blue = PCB Trace, Black = Switch Circuit

These single pole, single throw switches can be arranged on a single-sided PC board matrix with strapped terminals to achieve an X-Y type electrical interconnection.
