

Models 1686A & 1688A

3 - 14Volts DC Power Supplies

Data Sheet

B+K High Current DC Power Supplies are designed for continuous duty and are ideal for substituting car batteries. For servicing/demonstrating high-power car stereos, cellular phone products, camcorders, and ham radios. Hobbyists, retailers, and service shops use car batteries to power mobile equipment. Car batteries are heavy, leak acid, spark, can't tolerate shorted outputs, and must be recharged. These Power Supplies provide their maximum current output continuously hour after hour without overheating. For more output, just connect two or more in parallel or series. These are the only high-current supplies in their price range built to withstand continuous duty!

The B+K Precision Models 1686A & 1688A are a high quality 3 to 14 Volt DC Power Supplies primarily designed for bench powering of automotive and marine electronic equipment. The Models 1686A &1688A have a maximum output current proportional to the voltage setting (see specifications chart). Two panel mounted meters continuously monitor the output voltage and current.

Models 1686A & 1688A

Variable Voltage - 3 to 14 volts DC output

- 20 A guaranteed @ 13.8V (Model 1688A)
- 12 A guaranteed @ 13.8V (Model 1686A)
- **■** Current limiting overload protection
- Over voltage protection
- Short circuit protection
- Reverse polarity protection
- Thermostatically controlled cooling fan
- Thermal protection
- Operates continuously at full load without overheating
- Connect two in parallel for more current
- Connect two in series for higher voltage
